The Oxford Handbook of International Investment Law Peter Muchlinski
2008-06-26 The Oxford Handbooks series is a major new initiative in academic publishing. Each volume offers an authoritative and state-of-the-art survey of current thinking and research in a particular subject area. Specially commissioned essays from leading international figures in the discipline give critical examinations of the progress and direction of debates. Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences. The Oxford Handbook of International Investment Law aims to provide the first truly exhaustive account of the current state and future development of this important and topical field of international law. The Handbook is divided into three main parts. Part One deals with fundamental conceptual issues, Part Two deals with the main substantive areas of law, and Part Three deals with the major procedural issues arising out of the settlement of international investment disputes. The book has a policy-oriented introduction, setting the more technical chapters that follow in their policy environment within which contemporary norms for international foreign investment law are evolving. The Handbook concludes with a chapter written by the editors to highlight the major conclusions of the collection, to identify trends in the existing law, and to look forward to the future development of this field.

The International Law on Foreign Investment M. Sornarajah
2010-05-06 Given recent seismic upheavals in the world's money markets, an updated edition of an authoritative, reliable textbook on the international law of foreign investment has rarely been so timely. Sornarajah's classic text surveys how international law has developed to protect foreign investments by multinational actors and to control any misconduct on their part. It analyses treaty-based methods, examining the effectiveness of bilateral and regional investment treaties. It also considers the reverse flow of investments from emerging industrialising powers such as China and Brazil and explores the retreat from market oriented economics to regulatory controls. By offering thought-provoking analysis of not only the law, but related developments in economics and political sciences, Sornarajah gives immediacy and relevance to the discipline. This book is required reading for all postgraduate and undergraduate international law students specialising in the law of foreign investments.

[The Interpretation of International Investment Law](#) Todd Weiler
2013-05-02 In *The Interpretation of International Investment Law: Equality, Discrimination and Minimum Standards of Treatment in Historical Context*, author Todd Weiler demonstrates how historical analysis should be adopted in the interpretation of international investment law obligations. Weiler subjects some of the most commonly held beliefs about the nature and development of international

investment law to a critical re-appraisal, based upon meticulously assembled historical record. In the process, the book provides readers with a fresh perspective on some of the oldest obligations in international law. This stimulating contribution to the discourse on interpretation of international investment law standards sheds new light on the formation of such primary obligations as fair and equitable treatment, protection and security and the customary international law minimum standard of treatment for aliens. Additionally, a thought-provoking historical analysis explains why a one-size-fits-all approach to obligations found in both trade and investment treaties, such as MFN treatment and national treatment, must be rejected. With a keen attention to detail, *The Interpretation of International Investment Law: Equality, Discrimination and Minimum Standards of Treatment in Historical Context* reveals the dynamic relationship between historical analysis, critical theory and the construction of both customary and treaty norms in international investment law.

Investment Law within International Law Freya Baetens 2016-01-07 Developments within various sub-fields of international law influence international investment law, but changes in investment law also have an impact on the evolution of other fields within international law. With contributions from leading scholars and practitioners, they examine specific links between investment law and other sub-fields of international law such as the law on armed conflict, human rights, sustainable development, trade, development and EU law. In particular, this book scrutinizes how concepts, principles and rules developed in the context of such sub-fields could inform the content of investment law. Solutions aimed at resolving problems in other settings may provide instructive examples for addressing current problems in the field of investment law, and vice versa. The underlying question is whether key sub-fields of public international law, notably international investment law, are open to cross-fertilisation, or, whether they are evolving further into self-contained regimes.

With contributions by leading experts in the field, this title provides timely, authoritative information on FDI that can be used by a wide audience, including practitioners, academics, researchers, and policy makers.

'Fair and Equitable Treatment' in International Investment Law

Roland Kläger 2011-06-23 A breach of fair and equitable treatment is alleged in almost every investor-state dispute. It has therefore become a controversial norm, which touches many questions at the heart of general international law. In this book, Roland Kläger sheds light on these controversies by exploring the deeper doctrinal foundations of fair and equitable treatment and reviewing its contentious relationship with the international minimum standard. The norm is also discussed in light of the fragmentation of international law, theories of international justice and rational balancing, and the idea of constitutionalism in international law. In this vein, a shift in the way of addressing fair and equitable treatment is proposed by focusing on the process of justificatory reasoning.

Global Public Interest in International Investment Law Andreas

Kulick 2014-05-14 The strengths of international investment law - above all, a strong focus on investor interests and an effective adjudication and enforcement system - also entail its weaknesses: it runs the danger of impeding or even sanctioning the host states' legitimate regulatory

interests and ignoring other fields of public international law. How does it cope with public interest concerns such as human rights, the environment or the fight against corruption? At the heart of this book lies a fresh approach towards a general theory of such global public interest considerations in the investment realm. Delineating how and why those considerations matter, and why the current system does not accommodate them properly, Andreas Kulick fleshes out general principles and customary international law as defences the host state may raise against alleged investor rights infringements and promotes proportionality as the appropriate balancing mechanism.

Transparency in International Law Andrea Bianchi 2013-11-07 While its importance in domestic law has long been acknowledged, transparency has until now remained largely unexplored in international law. This study of transparency issues in key areas such as international economic law, environmental law, human rights law and humanitarian law brings together new and important insights on this pressing issue. Contributors explore the framing and content of transparency in their respective fields with regard to proceedings, institutions, law-making processes and legal culture, and a selection of cross-cutting essays completes the study by examining transparency in international law-making and adjudication.

Principles of International Investment Law Rudolf Dolzer 2022-01-13 This book outlines the principles behind the international law of foreign investment. The main focus is on the law governed by bilateral and multilateral investment treaties. It traces the purpose, context, and evolution of the clauses and provisions characteristic of contemporary investment treaties, and analyses the case law, interpreting the issues raised by standard clauses. Particular consideration is given to broad treaty-rules whose understanding in practice has mainly been shaped by their interpretation and application by international tribunals. In addition, the book introduces the dispute settlement mechanisms for enforcing investment law, outlining the operation of Investor-State arbitration. Combining a systematic analytical study of the texts and principles underlying investment law with a jurisprudential analysis of the case law arising in international tribunals, this book offers an ideal introduction to the principles of international investment law and arbitration, for students, scholars, and practitioners alike.

The Public International Law of Taxation Asif H. Qureshi 2019-05-22 The phenomenal internationalization of taxation occurring in recent years has called for a second edition of this classic handbook. Even though a quarter of a century has passed, the farsighted first edition has remained in constant use worldwide and has even grown in importance. Now it has been thoroughly updated by the author, who has brought his piercing insight to bear on the current world of international tax law while retaining the book's practical format, structure of primary materials, and detailed commentary. Emphasizing the need for an international consciousness in relation to issues of taxation, Professor Qureshi focuses extensively on the problems associated with fiscal jurisdiction, international constraints in domestic taxation, double taxation, and tax evasion and avoidance. In particular the following are covered: treaty law with specific reference to taxation; fiscal aspects of international monetary, investment, and trade law; enforcement of international tax claims; exchange of information; assistance in recovery of tax claims; mechanisms for the resolution of international tax disputes; base erosion and profit shifting in the framework of public international law; and contribution of international institutions to fiscal capacity development. Assimilating in one source the basic materials in public international law germane to taxation - including cases, texts of international agreements, discourse in secondary sources, and incisive commentary, all updated to the present - this new edition of the most authoritative and important book in its field will be of immeasurable value to tax practitioners worldwide, national taxation authorities, international institutions, and the international tax community more generally.

Cultural Heritage in International Investment Law and Arbitration

Valentina Vadi 2014-03-13 Can states adopt protectionist cultural policies? What are the limits, if any, to state intervention in cultural matters? A wide variety of cultural policies may interfere with foreign investments, and a tension therefore exists between the cultural policies of the host state and investment treaty provisions. In some cases, foreign investors have claimed that cultural policies have negatively affected their investments, thereby amounting to a breach of the relevant investment treaty. This study maps the relevant investor-state arbitrations concerning cultural elements and shows that arbitrators have increasingly taken cultural concerns into consideration in deciding cases brought before them, eventually contributing to the coalescence of general principles of law demanding the protection of cultural heritage.

Shareholders' Claims for Reflective Loss in International

Investment Law Lukas Vanhonnaeker 2022-08-11 In recent years, investor-state tribunals have often permitted shareholders' claims for reflective loss despite the well-established principle of no reflective loss applied consistently in domestic regimes and in other fields of international law. Investment tribunals have justified their decisions by relying on definitions of 'investment' in investment agreements that often include 'shares', while the no-reflective-loss principle is generally justified on the basis of policy considerations pertaining to the preservation of the efficiency of the adjudicatory process and to the protection of other stakeholders, such as creditors. Although these policy considerations militating for the prohibition of shareholders' claims for reflective loss also apply in investor-state arbitration, they are curable in that context and must be balanced with policy considerations specific to the field of international investment law that weigh in favor of such claims: the protection of foreign investors in order to promote trade and investment liberalization.

Commercial Law L. S. Sealy 2009 Commercial Law: Text Cases and Materials has been an indispensable and hugely popular resource for students of law and business management for over ten years. Combining extracts from cases and other materials with substantial commentary and

explanatory text, Sealy and Hooley provide context for the extracts, question their significance, and provide an authoritative guide to commercial law. This book follows a very clear structure, discussing topics covered on commercial law courses not as separate entities, but as part of a coherent whole, enabling students to easily make links between different areas of the law. Fundamental concepts such as ownership, possession, and good faith run through the book, offering common themes connecting each area. The authors supply extensive commentary on key decisions, helping students to focus on the most important areas; also provided are European and American examples, ensuring that students have access to a comparative analysis of commercial law as it operates throughout the world. Praised for the clarity of writing and mapping well onto a variety of courses, the emphasis throughout this book is on practical application - how is the law used in practice? Diagrams and questions enable students to check progress and consolidate understanding. Whilst maintaining the previous edition's successful structure and style, this edition takes into account all of the major changes in the law since 2003 and provides extracts from recent key cases. Sealy and Hooley's Commercial Law brings together the best features of a textbook and casebook, making it an invaluable one-stop resource.

The Protection of Intellectual Property Rights Under International Investment Law Simon Klopschinski 2020-07-14 In recent decades, foreign direct investment (FDI) has played an increasingly significant role in world economic activity and development. In economic terms, the accumulated stock of FDI and its generation of commercial activity by foreign affiliates have made FDI comparatively more important than international trade in goods and services. While FDI has experienced long-term steady growth until the recent financial crisis, another powerful trend has been transforming an important part of modern economies: these economies are becoming predominantly 'conceptual',

reflecting the vital role of ideas in common and highly valued products and services, and shifting the emphasis in asset valuation from physical to intellectual property (IP). As this trend continues, a similar change can be observed in FDI: foreign investments are reflecting an increasing concentration of intellectual capital invested in knowledge goods protected by intellectual property rights. Thus, IP rights have never been more economically and politically important or controversial than they are today. There have long been international treaties that protect IP, but in recent years other international treaties have come into being that protect IP rights along with other property rights. These treaties include various international investment agreements (IIAs), which regard IP rights as a protected investment. This book will analyse the standards of treatment and protection enshrined in IIAs for IP rights, with reference to topics such as the fragmentation of international law; investor-host-state dispute resolution; investors and investments; relative standards of treatment (such as most favoured nation); absolute standards of treatment (such as fair and equitable treatment); and expropriation. Since many questions regarding the relevance of IIA for IP rights have not been decided yet by investment tribunals, this lack of practice will be addressed by the analysis of hypothetical cases based on actual cases decided by other adjudicating bodies in different legal contexts, such as the European Court of Human Rights or the European Court of Justice. Pending proceedings such as Philip Morris and Eli Lilly will also be discussed.

International Law MARK WESTON. JANIS 2020-06-25 Janis, Noyes, and Sadat on International Law presents this complex subject in an authoritative and well-written casebook. The book introduces the history and nature of international law and its sources--treaties, custom, general principles, jus cogens, and equity. It explains how international law is applied in U.S. courts and in international arbitration and adjudication. The book addresses many of the key settings in which international law plays a critical role: international human rights, the recognition and succession of states and governments, international and non-governmental organizations, war and peace, the law of the sea, and interstate judicial relations. The book's materials, largely domestic and international judicial decisions, are both sophisticated and teachable, the perfect introductory casebook for any U.S. law school.

International Investment Law and Development Stephan W. Schill 2015-12-18 International investment law has often been seen as an obstacle to sustainable development. While the connections between

investment and development are plain, for a long time there has been relatively little scholarship exploring them. Combining critical reflection and detailed analysis, this book addresses the relationship between contemporary investment law and development. The book is organized around two competing visions of investment and development - as working either harmoniously or in conflict with one another. The expert contributors reflect on both of these views and analyse the social dimensions of development and its impact on investment law. Coverage includes in-depth discussion on such issues as human rights, poverty reduction, labor standards, and indigenous peoples. Students and scholars of international investment law will benefit from the informed analysis of the links between investment and development. This book will also be of use to practitioners and experts of development law who are looking for an up-to-date perspective of the field.

Determinations Michael D. Nolan 2011 This comprehensive two-volume work is a collection of determinations from OPIC, the US governmental political risk insurance provider, in the form of its Memoranda of Determinations from 1966 through to 2010. An important part of international investment law and policy is the political risk insurance coverage provided to international investors by their home states and multilateral organizations such as the World Bank. These programs are of crucial importance to the growth of international investment flows and the development of international investment law. The insurance claim decisions and as a result this area of international law has received

disproportionately little attention. This reference work is the first to make the underlying primary material available to the investment law, political risk and academic communities. The authors have made the claims determinations more accessible with the inclusion of headnote summaries for all determinations. The determinations reflect the decisions of OPIC under US and international law and therefore have a significant impact on its future claims determinations. They reveal what types of claims have been honored for expropriation, political violence or convertibility/transferability restrictions. Users of political risk insurance worldwide will find this collection invaluable in understanding what events are and are not in fact covered, and deciding whether to obtain insurance coverage. These OPIC determinations will also contribute to the development of arbitral jurisprudence regarding government actions that are alleged to be in violation of investment protections found in investment treaties and investment law. They are additionally of interest in the context of the presentation and determination of future OPIC claims and decision making by other political risk insurance providers.
