The Secret of the Hittites C. W. Ceram 2001 The author of the acclaimed *Gods, Graves, and Scholars* tells the dramatic tale of the Hittites, an Indo-European people who became a dominant power in the Middle East. Their struggle in Egypt with Ramses II for control of Syria led to one of the greatest battles of the ancient world. The fall of the Hittite empire was sudden, and historical records were scarce--until the discovery of cuneiform tablets yielded a rich store of information on which this work is based. "...a saga richly charged with dramatic twists and with enthralling accounts of scholarly detective work."--*The Atlantic*.

The Troubled Island Jan Driessen 1998-12 With a large amount of supporting evidence, this book argues that a sequence of changes in society triggered by the Santorini eruption, caused the collapse of Late Minoan IA/IB culture. The argument itself is not new but the careful study of the processes that took place after the eruption is unique. The authors argue that the natural disaster of Santorini caused major problems in food production and distribution which undermined the status of the ruling elites, leading to a process of decentralisation. The picture they present is that fragmentation of Crete into many small centres led, as in the Hellenistic period, to internal Cretan conflict and a massive wave of fire destructions in Late Minoan IB. The Mycenaean arrival on the island during the 'crisis years' of LMIB-II restored order and by LMII a new Knossian elite seems to have taken control. The controversial arguments are backed up with closely-argued detail.

Aegean Prehistory Tracey Cullen 2001 Aegean prehistory has developed over the 20th century into a distinctive and vibrant area of archaeological research. The past few decades, in particular, have seen a dramatic reorientation and expansion of goals and methods as well as a flood of new fieldwork in the Aegean. Keeping abreast of these new developments has become a daunting task. *Aegean Prehistory: A Review* contains detailed syntheses of research, originally published in the *American Journal of Archaeology* and newly updated here. The volume conveys the diversity and richness of current approaches to the discipline of Aegean prehistory whilst also marshalling an enormous amount of information pertaining to field projects, museum studies, analyses of materials and texts, and supporting theories of interpretation. An introduction by Tracey Cullen places the review articles in historical perspective, tracing the evolution of Aegean prehistory from the 19th century to the present. The author also considers the current status of the discipline--its relationships with classical archaeology and anthropology, and the manner in which it is shaped by various sociopolitical forces. *Aegean Prehistory: A Review* is a powerful research tool for the exploration of Aegean themes. With its expansive and detailed coverage, the book constitutes essential reading for professionals and students of Aegean prehistory. It will also be of great interest to all who wish to learn more about intellectual trends and current discoveries in this part of the Mediterranean. Perhaps most important, *Aegean Prehistory: A Review* provides a solid foundation upon which Aegean archaeology can build as it continues to thrive in the coming years.

Mysteries Of The Snake Goddess Kenneth Lapatin 2003-12-25 Not only is one of the most famous pieces of ancient Greek art-the celebrated gold and ivory statuette of the Snake Goddess-almost certainly modern, but Minoan civilization as it has been popularly imagined is largely an

invention of the early twentieth century. This is Kenneth Lapatin's startling conclusion in *Mysteries of the Snake Goddess*-a brilliant investigation into the true origins of the celebrated Bronze Age artifact, and into the fascinating world of archaeologists, adventurers, and artisans that converged in Crete at the turn of the twentieth century. Including characters from Sir Arthur Evans, legendary excavator of the Palace of Minos at Knossos, who was driven to discover a sophisticated early European civilization to rival that of the Orient, to his principal restorer Swiss painter Emil Gillieron, who out of handfuls of fragments fashioned a picture of Minoan life that conformed to contemporary taste, this is a riveting tale of archeological discovery.

Women in Love Illustrated D. H. Lawrence 2021-01-19 Widely regarded as D. H. Lawrence's greatest novel, *Women in Love* is both a lucid account of English society before the First World War, and a brilliant evocation of the inexorable power of human desire. *Women in Love* continues where *The Rainbow* left off, with the third generation of Brangwens: Ursula Brangwen, now a teacher at Beldover, a mining town in the Midlands, and her sister Gudrun, who has returned from art school in London. The focus of the novel is primarily on their relationships, Ursula's with Rupert Birkin, a school inspector, and Gudrun's with industrialist Gerald Crich, and later with a sculptor, Loerke.

Quintessentially modernist, *Women in Love* is one of Lawrence's most extraordinary, innovative and unsettling works

The Absolute Chronology of the Aegean Early Bronze Age Sturt W. Manning 1995 "Sturt Manning's *The Absolute Chronology of the Aegean Early Bronze Age* seeks to establish a precise and accurate absolute (i.e. calendar) chronological framework for the southern Aegean region during the Early Bronze Age, and summarizes the complex archaeological evidence for the period and its external relations." "For the first time, sophisticated statistical studies of the available radiocarbon and thermoluminescence dates from the Aegean and related

areas are presented in detail, and illustrated by the extensive use of graphics." "This important volume will be useful for anyone studying Aegean and East Mediterranean chronology for its own sake, and for archaeologists and prehistorians working in these areas who wish to use a diachronic framework in categorizing relation, culture-historical, or other studies."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Of Chains and Shadows Lauren Duell 2021-09-22 Yulsan soldiers invaded her kingdom, killed her people, and took any who survived as slaves. For eleven years Reina has been enslaved within Den Zei, an encampment that shatters the spirits of those who are within. Yet Reina refuses to be broken, and risks revealing a secret that could cost her life- or set her free. Malyssandra has lived within the Yulsan palace as a maid since the fall of her kingdom. When she overhears the king's plan to trade slaves for an army overseas, she is thrust into a world she never could have imagined. As these women are thrown together, their lives are changed forever. For a shadowed creature has been appearing to both of them, and they need to figure out what it wants- before it's too late.

What Is Man? Annotated Mark Twain 2021-07-06 "What Is Man?" is a short story by American writer Mark Twain, published in 1906. It is a dialogue between a Young Man and an Old Man regarding the nature of man. ... The work appears to be a genuine and earnest debate of his opinions about human nature, rather than satirical.

The Path of the Pole Charles H. Hapgood 1999 Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference

other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.

The Waves by Virginia Woolf:(Annotated Edition) Virginia Woolf 2021-05-17 "The Waves is an astonishingly beautiful and poetic novel and is often regarded as Virginia Woolf's masterpiece.The Waves conveys the full complexity and richness of human experience. Tracing the lives of a group of friends, The Waves follows their development from childhood to youth and middle age. While social events, individual achievements and disappointments form its narrative, the novel is most remarkable for the rich poetic language that expresses the inner life of its characters: their aspirations, their triumphs and regrets, their awareness of unity and isolation. Separately and together, they query the relationship of past to present, and the meaning of life itself.In a 2015 poll conducted by BBC, The Waves was voted the 16th greatest British novel ever written."

Ethnologia Europaea 45:2 Regina Bendix 2016-10-15 In everyday life, emotions like rage, anger or frustration are not, generally, condoned. Indeed, a good part of the work of enculturation is devoted to managing social conduct so as to avoid or suppress emotions considered negative or unproductive. In the ethnographic literature, scrutiny of these kinds of emotional states and their expression is rare, not least because they reside somewhere between the individual and his or her cultural surrounds and are hard to pinpoint. The authors of the present issue "Rage, Anger and other Don ts: Cultural Expression and Suppression of the Undesirable and Unbearable in Everyday Life" invite readers to explore practices and discourses within which these kinds of emotions or, more prominently, their disciplining can be grasped ethnologically. Alongside four scholarly articles, four essays encircle the theme in a more literary vein, albeit grounded in careful observation and recollection. The introduction and two final comments seek to frame topics ranging from road rage and the controlling of prisoners anger to a menopausal kitchen outburst, and to point the way toward further possible research in this largely unexplored realm of culturally shaped practice. "

Object-oriented Databases John G. Hughes 1991 The principles of the semantic data modelling are described here in depth and this is followed by a description of the application of object-oriented techniques in this area. Separate chapters are devoted to implementational issues, such as persistence and concurrency.

Low-Temperature Geochemistry Tu Guangzhi 1996-12 Low-temperature geochemistry -- a 'hot topic' in geochemistry at present -- deals with geological and chemical processes and the geochemical evolution of elements in nature below 200C, including the geochemical behaviour of elements in the processes of their extraction, remobilization, transport and mineralization at room temperature and below 0C. This book focuses on the low-temperature geochemical behaviour of precious metals, REE, some individual dispersed elements and some non-metallic elements and their minergeneses at low-temperatures. The book deals with the following topics: 1) geochemistry of selected low-temperature deposits or prospects (horizons); 2) geochemistry of elements during diagenesis, buried metamorphism and low-grade metamorphism; 3) remobilization, transport and precipitation of some ore-forming elements under low-temperature conditions; 4) water/rock interactions in low-temperature open systems

Minoan and Mycenaean Art Reynold Alleyne Higgins 1997 The magnificent works of ancient Crete, Mycenae, and the Cycladic Islands are awe-inspiring in their richness and variety. Frescoes, jewelry, sculpture, gold funeral masks, ivories, and countless other beautiful artifacts--all the significant works of art and architecture that are our legacy from those great civilizations in the third and second millennia BC are described and illustrated in Dr. Higgins's distinguished survey. This fully revised and updated edition includes greater coverage of the breathtaking frescoes from Akrotiri on the island of Thera. Other recent findings are also illustrated and described in detail, such as the unique ivory figure from Palaikastro, objects from the palace of Mallia, and the intriguing discovery of Minoan frescoes in Egypt.

Roman Frontier Studies Valerie A. Maxfield 2003 Roman Frontier Studies presents one hundred of the papers given at the Fifteenth International Congress of Roman Frontier Studies. First published in 1991, it has been out of print since 1995. This new edition is published to satisfy continuing demand for the volume. Geographically the material ranges throughout the frontier regions of the Roman Empire from Britain to the Caucasus, the Low Countries to Upper Egypt, Spain to Jordan. The first section deals with individual frontier regions, fort and fortress sites, army units and related military matters and includes overall surveys of significant work carried out in Britain and Germany in the 1980s. The

second section explores three more general themes: the relations between "Romans" and "natives" on the peripheral areas of the Empire, the realities of life in a frontier region, and the problems peculiar to desert frontiers.

The Hashish Eater Fitz Hugh Ludlow 2022-11-09T23:34:42Z When Fitz Hugh Ludlow was in college, he found a jar of cannabis extract at his pharmacy, deduced that this was the fabled "hashish" described in *The Arabian Nights* and *The Count of Monte Cristo*, and gave in to his curiosity by swallowing a spoonful. His life would never be the same. *The Hashish Eater* attempts to describe the bizarre distortions of perspective and imagination that Ludlow experienced on extraordinarily large doses of cannabis. Because cannabis was mostly unknown in the English-speaking world at that time, he didn't have the vocabulary to describe his "trips," and he couldn't expect his readers to have had similar experiences to compare. Because of this, he tests the limits of metaphor and creative description; and because of that, his work remains an important document to both understanding and poetically revealing the phenomenology of cannabis intoxication. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Humbitious Amer Kaissi 2022-01-10 Fortune favors the humble Arrogant. Charismatic. Narcissistic If you were to name traits that define strong leaders, these are some of the words that likely spring to mind. Conventional thinking would have us believe that it's those filled with hubris and free of self-doubt that make the best leaders. The evidence, however, tells quite a different story. In *Humbitious*, professional speaker, executive coach and distinguished Trinity University professor Amer Kaissi shatters the common myths about leadership being an ego-driven game. Drawing on extensive research, personal stories, and fascinating historical examples of leadership done right (and wrong), Kaissi reveals why the most effective, high-performing leaders aren't those with the biggest egos, but who possess humility, coupled with ambition and drive. Tracing triumphs (and missteps) of leaders from Napoleon Bonaparte to New Zealand Prime Minister Jacinda Ardern, Apple co-founder Steve Jobs to disgraced Theranos founder Elizabeth

Holmes, soccer star Alex Morgan to Costco CEO Jim Sinegal, and others, Kaissi illuminates what true humility is-and what it isn't-and how to cultivate it within yourself and with others. As you gain insight into this critical leadership trait, you'll come to understand that humility requires ambition, courage, and fierce determination. Humility, you'll learn, isn't about false modesty; it's about being honest with yourself, and others, about your abilities and potential, so you can make a realistic plan for improvement. The unequivocal truth is that the successful narcissists that you either know or are working for right now are the exception to the rule. The highest performers are those who adopt and integrate humility into their relationships with others, with their organizations, and with themselves. Because fortune favors not simply the bold-but the humbitious.
