The European Union and the Developing

Countries Olufemi Babarinde 2005-02-01 The relationships between the European Union and developing countries in Africa, the Caribbean and the Pacific (or ACP countries) have been called a model for North South development cooperation. The Lomé Conventions were the embodiment of this model. After 25 years, the European Union and the ACP group signed a new partnership agreement, the Cotonou Agreement. Given the disappointing results of the former conventions, this book investigates the innovations in the EU-ACP relationship. Authors from different backgrounds (including law, political science and economics) analyze the forces that gave rise to the new agreement as well as the negotiating process of the new agreement, and the negotiations that are taking place to produce the planned Economic Partnership Agreements (EPA) that are to replace the existing non-reciprocal trade preferences that are incompatible with WTO law. The potential benefits of EPAs are discussed, as is the alternative in the shape of an improved and general preferential system. The amended mechanism for aid delivery, the increased stress on political dialogue between the partners and the introduction of more civil society participation in the cooperation are extensively analyzed and discussed. The effects of the introduction of the Euro and the effect of the planned stimuli on Direct Foreign Investment in ACP economies make this volume very complete in coverage of the ACP-EU relations. Its relevance extends far beyond the ACP-EU relationship as it shows and discusses particular solutions for problems that occur in North South relations in general.

International Handbook on the Economics of Integration Miroslav N. Jovanović

2011-01-31 'International Handbook of

Economic Integration edited by Miroslav

Jovanovi provides timely and rich academic

contributions to considerations of the widest

array of integration-related issues. European integration has been providing an inspiration to

a number of academics and researchers. The

Handbook is a recognition of the dynamic and

strong solidarity of the European integration. At

the same time, the European Union often

provided an example for integration schemes

throughout the world which spread enormously

since the mid-1990s. Leading experts from all

continents contributed to this Handbook which

will be a valuable input into academic and

policy-making discussions and actions.'- José

Manuel Barroso, President of the European

Commission'Miroslav Jovanovi 's publication

represents a rich contribution to the complex

issue of regional integration, its benefits, its

shortcomings, and its relationship with

multilateral trade opening. It sheds light over an

issue which is the subject of intense discussions

in trade circles.'- Pascal Lamy, Director-General

of the WTO'Much has been written on trade

agreements as a mechanism to integrate the

markets of two of more countries - often

inspired by the European example. In recent

years, attention has increasingly focused on the

importance of economic geography as a

determinant of industrial location. This book

combines the two strands of analysis, bringing

together leading experts in the fields of

economic geography and international trade. The result is an outstanding compilation of papers that illuminate how policies and economic forces affect the location of economic activity in an integrated Europe.'- Bernard Hoekman, Director, The World Bank, US 'The open multilateral trading system is a tremendous success of the past half century, and has contributed greatly to the world's unprecedented rate of economic growth. Over the past two decades however, preferential trading arrangements have proliferated, raising questions as to how compatible they are with the open multilateral system, and what policies might be adopted to improve outcomes. The essays in this volume detail the emergence of PTAS and provide comprehensive and up-to-date analyses of the state of play of preferential arrangements in all regions of the world. The volume will provide a useful reference for all those wanting to understand existing preferential arrangements and their role in the international economy today.'- Anne O. Krueger, Johns Hopkins University and Stanford University, US 'Economic integration is a complex and multifaceted giant, with a myriad aspects ranging from regional and global concentration and dispersal of economic activity to social and political consequences for individuals and communities in developed and developing countries alike. This landmark, three volume collection of chapters by leading authors, drawn from many fields, is a worthy and timely contribution to the analysis of a phenomenon with profound implications for the future world economy - and its governance.'- James Zhan, Director, Investment & Enterprise Division, UNCTAD With this Handbook, Miroslav Jovanovi has provided readers with both an excellent stand-alone original reference book as well as an integral part of a comprehensive three-volume set. This introduction into a rich and expanding academic and practical world of international economic integration also provides a theoretical and analytical framework to the reader, presenting select analytical studies and encouraging further research. International Handbook on the Economics of Integration, Volume III covers three broad themes: factor mobility (transnational corporations and labour migration); agriculture and environment; and

quantitative studies of integration effects. A removal of barriers for the mobility of factors in certain integration arrangements among countries has an impact on the mobility of capital, firms and individuals within the group. Various aspects of this factor mobility are analysed in eight detailed chapters. The second theme of the Handbook is devoted to agriculture and environment. This is of great global relevance as the Common Agricultural Policy of the EU has been a bone of contention in international relations over several decades. Finally, seven quantitative studies of the effects of integration attempt to measure various potential benefits of regional integration efforts. Contributors to this major reference work include eminent authors, some of whom contributed to the creation of economic integration theory from the outset. The authors not only survey the literature, but also present their own arguments and new ideas in order to offer a new perspective, as well as discussing the issues they believe are essential in the field. Each of the insightful chapters is approachable not only to graduate students, scholars, researchers and policymakers, but also to advanced undergraduate students.

Decisions of the Arbitration Panel for In Rem Restitution Josef Aicher 2008-12-11 The series 'Decisions of the Arbitration Panel for In Rem Restitution', published in two languages, documents a fundamental element of Austria's most recent compensatory measures in dealing with the consequences of the National Socialist era. For property confiscated during the National Socialist era and now publicly owned, the possibility of restitution in rem, ie the actual return of the property was provided for in the Washington Settlement Agreement of 17 January 2001. The Arbitration Panel for In Rem Restitution, installed at the General Settlement

Fund in Vienna, decides on the applications for restitution. For the most part, the applications concern real estate that was confiscated between 1938 and 1945, was publicly owned on the Agreement deadline (17 January 2001) and in many cases had already been the subject of restitution proceedings after 1945. Since 2003, the Arbitration Panel has decided on a great number of applications, and has recommended the restitution of property to the legal successors of former owners in several cases. In the course of these decisions, the Arbitration Panel has developed a judicature, which exemplarily presents the consequences of National Socialism in Austria regarding the law of property. The decisions of the Arbitration Panel form a part of the current debate about property seizures during the National Socialist era and restitution practices after 1945. Volume 1 contains the decisions of the Arbitration Panel from 2003 and 2004, each in the German original and with the English translation.

European Foreign Policy Dieter Mahncke

2004 There is agreement in political and academic circles that the European Union needs a common foreign and security policy (CFSP). The question is how to move from recognised necessity to practical implementation: from rhetoric to reality. Many efforts have been made, and indeed the creation of a European foreign policy is 'work in progress'. Bringing together a multinational team of both young researchers and established academics, this volume offers a comprehensive analysis of this process, uniquely combining the examination of the foundations, institutions, procedures and obstacles of EU-level foreign policy with an extensive range of case studies exploring European policy 'on the ground' in key areas such as the Balkans, Africa or the Middle East. Of use and interest to students of European politics and the general reader alike, it breaks through the Euro-jargon to provide a clear, accessible and up-to-date account of this unprecedented system of international relations, with a particular focus placed on the questions of why EU member states participate in the CFSP and what impact it enables them to have in geopolitics.

Transnational Commercial Law Roy Goode
2012-03-29 Transnational commercial law represents the outcome of work undertaken to

harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

On the feasibility of multi-leader replication in the early tiers Jungnickel, Tim 2018-09-27 In traditional service architectures that follow the service statelessness principle, the state is primarily held in the data tier. Here, service operators utilize tailored storage solutions to guarantee the required availability; even though failures can occur at any time. This centralized approach to store and process an application's state in the data tier implies that outages of the entire tier cannot be tolerated. An alternative approach, which is in focus of this thesis, is to decentralize the processing of state information and to use more stateful components in the early tiers. The possibility to tolerate a temporary outage of an entire tier implies that the application's state can be manipulated by the remaining tiers without waiting for approval from the unavailable tier. This setup requires multi-leader replication, where every replica can accept writes and forwards the resulting changes to the other replicas. This thesis explores the feasibility of using multi-leader replication to store and process state in a decentralized manner across multiple tiers. To this end, two replication mechanisms, namely Conflict-free Replicated Data Types and Operational Transformation, are under particular investigation. We use and extend both mechanism to demonstrate that the aforementioned decentralization is worth considering when designing a service architecture. The challenges that arise when following our approach go back to fundamental impossibility results in distributed systems research, i.e. the impossibility to achieve a fault-tolerant consensus mechanism in asynchronous systems and the inevitable trade-off between availability and consistency in the presence of failures. With this thesis, we contribute to close the exposed gaps of both results by providing usable alternatives for standard IT services. We exemplify the feasibility of our alternatives with a fully distributed IMAP service and a

programming library that provides the necessary extension to utilize our approach in a variety of web-based applications. All contributions of this thesis are based on both theory and practice. In particular, all extensions to the existing multi-leader replication mechanisms were proven to satisfy the necessary properties. Moreover, those extensions were also implemented as prototypical applications and evaluated against the corresponding de facto standard software from the industry. Basierend auf dem "service statelessness principle" ist es üblich, Softwaredienste so zu entwerfen, dass der Zustand des Dienstes primär in einer gekapselten Datenschicht verarbeitet wird. Innerhalb der Datenschicht werden spezielle Lösungen verwendet, um die Verfügbarkeit der Daten sicherzustellen. Dieser zentralisierte Ansatz hat zur Folge, dass ein Ausfall oder eine temporäre Nichtverfügbarkeit der gesamten Datenschicht zwangsweise zur Nichtverfügbarkeit des gesamten Dienstes führt. Ein alternativer Ansatz, welcher in dieser Arbeit erforscht wird, ist die dezentralisierte Speicherung und Verarbeitung der Daten in den darüberliegenden Softwareschichten. Um in diesem Ansatz einen Ausfall der gesamten Datenschicht zu kompensieren, ist es zwingend notwendig, dass die verbleibenden Schichten die eingehenden Anfragen ohne die Bestätigung durch die Datenschicht beantworten können. Hierfür wird eine Replikationsarchitektur benötigt, in der jedes Replikat die Anfragen direkt beantworten kann; die so genannte "multi-leader replication". In dieser Arbeit werden diese Replikationsarchitekturen verwendet, um den Zustand und die Daten eines Dienstes zu dezentralisieren und über mehrere Schichten zu replizieren. Hierbei werden zwei Mechanismen detaillierter betrachtet: "Conflict-free Replicated Data Types" und "Operational Transformation". Anschließend werden beide Mechanismen erweitert und hinsichtlich der Verwendbarkeit für den beschriebenen Ansatz geprüft. Als Ergebnis dieser Arbeit wird gezeigt, dass ein dezentralisierter Ansatz mit den vorgestellten Mechanismen in Betracht gezogen werden kann. Die Herausforderungen, die bei der Anwendung dieses Ansatzes entstehen, basieren auf nachweislich unlösbaren Problemen aus der Forschung von Verteilten Systemen.

Dazu gehört die Unlösbarkeit von Konsensus und die unausweichliche Abwägung zwischen Verfügbarkeit und Konsistenz in einem verteilten System mit Ausfällen. Diese Arbeit trägt dazu bei, die entstehenden Lücken, welche aus diesen fundamentalen Ergebnissen resultieren, zu schließen und die vorgeschlagenen Lösungen für reale IT Dienste anwendbar zu machen. Dieses wird anhand eines dezentralen IMAP Dienstes und einer Programmierbibliothek für Webanwendungen verdeutlicht. Alle Bestandteile dieser Doktorarbeit verbinden Theorie und Praxis. Alle vorgeschlagenen Erweiterungen für bestehende Replikationssysteme werden in formalen Modellen verifiziert und prototypisch implementiert. Die Implementierungen werden außerdem mit vergleichbarer Standardsoftware, welche dem heutigen Stand der Technik entspricht, in praktischen Experimenten evaluiert.

Mediation Ethics Ellen Waldman 2011-03-29
Mediation Ethics is a groundbreaking text that offers conflict resolution professionals a much-needed resource for traversing the often disorienting landscape of ethical decision making. Edited by mediation expert Ellen Waldman, the book is filled with illustrative case studies and authoritative commentaries by mediation specialists that offer insight for handling ethical challenges with clarity and deliberateness. Waldman begins with an introductory discussion on mediation's underlying values, its regulatory codes, and emerging models of practice. Subsequent chapters treat ethical dilemmas known to vex even the most experienced practitioner: power imbalance, conflicts of interest, confidentiality,

attorney misconduct, cross-cultural conflict, and more. In each chapter, Waldman analyzes the competing values at stake and introduces a challenging case, which is followed by commentaries by leading mediation scholars who discuss how they would handle the case and why. Waldman concludes each chapter with a synthesis that interprets the commentators' points of agreement and explains how different operating premises lead to different visions of what an ethical mediator should do in a given case setting. Evaluative, facilitative, narrative, and transformative mediators are all represented. Together, the commentaries showcase the vast diversity that characterizes the field today and reveal the link between mediator philosophy, method, and process of ethical deliberation. Law and Language in the European Union

Richard L. Creech 2005 The European Economic Community, founded in 1957, consisted of six Member States with a combined total of four official languages. By 2004, this organization had evolved into a European Union of twenty-five Member States with more than twenty official languages among them. This increase has presented numerous challenges to the EU's internal linguistic regime, where formal policy has been, with some notable exceptions, to treat all of these languages equally. Some of these languages - English in particular - have been

more equal than others. Languages that lack nation-wide official status in any Member State - such as Catalan and Welsh - have been overtly denied equal treatment. Furthermore, the multilingual nature of the EU has had significant implications for any Member State that wishes to regulate the use of language within its territory, as such regulation can interfere with the rights accorded to citizens of other Member States to participate in free commercial movement throughout the Union. *Law and Language in the European Union* - now in paperback - examines how, in the linguistic realm, the EU has responded to the tensions that lie behind this paradoxical motto.

Public Procurement Law in Sub-Saharan

Africa Annika Engelbert 2017 Public procurement is a core government activity that is highly prone to corruption. Why, despite joint efforts of national governments and the international donor community to strengthen statutory frameworks, are public procurement systems in Sub-Saharan Africa still insufficiently equipped to prevent corruption? It is the purpose of the book to advance Law and Development research by (a) assessing the effectiveness of institutional means to curb procurement-related corruption in Tanzania, Kenya, and Uganda; (b) treating law as a means to foster development, and (c) applying qualitative research methods to establish causal mechanisms between law and the social phenomenon of corruption. The book shows that while procurement systems are on paper well suited to serve as anti-corruption instruments, implementation gaps are significant; thus, 'law in books' and 'law in action' differ to a large extent. The reasons are unearthed on the political, institutional, and individual level.

Lectures on the Paradigms of Legal

Thinking Csaba Varga 1999 Legal philosopher Varga introduces readers to reasoning in law by leading them through the possibilities, boundaries, and traps of assuming personal responsibility and impersonal pattern adoption that have arisen in the history of human thought and in the various legal cultures. He seeks to reveal the actual processed hidden by the veil of patterns that are followed in thinking, processed that people encounter both in conceptual-logical quests for certainties and in the undertaking of

fertilizing ambiguity. The original Hungarian *Eloadások a jogi gondolkad'e paradigmairól* was published by Osiris, Budapest in 1999.

State and Church in the European Union

Gerhard Robbers 2005 Churches as essential components of European culture have major significance for European integration. The volume presents in its second edition a broad comparison of different systems of State and Church relationships in the Member States of the European Union. It includes the new Member States and provides an account of the new developments throughout Europe. The volume shows the implications of European integration on the position of the Churches. It is interesting for all those working in the field of State-Church relationship as well as to public and church institutions.

Good Governance and the European Union

Deirdre Curtin 2005 This book approaches the notion of good governance from three different angles. First it establishes whether it is a meaningful notion at all by taking a closer look at the parameters of good governance. Secondly, the authors look at the institutional translation of the criteria of good governance. In a third dimension, the concept may be analysed in relation to a number of substantive issues.

Cryptofinance and Mechanisms of Exchange

Stéphane Goutte 2020-01-03 This book describes how the rapid advancement in encryption and network computing gave birth to new tools and products that have influenced the local and global economy alike. One recent and notable example is the emergence of virtual currencies (such as Bitcoin) also known as

cryptocurrencies. Virtual currencies introduced a fundamental transformation that affected the way goods, services and assets are exchanged. As a result of its distributed ledgers based on blockchain, cryptocurrencies not only offer some unique advantages to the economy, investors, and consumers, but also pose considerable risks to users and challenges for regulators when fitting the new technology into the old legal framework. The core of this proposed book is to present and discuss the evidence on financial asset capabilities of virtual currencies. The contributors of this volume analyze several interesting and timely issues such as the particularities of virtual currencies and their statistical characteristics; the diversification benefits of virtual currencies; the behavior and dependence structure between virtual currencies and the financial markets; the

economic implications of virtual currencies, their effects, their price risk, and contagion spillovers in a unified and comprehensive framework; the future of virtual currencies and their distributed ledgers technology.

Prelude to the Easter Rising Reinhard R.

Doerries 2014-02-04 Prelude to the Easter Rising casts light upon the clandestine activities of Sir Roger Casement in Imperial Germany from 1914 to 1916. German military intelligence and the Imperial Foreign Office had far-reaching plans to use the Irish in the war against Britain. Radical Irish-American leaders were behind Casement's mission to Berlin. It took some time for the highly sensitive and idealistic Casement to realize that neither the German General Staff nor the Imperial Chancellor was able or willing to lend full military support to the Irish. When Casement began to see that the rising would be a bloody massacre, he left for Ireland to halt the fatal development and, if necessary, sacrifice his own honour and life. The carefully edited documents contained in this volume, mostly from the German Foreign Office archives in Bonn, present a full record of Casement's activities prior to Easter 1916. Over 80 years later, these papers have lost none of their emotional intimacy.
