

Heroic Efforts The Emotional Culture Of Search And Rescue Volunteers

Home is where the School is Jennifer Lois 2013 Explores the experiences of homeschooling mothers Mothers who homeschool their children constantly face judgmental questions about their choices, and yet the homeschooling movement continues to grow with an estimated 1.5 million American children now schooled at home. These children are largely taught by stay-at-home mothers who find that they must tightly manage their daily schedules to avoid burnout and maximize their relationships with their children, and that they must sustain a desire to sacrifice their independent selves for many years in order to savor the experience of motherhood. Home Is Where the School Is is the first comprehensive look into the lives of homeschooling mothers. Drawing on rich data collected through eight years of fieldwork and dozens of in-depth interviews, Jennifer Lois examines the intense effects of the emotional and temporal demands that homeschooling places on mothers' lives, raising profound questions about the expectations of modern motherhood and the limits of parenting.

Ethnographic Engagements Sara Delamont 2021-05-25 In Ethnographic Engagements: Encounters with the Familiar and the Strange Delamont and Atkinson, each with over 40 years of experience as ethnographers, present strategies for designing, conducting and publishing research that contributes original insights. Ethnography is a core qualitative research method, widely used across the social sciences. However, producing good, interesting and thought-provoking ethnography is never easy. This book provides effective research strategies for combatting familiarity in the context of empirical fieldwork. The authors rehearse ways that challenge the ethnographer to avoid taken-for-granted ideas, and to make the familiar strange. The book covers the cycle of research from research questions to publication and leaving the field and brings together the central themes of their life's work in one clearly written volume. This book is aimed at researchers at postgraduate level and beyond, their supervisors and principal investigators, and at experienced investigators who want to improve their thinking. Any ethnographer will find ideas and proposals to help them reflect self-critically and creatively about their research practice.

Volunteers Marc A. Musick 2007-11-28 Who tends to volunteer and why? What causes attract certain types of volunteers? What motivates people to volunteer? How can volunteers be persuaded to continue their service? Making use of a broad range of survey information to offer a detailed portrait of the volunteer in America, Volunteers provides an important resource for everyone who works with volunteers or is interested in their role in contemporary society. Mark A. Musick and John Wilson address issues of volunteer motivation by focusing on individuals' subjective states, their available resources, and the influence of gender and race. In a section on social context, they reveal how volunteer work is influenced by family relationships and obligations through the impact of schools, churches, and communities. They consider cross-national differences in volunteering and historical trends, and close with consideration of the research on the organization of volunteer work and the consequences of volunteering for the volunteer. *Public Characters* James M. Jasper 2019-12-04 Heroes, villains, victims, and minions are more important than ever before in our politics and culture. In the era of television, Twitter, and Facebook, groups and individuals constantly battle over their reputations. One of the best ways to gain power is to persuade

others that you are competent, courageous, and benevolent, while your opponents are none of these. Thus, character work consists of more than simple claims of fact; societies build their solidarity and policies out of admiration for heroes but also outrage over villains. Recent political analysis has ignored the great characters of the past in favor of frames, heuristics, codes, and identities. In *Public Characters*, James M. Jasper, Michael P. Young, and Elke Zuern argue that character, reputation, and images matter in politics, and social life more generally, as they help mobilize people and their passions. First, they focus on the political construction of openly constructed and debated public characters to show how we can allocate praise and blame, identify social problems, cement identities and allegiances, develop policies, and articulate our moral intuitions through them. The authors demonstrate the nuances of characters and their interactions across a range of sources-including Shakespeare, *Game of Thrones*, Renaissance sculpture, modern comic books, Alexander the Great, and Bernie Madoff-all the while showing how public characters are used in political rhetoric. Finally, they complicate these characters by considering their transformations: when victims manage to become heroes and the way traditional moral characters have evolved over time to correspond with what different cultures admire, detest, or pity. This rich, detailed, and wide-ranging analysis of personal images and reputation marks a timely and crucial contribution for sociologists and political scientists concerned with the cultural dimensions of political life.

Unleashing Manhood in the Cage Christian A. Vaccaro 2015-11-11 *Unleashing Manhood in the Cage: Masculinity and Mixed Martial Arts* addresses the question “Why do mixed martial arts participants endure grueling workouts and suffer through injury, with little or no pay, just to compete?” The answer is because the participants enjoy a form of idolization from their supporters, each other, and culture more generally, which is linked to masculinity. In fact, MMA organizers, from the very beginning, purposefully created elements of the sport that are linked to dominant narratives about manhood. In this context, men don thin open-fingered gloves, lock themselves in a caged enclosure, and slug it out in a fight with few rules to see who comes out on top. This all occurs while “ring girls” in high-heels and skin-tight shirts and shorts stride around outside the cage holding signs and peddling t-shirts. The sum of these elements is the creation of a type of a publicly accessible and consumable form of masculinity. The sport of mixed martial arts is a rich and intriguing space where the construction of gender can be explored through a sociological and ethnographic lens.

Nature Shock Jon T. Coleman 2020-08-12 An award-winning environmental historian explores American history through wrenching, tragic, and sometimes humorous stories of getting lost The human species has a propensity for getting lost. The American people, inhabiting a mental landscape shaped by their attempts to plant roots and to break free, are no exception. In this engaging book, environmental historian Jon Coleman bypasses the trailblazers so often described in American history to follow instead the strays and drifters who went missing. From Hernando de Soto's failed quest for riches in the American southeast to the recent trend of getting lost as a therapeutic escape from modernity, this book details a unique history of location and movement as well as the confrontations that occur when our physical and mental conceptions of space become disjointed. Whether we get lost in the woods, the plains, or the digital grid, Coleman argues that getting lost allows us to see wilderness anew and connect with generations across five centuries to discover a surprising and edgy American identity.

Researching Crime and Justice Louise Westmarland 2013-03 This book provides an introduction to research and some of the methods in the field of crime and justice and related areas, including police, prisons and criminal justice policy making. Less a dry 'how to' book, it is concerned rather to provide a wide-ranging discussion that illustrates the kind of research that has been done in particular areas, the findings of previous studies, the pitfalls of 'real life' research (and some potential solutions) and the range of possible research methods and approaches – both qualitative and quantitative. It shows how appropriate methods are chosen for particular studies and explores the theoretical underpinnings of the studies, including how and why researchers use theory; the political and ethical issues; and the role of emotions such as fear and danger in researching the field of crime and criminal justice. Key features include: First hand interviews with leading 'hands on' academics Examples, excerpts and sources of original research Analysis of the theories, methods and outcomes of previous research Throughout the book there is an emphasis on the often troublesome (and often ignored) relationship between the topic of study, desired outcomes and

suitable methods, with a wide range of illustrative case studies. Here the approach is practical - pointing out the different approaches various studies have used and how their outcome is often determined by their choice of methods. The book also reflects on the philosophies of research and includes discussions about the way the choice of methods will be reflected in the findings and vice versa (which seems obvious but is often forgotten). *Researching Crime and Justice: Tales from the Field* will be an essential source of inspiration and ideas for criminology students and other researchers on crime and justice.

SAGE Biographical Research John Goodwin 2012-06-25 Biographical research may take a range of forms and may vary in its application and approach but has the unified and coherent aim to give 'voice' to individuals. Volume Two: *Biographical Interviews, Oral Histories and Life Narratives* focuses on the more established, interview-based, biographical research methods and considers the analytical strategies used for interview-based biographical research Volume Three: *Forms of Life Writing: Letters, Diaries and Auto/Biography* considers the value of 'data' contained within letters, diaries and auto/biography and illustrates how this data has been analyzed to reveal biographies and their social context. Volume Four: *Other Documents of Life: Photographs, Cyber Documents and Ephemera* focuses on the 'other' human documents and objects, like photographs, cyber-documents (emails, blogs, social networking sites, webpages) and other ephemera (such as official documents) that are used extensively in biographical research.

Exploring Humor in Child Welfare Casework Lisa N. Landram 2024-05-29 *Exploring Humor in Child Welfare Casework: Laugh to Get Through It or Cry Forever* explores how gallows humor is used among child welfare caseworkers and what the use of humor, and gallows humor, reveals about how employees experience stress and manage their emotions. Caseworkers utilize humor as a method to manage the dilemmas they face in their employment. Humor provides a way for employees to cope with stress and the negative emotions they experience due to these dilemmas. The questions answered within the book are: 1) How do Office of Children, Youth and Families employees (intake department and treatment department) experience humor and gallows humor, and what does that reveal about how they are managing stress and emotions related to their employment? 2) What are the negative and positive effects of the use of gallows humor among individuals, groups, and the organization? 3) Are there any similarities and/or differences in how the intake department and treatment department employees utilize gallows humor? The answers to these questions provide an overall picture of how humor is managed by the individual child welfare caseworker, among groups, and at the organizational level. The authors then provide recommendations for organizational leaders to fully harness the power of humor and minimize the negative components.

Emotional Labor in the 21st Century Alicia Grandey 2013-05-07 This book reviews, integrates, and synthesizes research on emotional labor and emotion regulation conducted over the past 30 years. The concept of emotional labor was first proposed by Dr. Arlie Russell Hochschild (1983), who defined it as "the management of feeling to create a publicly observable facial and bodily display" (p. 7) for a wage. A basic assumption of emotional labor theory is that many jobs (e.g., customer service, healthcare, team-based work, management) have interpersonal, and thus emotional, requirements and that well-being and effectiveness in these jobs is determined, in part, by a person's ability to meet these requirements. Since Hochschild's initial work, psychologists, sociologists, and management scholars have developed distinct theoretical approaches aimed at expanding and elaborating upon Hochschild's core ideas. Broadly speaking, emotional labor is the study of how emotion regulation of oneself and others influences social dynamics at work, which has implications for performance and well being in a wide range of occupations and organizational contexts. This book offers researchers and practitioners a review of emotional labor theory and research that integrates the various perspectives into a coherent framework, and proposes an agenda for future research on this increasingly relevant and important topic. The book is divided into 5 main sections, with the first section introducing and defining emotional labor as well as creating a framework for the rest of the book to follow. The second section consists of chapters describing emotional labor theory at different levels of analysis, including the event, person, dyad, and group. The third section illustrates the diversity of emotional labor in distinct occupational contexts: customer service (e.g. restaurant, retail), call centers, and caring work. The fourth section considers broader contextual influences – organizational-, societal-, and cultural-level factors – that modify how and when emotional labor is done. The final section presents a series of 'reflective essays' from eminent scholars in the area of emotion and emotion regulation, where they reflect upon the past, present and future of emotion regulation at work.

Heads above Water Alice Fothergill 2012-02-01 Heads above Water tells the stories of women and their families who survived the Grand Forks, North Dakota, flood of 1997, one of the worst natural disasters in U.S. history. This book describes the challenges women faced and explores the importance of class, race, gender, sexual orientation, and disability in their disaster recovery. The women found themselves face-to-face with social and familial upheaval, emotional and physical trauma, precarious economic and social status, and feelings of loss and violation. By exploring the experiences of these women, author Alice Fothergill contributes to broader sociological discussions about women's changing roles, the stigma of needing and receiving assistance, family relationships under stress, domestic violence, downward mobility, and the importance of "home" to one's identity and sense of self. Heads above Water offers poignant insight into women's everyday lives in an extraordinary time.

Handbook of Contemporary Sociological Theory Seth Abrutyn 2016-06-22 This Handbook provides the hidden common threads that tie sociological inquiry together and featuring eminent scholars, it separates itself from its predecessors in substance and organization. Rather than rehashing old debates or longingly gazing at the past, this book presents sociologists with new ways of conceptualizing the organization and presentation of sociological theory. At the heart of this Handbook's vision is the twin goals of making theory a viable enterprise by reconceptualizing how we teach theory and keeping theory closely tied to its empirical applications. Three strategies are offered: (1) Elucidating how classic issues like integration or interaction are interrogated today; (2) Presenting a coherent vision of the social levels of reality that theorists work on such as communities, groups, and the self as well as how the coherence of these levels speaks to the macro-micro link; and, (3) Theorizing the social world rather than celebrating theorists or theories; that is, one can look at how theory is used holistically to understand the constraints the social world places on our lived experience or the dynamics of social change. Hence, in the second decade of the 21st century, it has become clear that sociology is at a crossroads as the number of theorists and amount of theory available is increasingly unmanageable and unknowable by the vast majority of professionals and students. As such, this Handbook of Contemporary Sociological Theory presents the novice and the expert with the a roadmap for traversing this crossroad and building a more coherent, robust, and cumulative sociology.

Emotions in Late Modernity Roger Patulny 2019-01-31 This international collection discusses how the individualised, reflexive, late modern era has changed the way we experience and act on our emotions. Divided into four sections that include studies ranging across multiple continents and centuries, Emotions in Late Modernity does the following: Demonstrates an increased awareness and experience of emotional complexity in late modernity by challenging the legal emotional/rational divide; positive/negative concepts of emotional valence; sociological/ philosophical/psychological divisions around emotion, morality and

gender; and traditional understandings of love and loneliness. Reveals tension between collectivised and individualised-privatised emotions in investigating ‘emotional sharing’ and individualised responsibility for anger crimes in courtrooms; and the generation of emotional energy and achievement emotions in classrooms. Debates the increasing mediation of emotions by contrasting their historical mediation (through texts and bodies) with contemporary digital mediation of emotions in classroom teaching, collective mobilisations (e.g. riots) and film and documentary representations. Demonstrates reflexive micro and macro management of emotions, with examinations of the ‘politics of fear’ around asylum seeking and religious subjects, and collective commitment to climate change mitigation. The first collection to investigate the changing nature of emotional experience in contemporary times, *Emotions in Late Modernity* will appeal to students and researchers interested in fields such as sociology of emotions, cultural studies, political science and psychology. Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Understanding Risk-Taking Jens O. Zinn 2019-10-03 This book outlines and systematises findings from a growing body of research that examines the different rationales, dimensions and dynamics of risk-taking in current societies; providing insight into the different motivations and social roots of risk-taking to advance scholarly debates and improve social regulation. Conceptually, the book goes beyond common approaches which problematise socially undesirable risk-taking, or highlight the alluring character of risk-taking. Instead, it follows a broadly interpretivist approach and engages in examining motives, control, routinisation, reflexivity, skills, resources, the role of identity in risk-taking and how these are rooted in and framed by different social forces. Zinn draws on qualitative studies from different theoretical and conceptual backgrounds such as phenomenology, hermeneutics, pragmatism, feminism, class analysis, theory of practice and discourse analysis among others, to outline key distinctions and concepts central to the understanding of risk-taking. It will be a key resource for everyone who is concerned with the understanding and management of risk-taking in all kinds of social domains, such as immigration, youth, leisure sports, crime, health, finance, and social policy.

Heroic Efforts Jennifer Lois 2003-04-01 Winner of the 2006 Outstanding Recent Contribution Award from the American Sociological Association, Sociology of Emotions Section. Many search and rescue workers voluntarily interrupt their lives when they are called upon to help strangers. They awake in the middle of the night to cover miles of terrain in search of lost hikers or leave work to search potential avalanche zones for missing skiers, snowboarders, and snowmobilers in blizzard conditions. They often put their own lives in danger to rescue stranded, hypothermic kayakers and rafters from rivers. Drawing on six years of participant observation and in-depth interviews, Jennifer Lois examines the emotional subculture of “Peak,” a volunteer mountain-environment search and rescue team. Rescuers were not only confronted by physical dangers, but also by emotional challenges, including both keeping their own emotions in check during crisis situations, and managing the emotions of others, such as those they were rescuing. Lois examines how rescuers constructed meaning in their lives and defined themselves through their heroic work. *Heroic Efforts* serves as an easy to understand sociological introduction to the ways emotions develop and connect us to our surroundings, as well as to the links between the concept of heroism and other sociological theories such as those on gender stereotypes and edgework.

Mental Health, Social Mirror William R. Avison 2007-08-19 Sociologists often view research on mental health as peripheral to the real work of the discipline. This volume contains essays that reassert the importance of mental health research in sociology. Analyzing Social Settings John Lofland 2022-12-05 This book instructs the reader how to do a social science

fieldstudy—a research genre often labeled “ethnography,” “qualitative research,” and/or “naturalistic research.” While field researchers across the social sciences may prefer one label over another, their studies are generally alike in featuring direct, qualitative observation of natural situations or settings primarily using the techniques of participant observation and/or intensive interviewing. High-quality social science fieldstudies are contingent on the successful completion of the interconnected tasks of gathering, focusing, and analyzing data, as well as writing up the results. The fourth edition of this classic work is a must for social researchers. The authors make learning how to do qualitative observation and analysis clear and engaging. Their book provides an educational and entertaining road map for pursuing high quality fieldstudies in social science research.
