Legislators, Judges, and Professors Jürgen Basedow 2016 As lawyers we are normally interested in various substantive areas of law; and as comparative lawyers we are interested in finding out about the differences and similarities between national legal systems. But from time to time we should also reflect on how we think and operate, and look at basic questions of legal methodology -- both for the sake of understanding better what we do as lawyers immersed in our own legal systems and as lawyers attempting to assess and comprehend how foreign legal systems work. The nine essays in this volume are devoted to the topics of law-making today (with a focus on Japan, Turkey and Russia), judicial decision-making today (with a focus on England and Wales, Switzerland and Argentina), and legal scholarship today (with a focus on the United States, France and South Africa); and they thus revolve around the three protagonists of legal development: legislators, judges and professors. With contributions by: Aditi Bagchi, Basak Baysal, Jean-Sebastien Borghetti, Thomas Coendet, Matthew Dyson, Yuko Nishitani, Agustin Parise, Helen Scott, Andrey M. Shirvindt

The Transformation of the World Jürgen Osterhammel 2015-09-15 A panoramic global history of the nineteenth century A monumental history of the nineteenth century, *The Transformation of the World* offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the "long nineteenth century," taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more. This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, *The Transformation of the World* sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

Inventing the Public Sphere (2 Vols.) Leidulf Melve 2007-10-30 This book deals with public debate during the Investiture Contest (ca. 1040-1122). During this revolutionary struggle between the secular and the religious powers, polemical writers contributed to the arguably first 'public debate' in medieval Europe. A close reading of a selection of these polemics offers new views on the functioning of the medieval public sphere as well as how the public framework circumscribing the writers led to argumentative innovations. These include an increasing concern with interpretation and contextualisation, resulting in a more critical and probing intellectual community. Public debate during the Contest taught intellectuals how to argue in public and in that respect transferred a lasting legacy to the later Middle Ages and beyond.

Strategic Retail Management Joachim Zentes 2016-10-07 This book is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.

Comparative Corporate Governance Andreas M. Fleckner 2013-07-11 The business corporation is one of the greatest organizational inventions, but it creates risks both for shareholders and for third parties. To mitigate these risks, legislators, judges, and corporate lawyers have tried to learn from foreign experiences and adapt their regulatory regimes to them. In the last three decades, this approach has led to a stream of corporate and capital market law reforms unseen before. Corporate governance, the system by which companies are directed and controlled, is today a key topic for legislation, practice, and academia all over the world. Corporate scandals and financial crises have repeatedly highlighted the need to better understand the economic, social, political, and legal determinants of corporate governance in individual countries. Comparative Corporate Governance furthers this goal by bringing together current scholarship in law and economics with the expertise of local corporate governance specialists from twenty-three countries.

Stem Cells Muireann Quigley 2012 Fast-moving and ever-changing, stem cell science and research presents ongoing ethical and legal challenges in many countries. Each development and innovation throws up new challenges. This is the case even where new developments initially seem to solve old dilemmas. Sometimes it becomes evident that new science does not in fact solve old problems and, for that reason, the ethical issues remain. In recognition of this, this book presents innovative and creative analyses of a range of ethical and legal challenges raised by stem cell research and its potential and actual application. The editors of this collection have brought together experts from ethics and law to bring fresh perspectives on the use of and research on stem cells. The chapters in this collection range across a number of different issues in the debate on stem cells, from the ethical dilemmas of conducting stem cell research to those of the clinical application of stem cell technology. Each chapter gives an in-depth and comprehensive analysis of the ethical or legal issues at stake. The early chapters give engaging new expositions on the permissibility of using embryos in stem cell research, in particular challenging our views about how we view and OCOconstructOCO the embryo in debates regarding stem cells. Later chapters move on to actual and potential clinical uses of stem cells and present novel arguments about these.

Apostelgeschichte Als Kirchengeschichte Tobias Nicklas 2003 The remarkably complex textual traditions of the Acts of the Apostles reflect the theological developments and socio-cultural framework of early Christianity. The present volume contains studies of textual witnesses, textual traditions and translations of the Acts. They do not only focus on the traditions which occur in the manuscripts, or on the theological tendencies of the major ancient versions and their reception in the Early Church, but also consider the relevance of mostly neglected witnesses such as amulets and tablets, and the relationship between the ancient translators and Jewish exegetical traditions.

Fama Thelma Fenster 2018-08-06 In medieval Europe, the word fama denoted both talk (what was commonly said about a person or event) and an individual's ensuing reputation (one's fama). Although talk

by others was no doubt often feared, it was also valued and even cultivated as a vehicle for shaping one's status. People had to think about how to "manage" their fama, which played an essential role in the medieval culture of appearances. At the same time, however, institutions such as law courts and the church, alarmed by the power of talk, sought increasingly to regulate it. Christian moral discourse, literary and visual representation, juristic manuals, and court records reflected concern about talk. This book's authors consider how talk was created and entered into memory. They address such topics as fama's relation to secular law and the preoccupations of the church, its impact on women's lives, and its capacity to shape the concept of literary authorship.

The Oxford Handbook of European Legal History Heikki Pihlajamäki 2018-06-28 European law, including both civil law and common law, has gone through several major phases of expansion in the world. European legal history thus also is a history of legal transplants and cultural borrowings, which national legal histories as products of nineteenth-century historicism have until recently largely left unconsidered. The Handbook of European Legal History supplies its readers with an overview of the different phases of European legal history in the light of today's state-of-the-art research, by offering cutting-edge views on research questions currently emerging in international discussions. The Handbook takes a broad approach to its subject matter both nationally and systemically. Unlike traditional European legal histories, which tend to concentrate on "heartlands" of Europe (notably Italy and Germany), the Europe of the Handbook is more versatile and nuanced, taking into consideration the legal developments in Europe's geographical "fringes" such as Scandinavia and Eastern Europe. The Handbook covers all major time periods, from the ancient Greek law to the twenty-first century. Contributors include acknowledged leaders in the field as well as rising talents, representing a wide range of legal systems, methodologies, areas of expertise and research agendas.

Comparative Succession Law Kenneth G C Reid 2020-10-09 This third volume in a series on Comparative Succession Law concerns the entitlement of family members to override the provisions of a deceased person's will to obtain money or assets (or more money or assets) from the person's estate. Some countries, notably those in the civil law tradition (such as France or Germany), confer a pre-ordained share of the deceased's estate or of its value on certain members of the deceased's family, and especially on the deceased's children and spouse. Other countries, notably those in the common law tradition (such as England, Canada, or Australia), leave the matter to the discretion of the court, the amount awarded depending primarily on financial need. Whichever form it takes, mandatory family provision is both a protection against disinheritance and also, therefore, a restriction on testamentary freedom. The volume focuses on Europe and on countries influenced by the European experience. In addition to detailed treatment of the law in Austria, England and Wales, France, Germany, Hungary, Italy, the Netherlands, Norway, Poland, Scotland, and Spain, the book also has chapters on Australia and New Zealand, South Africa, the United States, Canada, the countries of Latin America, and the People's Republic of China. Some other countries are covered more briefly, and there is a separate chapter on Islamic law. The book opens with accounts of Roman law and of the law in medieval and early-modern Europe, and it concludes with a comparative assessment of the law as it is today in the countries and legal traditions surveyed in this volume.

Moral Thinking R. M. Hare 1981-12-17 In this work, the author has fashioned out of the logical and linguistic theses of his earlier books a full-scale but readily intelligible account of moral argument.

Scotland before the Industrial Revolution Ian D. Whyte 2014-05-12 This splendid portrait of medieval and early modern Scotland through to the Union and its aftermath has no current rival in chronological range, thematic scope and richness of detail. Ian Whyte pays due attention to the wide regional variations within Scotland itself and to the distinctive elements of her economy and society; but he also highlights the many parallels between the Scottish experience and that of her neighbours, especially England. The result sets the development of Scotland within its British context and beyond, in a book that will interest and delight far more than Scottish specialists alone.

"The Words of a Wise Man's Mouth are Gracious" (Qoh 10,12) Mauro Perani 2012-03-20 In this volume of collected papers, acknowledged authorities in Jewish Studies mark the milestones in the development of the Jewish religion from ancient times up to the present. They also take full account of the

interactions between Judaism and its ancient and Christian environment. The renowned Viennese scholar Günter Stemberger is honoured with this festschrift on the occasion of his 65th birthday.

Algorithmic Regulation Karen Yeung 2019-09-12 As the power and sophistication of of 'big data' and predictive analytics has continued to expand, so too has policy and public concern about the use of algorithms in contemporary life. This is hardly surprising given our increasing reliance on algorithms in daily life, touching policy sectors from healthcare, transport, finance, consumer retail, manufacturing education, and employment through to public service provision and the operation of the criminal justice system. This has prompted concerns about the need and importance of holding algorithmic power to account, yet it is far from clear that existing legal and other oversight mechanisms are up to the task. This collection of essays, edited by two leading regulatory governance scholars, offers a critical exploration of 'algorithmic regulation', understood both as a means for co-ordinating and regulating social action and decision-making, as well as the need for institutional mechanisms through which the power of algorithms and algorithmic systems might themselves be regulated. It offers a unique perspective that is likely to become a significant reference point for the ever-growing debates about the power of algorithms in daily life in the worlds of research, policy and practice. The range of contributors are drawn from a broad range of disciplinary perspectives including law, public administration, applied philosophy, data science and artificial intelligence. Taken together, they highlight the rise of algorithmic power, the potential benefits and risks associated with this power, the way in which Sheila Jasanoff's long-standing claim that 'technology is politics' has been thrown into sharp relief by the speed and scale at which algorithmic systems are proliferating, and the urgent need for wider public debate and engagement of their underlying values and value trade-offs, the way in which they affect individual and collective decision-making and action, and effective and legitimate mechanisms by and through which algorithmic power is held to account.

Family, Friends and Followers Gerd Althoff 2004-06-03 Political life in the middle ages was influenced heavily by the bonds people had to one another. Among these, the bonds of kinship, friendship and lordship were by far the most important. Ritual was also often used to create and strengthen these bonds, and conduct and behaviour within social groups was shaped by unwritten rules. People bound in these ways had a right to expect help and support from one another. Such bonds were both a fact and a necessity of life in the middle ages. Over time, however, these bonds and relationships changed, as did the rules and norms which governed them. The aim of this book is to document and describe the history of these crucial bonds, and the ways in which they shaped political life in Europe in the early and high middle ages.
