Forfeiting Our Property

Rights Henry J. Hyde
1995-03-01 Most people don't know it, but the government can take people's homes, cars, and money without charging them with a crime -- and the burden of recovery is on the owners! In *Forfeiting Our Property Rights*, Congressman Henry Hyde of Illinois examines the abuse inherent in civil forfeiture, the law that lets government take property that is merely suspected of having "facilitated" crime. Hyde shows how forfeiture law has cost innocent people their property and at least one citizen, Donald Scott, his life. In fact, over a quarter of a million Americans have had their property seized through forfeiture law. Congressman Hyde proposes

an overhaul of the law to protect innocent property owners, including a shift in the burden of proof from citizen to the government and a raising of the standard the government must satisfy to seize property in the first place. This alarm on behalf of our threatened civil liberties and rights couldn't be more timely.

Marine Physiology Down East: The Story of the Mt. Desert Island Biological Laboratory
David H. Evans 2015-08-13

This volume offers a comprehensive history of the Mount Desert Island Biological Laboratory (MDIBL), one of the major marine laboratories in the United States and a leader in using marine organisms to study fundamental physiological concepts. Beginning with its founding as the Harpswell Laboratory of Tufts University in 1898, David

H. Evans follows its evolution from a teaching facility to a research center for distinguished renal and epithelial physiologists. He also describes how it became the site of major advances in cytokinesis, regeneration, cardiac and vascular physiology, hepatic physiology, endocrinology and toxicology, as well as studies of the comparative physiology of marine organisms.

Fundamental physiological concepts in the context of the discoveries made at the MDIBL are explained and the social and administrative history of this renowned facility is described.

Trust in the Law Tom R. Tyler 2002-10-10 Public opinion polls suggest that American's trust in the police and courts is declining. The same polls also reveal a disturbing racial divide, with minorities expressing greater levels of distrust than whites. Practices such as racial profiling, zero-tolerance and three-strikes laws, the use of excessive force, and harsh punishments for minor drug crimes all contribute to perceptions of injustice. In Trust in the Law, psychologists Tom R. Tyler and Yuen J. Huo present a compelling argument that effective law enforcement requires the active engagement and participation of the communities it serves, and argue for a cooperative approach to law enforcement that appeals to people's sense of fair play, even if the outcomes are not always those with which they agree. Based on a wide-ranging survey of citizens who had recent contact with the police or courts in Oakland and Los Angeles,

Trust in the Law examines the sources of people's favorable and unfavorable reactions to their encounters with legal authorities. Tyler and Huo address the issue from a variety of angles: the psychology of decision acceptance, the importance of individual personal experiences, and the role of ethnic group identification. They find that people react primarily to whether or not they are treated with dignity and respect, and the degree to which they feel they have been treated fairly helps to shape their acceptance of the legal process. Their findings show significantly less willingness on the part of minority group members who feel they have been treated unfairly to trust the motives to subsequent legal decisions of law enforcement authorities. Since most people in the study generalize from their personal experiences with individual police officers and judges, Tyler and Huo suggest that gaining maximum cooperation and consent of the public depends upon fair and

transparent decision-making and treatment on the part of law enforcement officers. Tyler and Huo conclude that the best way to encourage compliance with the law is for legal authorities to implement programs that foster a sense of personal involvement and responsibility. For example, community policing programs, in which the local population is actively engaged in monitoring its own neighborhood, have been shown to be an effective tool in improving police-community relationships. Cooperation between legal authorities and community members is a much discussed but often elusive goal. Trust in the Law shows that legal authorities can behave in ways that encourage the voluntary acceptance of their directives, while also building trust and confidence in the overall legitimacy of the police and courts. Martínez 2021-06-23 Nothing defined the 20th century more than the evolution of the car industry. The 2020 decade will see the automotive industry leap forward beyond simply moving people geographically toward a new purpose: to become a services industry. This book takes readers on a journey where cars will evolve towards becoming "computers on wheels." The automotive industry is one of the sectors most profoundly changed by digitalization and the 21st century energy needs. You'll explore the shifting paradigms and how cars today represent a new interpretation of what driving should be and what cars should offer. This book presents exciting case studies on how artificial intelligence (AI) and data analytics are used to design future cars, predict car efficiency, ensure safety and simulate engineering dynamics for its design, as well as a new arena for IoT and human data. It opens a window into the origins of cars becoming software-run machines, first to run internal

diagnostics, and then to become machines connected to other external machines via Bluetooth, to finally the Internet via 5G. From transportation to solving people's problems, The Future of the Automotive Industry is less about the technology itself, but more about the outcomes of technology in the future, and the transformative power it has over a much beloved item: cars. What You'll Learn Explore smart cities and their evolution when it comes to traffic and vehicles Gain a new perspective on the future of cars and transportation based on how digital technologies will transform vehicles Examine how AI and IoT will create new contexts of interactions with drivers and passengers alike Review concepts such as personalizing the driving experience and how this will take form See how self-driving cars impact data mining of personal data Who This Book Is For Anyone with an interest in digital advancements in the automotive industry beyond the connected car.

Rant Chuck Palahniuk
2011-05-31 Rant is the oral history of one Buster 'Rant' Casey, in which an assortment of friends, enemies, detractors, lovers and relations have their say on the man who may or may not be the most efficient serial killer of our time. Rant is a darkly glittering anti-hero whose recreational drug of choice is rabies, and whose own personal Viagra is the venom of a black widow spider. He soon leaves his half-feral hometown for the big city, where he becomes the leader of an urban demolition derby called Party Crashing. On designated nights, the Party Crashers chase each other in

cars in the hope of a collision, and all the while Rant, the 'superspreader', transmits his lethal disease...

Mini Down Under Donn Anderson 2009-03-02 Mini Down Under traces the history of one of New Zealand's - and the world's - best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of competition success in the Antipodes, the local assembly and marketing of the classic original car and the eventual development into the latest generation Mini for a new century.

Mining and Selling Radium and Uranium Roger F. Robison 2014-12-01 Presented here is the story of the mining and sale of uranium and radium ore through biographical vignettes,

chemistry, physics, geology, geography, occupational health, medical utilization, environmental safety and industrial history. Included are the people and places involved over the course of over 90 years of interconnected mining and sale of radium and uranium, finally ending in 1991 with the abandonment of radium paint and medical devices, Soviet nuclear parity, and the Radiation Exposure Compensation Act.

Automotive Mechatronics: Operational and Practical Issues

B. T. Fijalkowski 2011-03-14 This book presents operational and practical issues of automotive mechatronics with special emphasis on the heterogeneous automotive vehicle systems approach, and is intended as a graduate text as well as a reference for scientists and engineers involved in the design of automotive mechatronic control systems. As the complexity of automotive vehicles increases, so does the dearth of high competence, multi-disciplined

automotive scientists and engineers. This book provides a discussion into the type of mechatronic control systems found in modern vehicles and the skills required by automotive scientists and engineers working in this environment. Divided into two volumes and five parts, Automotive Mechatronics aims at improving automotive mechatronics education and emphasises the training of students' experimental hands-on abilities, stimulating and promoting experience among high education institutes and produce more automotive mechatronics and automation engineers. The main subject that are treated are: VOLUME I: RBW or XBW unibody or chassis-motion mechatronic control hypersystems; DBW AWD propulsion mechatronic control systems; BBW AWA dispulsion mechatronic control systems; VOLUME II: SBW AWS conversion mechatronic control systems; ABW AWA suspension mechatronic control systems. This volume was developed for

undergraduate and postgraduate students as well as for professionals involved in all disciplines related to the design or research and development of automotive vehicle dynamics, powertrains, brakes, steering, and shock absorbers (dampers). Basic knowledge of college mathematics, college physics, and knowledge of the functionality of automotive vehicle basic propulsion, dispulsion, conversion and suspension systems is required. *The Maruti Story* R.C. Bhargava 2010-02-02 An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. Prahalad The targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and

service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation.

However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and

entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.

[Flatheads and Spoonies](#) Jens Lund 2021-10-21 Since the early 1800s, people have made a living fishing and harvesting mussels in the lower Ohio Valley. These river folk are conscious of an occupational and social identity separate from those who earn their living from the land. Sustained by a shared love of the river, deriving joy from the beauty of their chosen environment, and feeling great pride in their ability to subsist on its wild resources and to master the skills required to make a living from it, many still identify with the nomadic houseboat-dwelling subculture that flourished on the river from the early nineteenth century to the 1950s. Today's community of

fisherfolk is small and economically marginal, but their activities sustain a complex set of traditional skills and a body of verbal folklore associated with river life. In *Flatheads and Spoonies*, Jens Lund describes the activities, boats, gear, verbal lore, and sense of identity of the fisher folk of the lower Ohio River Valley and provides historical and ethnobiological background for their way of life. Lund connects the importance of river fish in the diet of inhabitants of the valley to local fishing activities and explores the relationship between river people and those whose culture is primarily land-based, painting a colorful portrait of river fishing and river life. This book offers a look—historical and ethnographic—at a little-known aspect of traditional life in the American Midwest, still surviving today despite immense changes in environment, resources, and economic base.

Me and the Mother Tree

Harriett E. Weaver 2016-10-15

Petey Weaver is considered the first woman park ranger in California State Parks. In *Me and the Mother Tree*, she recounts in vivid prose her 20 years working in at the very beginning of the California State Park System. She brings to life not only the early parks, but many of the rangers and staff who operated, protected, served and educated the public. Petey served in four parks, Big Basin, Richardson Grove, Pfeiffer Big Sur and Seacliff State Beach, during her park career which spanned from 1929 to 1950.
