Autoimmune Diseases Munther A Khamashta 2011-05-26 Autoimmune Diseases: Acute and Complex Situations provides a detailed overview of conditions associated with autoimmune diseases that are considered either life-threatening or requiring complex management. These include abdominal pain, arthritis, cutaneous ulcers, gastrointestinal hemorrhage, epilepsy, pancreatitis, stroke and white-matter CNS lesions. Autoimmune Diseases: Acute and Complex Situations addresses the latest clinical and immunological prognostic factors that may help to identify patients at higher risk of developing potentially life-threatening involvement. This book comprehensively helps the reader to diagnose these patients, in whom an early therapeutic approach is essential. Autoimmune Diseases: Acute and Complex Situations is a valuable reference tool for rheumatologists, internists, immunologists, and all the specialists involved in the multidisciplinary care of patient with rheumatic and systemic autoimmune diseases.

Walt Whitman in Context Joanna Levin 2018-05-31 Walt Whitman is a poet of contexts. His poetic practice was one of observing, absorbing, and then reflecting the world around him. Walt Whitman in Context provides brief, provocative explorations of thirty-eight different contexts - geographic, literary, cultural, and political - through which to engage Whitman's life and work. Written by distinguished scholars of Whitman and nineteenth-century American literature and culture, this collection synthesizes scholarly and historical sources and brings together new readings and original research.

Childhood Cancer and Functional Impacts Across the Care Continuum National Academies of Sciences Engineering and Medicine 2021-09-09 Since the late 1960s, the survival rate in children and adolescents diagnosed with cancer has steadily improved, with a corresponding decline in the cancer-specific death rate. Although the improvements in survival are encouraging, they have come at the cost of acute, chronic, and late adverse effects precipitated by the toxicities associated with the individual or combined use of different types of treatment (e.g., surgery, radiation, chemotherapy). In some cases, the impairments resulting from cancer and its treatment are severe enough to qualify a child for U.S. Social Security Administration disability benefits. At the request of Social Security Administration, Childhood Cancer and Functional Impacts Across the Care Continuum provides current information and findings and conclusions regarding the diagnosis, treatment, and prognosis of selected childhood cancers, including different types of malignant solid tumors, and the effect of those cancers on children's (TM)s health and functional capacity, including the relative levels of functional

limitation typically associated with the cancers and their treatment. This report also provides a summary of selected treatments currently being studied in clinical trials and identifies any limitations on the availability of these treatments, such as whether treatments are available only in certain geographic areas.

Pediatric Psychosocial Oncology: Textbook for Multidisciplinary Care Annah N. Abrams 2015-11-16 This textbook walks clinicians through the psychosocial issues and challenges faced by children and adolescents with cancer and their families. Through a developmental lens, the text provides guidance and resources that will enable clinicians to understand the physical and emotional impact of the disease from diagnosis onwards, to work with families in distress, and to diagnose and treat a range of

behavioral, psychological, and psychiatric issues. The book also addresses the burgeoning fields of social media, complementary therapies, palliative care, and survivorship. Among the variety of useful resources supplied are assessment tools, websites, and additional reading materials. The psychosocial issues that arise for children and their families during the course of treatment are an important yet often overlooked aspect of pediatric oncology care. The reader will find that Pediatric Psychosocial Oncology: Textbook for Multidisciplinary Care covers these issues at the forefront of clinical care in a direct and approachable way, integrating research literature with practical clinical guidance.

Keep Your Head Down Nathan Mullins 2011 For a country that has only twice come under fire on its own soil, it is an odd fact that we have happily volunteered for armed service in other people's wars. Nathan Mullins, author of *How to Amputate a Leg*, was such a volunteer.

Medicine Across Cultures Helaine Selin 2003-05-31 This work deals with the medical knowledge and beliefs of cultures outside of the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal Australian, Indian, Egyptian, and Tibetan medicine, the book includes essays on comparing Chinese and western medicine and religion and medicine. Each essay is well illustrated and contains an extensive bibliography.

Songwriter and comedy writer extraordinaire Alan Katz has turned those and other old favorites on their ears and created new nonsense songs kids will love. With zany, spirited pictures by illustrator and cartoonist David Catrow, this kooky collection guarantees laughs and plenty of silly dilliness for kids everywhere!

Controversies in Surgery Moshe Schein 2001-05-08 "When a thing ceases to be a subject of controversy, it ceases to be a subject of interest. " WILLIAM HAZLITT (1778-1830) This is the fourth volume in a series which we started in 1997. In 1976, Varco and Delaney edited a

"surgical bestseller" entitled *Controversy in Surgery*. This was followed by a second volume in 1985. The immense success of these books among both surgical trainees and experienced surgeons, and their wide international appeal, supported the editors' notion that a view of controversy is integral to teaching. However, despite major advances in surgical science and practice, no other similar publication has since been put together with the objective of addressing major controversies in surgery. The aim of this series is to address such deficiency by covering the most crucial current controversies in general, vascular and trauma surgery. Since almost everything is controversial in surgery, we will be able to tackle different issues almost each year. The editors have selected a nationally/internationally recognized authority for each topic. Most books available today are either "North American:" "British-Commonwealth" or "British-European:" contributing to the constant transatlantic rivalry. Our series specifically aims to bridge this "culture gap" and includes North American, British, European, and other authors while maintaining a cohesive structure. This will hopefully also broaden the appeal of such a book across both sides of the Atlantic and beyond.

Trauma Induced Coagulopathy Hunter B. Moore 2020-10-12 The first edition of this publication was aimed at defining the current concepts of trauma induced coagulopathy by critically analyzing the most up-to-date studies from a clinical and basic science perspective. It served as a reference source for any clinician interested in reviewing the pathophysiology, diagnosis, and management of the coagulopathic trauma patient, and the data that supports it. By meticulously describing the methodology of most traditional as well as state of the art coagulation assays the reader is provided with a full understanding of the tests that are used to study trauma induced coagulopathy. With the growing interest in understanding and managing coagulation in trauma, this second edition has been expanded to 46 chapters from its original 35 to incorporate the massive global efforts in understanding, diagnosing, and treating trauma induced coagulopathy. The evolving use of blood products as well as recently introduced hemostatic medications is reviewed in detail.

The text provides therapeutic strategies to treat specific coagulation abnormalities following severe injury, which goes beyond the first edition that largely was based on describing the mechanisms causing coagulation abnormalities. *Trauma Induced Coagulopathy 2nd Edition* is a valuable reference to clinicians that are faced with specific clinical challenges when managing coagulopathy.

Chronic Diseases and Health Care Stephen J. Morewitz 2006-05 This straightforward volume examines today's health care picture in human and financial terms, focusing on the three leading causes of death in America: cardiovascular disease/stroke, diabetes, and cancer and four debilitating conditions that confound both patients and professionals: arthritis, osteoporosis, fibromyalgia, and low back pain. Morewitz applies current figures and expert future projections to the often-vague concepts of chronically ill patients and associated spiraling costs of care. Composite case studies put a needed human face on these growing populations and their needs. The book's consistent format and the author's lucid style make it as accessible as it is clinically useful. Up-to-date, real-world coverage for each disease includes: risk factors, including socioeconomic status, race/ethnicity, gender, and age, typical disease processes and psychosocial symptoms, treatment options and rehabilitation outcomes, stress, quality of life issues, and coping strategies, the impact of health care disparities on illness and disability, patient education and self-management techniques. This book also describes the realities of diseases and their treatment with great clarity and insight, to give practitioners better understanding of patient populations and researchers access to critical health areas. In addition, the book is imperative reading for health care administrators involved in resource allocation, program planning, and cost reduction.

After War Zoë H. Wool 2015-11-27 In *After War* Zoë H. Wool explores how the American soldiers most severely injured in the Iraq and Afghanistan wars struggle to build some kind of ordinary life while recovering at Walter Reed Army Medical Center from grievous injuries like lost limbs and traumatic brain injury. Between 2007 and 2008, Wool spent time with many of these mostly male soldiers and their families and loved ones in an effort to understand what it's like to be blown up and then pulled toward an ideal and ordinary civilian life in a place where the possibilities of such a life are called into question. Contextualizing these soldiers within a broader political and moral framework, Wool considers the soldier body as a historically, politically, and morally laden national icon of normative masculinity. She shows how injury, disability, and the reality of soldiers' experiences and lives unsettle this icon and disrupt the all-too-common narrative of the heroic wounded veteran as the embodiment of patriotic self-sacrifice. For these soldiers, the uncanny ordinariness of seemingly extraordinary everyday circumstances and practices at Walter Reed create a reality that will never be normal.

The IBM Poster Program Robert Finkel 2021

In the late 1960s, IBM was one of the world's pre-eminent corporations, employing over 250,000 people in 100 countries and producing some of the most advanced products on earth. IBM President Thomas J. Watson Jnr. sought to elevate the company's image by hiring world-renowned design consultants, including Eliot Noyes and Paul Rand. As well as developing the iconic IBM logo and a corporate design guide, Rand also brought together a remarkable team of internal staff designers. One of the designers he hand-picked was Ken White, who, along with John Anderson and Tom Bluhm, headed up the design team at the IBM Design Center in Boulder, Colorado. Together, they initiated a poster program as a platform for elevating internal communications and initiatives within the company. These posters were displayed in hallways, conferences rooms, and cafeterias throughout IBM campuses, with subject matter including everything from encouraging equal opportunity policies, to reminders on best security practices, to promoting a family fun day. Designers often incorporated figurative typography, dry humor, visual puns, and photography to craft memorable and compelling messages.
