

Into The Kill Zone A Cops Eye View Of Deadly Force

Down, Out, and Under Arrest Forrest Stuart
2016-08-02 Forrest Stuart gives us a new framework for understanding life in criminalized communities throughout America. The idea of community policing and of stop-and-frisk and broken windows is just part of the picture, which includes people on both sides of the issue of keeping order in Skid Row communities. Stuart's is a dramatic demonstration of how to understand the daily realities of America's most truly disadvantaged, an understanding that requires a sharp focus on the pervasive role and impact of the police. Policing zero tolerance models in particular is reshaping urban poverty and marginalization in 21st-century America. Stuart immersed himself for several years in the notorious homeless capital of America, which is

to say, Skid Row in Los Angeles. It has the largest concentration of standing police forces anywhere in the United States. On their side, the police practice what Stuart calls therapeutic policing a form of virtual social work that is designed to cure the poor of individual pathologies. On the side of the homeless, Stuart finds a cunning set of techniques for evading police contact, which he dubs cop wisdom and which the poor use for intensifying resistance to roustings by the police. The police are tasked with day-to-day management of the growing numbers of citizens falling through the holes in the threadbare social safety net. We see daily patrol practices and routines that amount to hyper-policing in skid row districts. The continuous threat of punishment aims to steer homeless individuals away from self-destructive

behaviors while providing incentives to drug recovery, employment, and life skills (in nearby meta-shelters). Minority upheavals now underway across America underscore the divide between cops and the urban poor (almost all of whom are black or Latino). Stuart joins Alice Goffman in revealing the underlying, and often tragic, dynamics."

Under the Gun in Iraq Robert Cole 2010-05-04
A sobering read from another lost front. - Kirkus Reviews
What happens when you drop an experienced American cop in the middle of a war zone - with very little preparation or support - to train Iraqi police? Under the Gun in Iraq tells you in high fidelity detail about this vital aspect of U.S. efforts to build a nation.-BRYAN VILA, Ph.D., Professor at Washington State University, former Marine, Los Angeles police officer and cross-cultural police trainer
One moment, I was standing there with my buddies unloading a truck. The next moment, my ears picked up the distinct 'psstt' sound homing in on us.... Hit the

ground! someone yelled. Right behind the first mortar was a second, then a third, then a fourth. They each slammed into the earth with an enormous impact. The ground shook. The eight-story building above us shuddered, and we all covered our heads when the windows blew out. As I lay there with glass and debris raining down on me, all I could think was, 'Holy shit, what did I get myself into?' President Bush is fond of saying, When Iraq can stand up, America can stand down. A large part of standing up is having a well-trained police force in place to maintain peace and order. Why is it taking so long to put a solid police force together? How prepared are the Iraqis to carry out their duties? What pitfalls are Americans facing as they try to get Iraqi police up to speed? In this book Robert Cole-a retired California police officer hired by DynCorp as an international police trainer-presents a vivid account of the challenges of training the Iraqis to handle their own security. In blunt, everyday language, Cole gives the

reader an unusually candid and often hair-raising glimpse into reality at the street level as he and his colleagues navigate the dangerous sectors of Baghdad, Tikrit, and Kirkuk, dodging explosions and bullets aimed at them by young, Iraqi, wannabe heroes. Cole describes situations not shown in the media that fly in the face of the party line from Washington: men in their sixties being hired as policemen, Iraqi detectives who extract information from people by ramming toothpicks under their fingernails, officers suggesting that the best way to subdue potential suspects who flee is by shooting them in the back, police hunkered down in their barracks who refuse to patrol neighborhoods for fear of violence, an enemy that easily blends into a population armed to the teeth with loaded AK-47s, and the routine frustrations of cultural and language barriers to communication. In sharp contrast to the usual bromides about staying the course, *Under the Gun in Iraq* paints a brutally realistic picture of the bleak, perilous

road ahead. This is essential reading for all Americans seeking an honest understanding of the dire situation in Iraq. Robert Cole was a police officer for over 25 years. He retired from the force in East Palo Alto, California, where he was one of the commanders that helped bring the city back from its status as the murder capital of the United States. Cole recently finished almost two years in the United Nations Peacekeeping Mission in Haiti. He served a one-year tour of duty working for DynCorp as an international police trainer in Iraq and will be redeployed for another in 2008. Jan Hogan (Las Vegas, NV) is an award-winning staff writer for Stephens Media who writes for *View* newspapers and has published numerous articles in *AAA's Motorland* (now *Via*), *Law & Order*, and other publications. She is currently writing her next book on dyslexia.

On Combat Dave Grossman 2022-08-09 The director of the Killology Research Group shares “a thorough examination of the emotional and

physical effects of deadly conflict” (Kirkus Reviews). On Combat examines the stress resulting from engaging in deadly battle and its effects on the human body, from the heart and the nervous system to visual and auditory perception to memory. The historical perspective on the evolution of combat provided in this text further deepens our understanding of the brave men and women who train their minds and bodies to go to that place from which others flee. Lt. Col. Dave Grossman, a war veteran and former West Point psychology professor, presents combat coping strategies, demonstrating how one can train the mind to be inoculated against stress, fear, and even pain. This fresh and informative look at post-traumatic stress disorder (PTSD) details how to prevent it, how to survive it, how to come out of it stronger, and how to help others who are experiencing it. Grossman underscores the importance of post-combat debriefing, when warriors gather to share, learn from each other, and begin to heal

from the horror. Based on extensive new research, Grossman’s findings are supported by revealing quotes and anecdotes from combat veterans and other leaders in the warrior community.

The State of American Policing David J. Thomas 2018-11-09 Written by a veteran police officer turned college professor, this modern-day study of American policing covers hot-button issues including police use of deadly force against and bias toward minorities. Grounded in research of historical and current events, this text examines police practices and the psychological impact that those practices have on minority communities. Author David J. Thomas, a retired police officer and associate professor of criminal justice, looks at and beyond historical perspectives to address many of today's most controversial issues central to minority communities. Topics covered include the repeated failure to convict officers for fatally shooting unarmed subjects, the rise of heated

debates between the Black Lives Matter and Blue Lives Matter movements, the militarization of police agencies, and police response to protests by NFL players. The text also offers insight into the psychology of race, police culture, implicit bias, and the decision to use deadly force. Thomas additionally examines possible solutions to these problems. College students, researchers, academics, and readers interested in politics will find this work informative and thought-provoking.

Stress in Policing Ronald J. Burke 2016-07-01 Stress in policing remains a serious concern for individual officers, their families, their organizations and society at large. As an editor of the Psychological and Behavioural Aspects of Risk series, Ronald J. Burke brings together the latest research findings and intervention strategies, shown to be effective, by an international group of experts. The contributors comprise of a group of high profile researchers and writers who are experts in their respective

fields. This edited collection addresses such issues as: The increased risk of international terrorism Racial profiling Police Culture Police integrity Police suicide Inadequate police training The work of police officers exposes them to sources of stress that increase several risks in terms of their psychological and physical health, their family relationships, physical injuries, emotional trauma, ambiguity about their roles in society. Shift work, and undercover work add additional burdens to officers and their families. Police work also places risks on the communities in which officers serve in terms of officers being inadequately trained to deal with mentally ill citizens.

Into the Kill Zone David Klinger 2012-06-26
What's it like to have the legal sanction to shoot and kill? This compelling and often startling book answers this, and many other questions about the oft-times violent world inhabited by our nation's police officers. Written by a cop-turned university professor who interviewed scores of officers who have shot people in the course of their duties, *Into the Kill Zone* presents firsthand accounts of the role that deadly force plays in American police work. This brilliantly written book tells how novice officers are trained to think about and use the power they have over life and death, explains how cops live with the awesome responsibility that comes from the barrels of their guns, reports how officers often hold their fire when they clearly could have shot, presents hair-raising accounts of what it's like to be involved in shoot-outs, and details how shooting someone affects officers who pull the trigger. From academy training to post-shooting reactions, this book tells the compelling story of

the role that extreme violence plays in the lives of America's cops.

Battleground: Criminal Justice Gregg Barak
2007-10-30 There are many controversial aspects of our criminal justice system, and this encyclopedia examines the most significant controversies throughout American history with emphasis on current debates, trends, and issues. Arranged alphabetically, approximately 100 entries cover background, explanations, notable cases and events, various sides of an issue, and what to expect in the future. Entries are objective and factual, allowing readers to formulate their own conclusions. Sidebars and case examples help to illustrate each entry, and sources for further reading point readers to other important materials. Given the prevalence of controversial criminal justice topics in the news, this timely reference is an important resource for anyone interested in crime and justice. Entries include: Boot Camps, Corporal Punishment, DNA Evidence, Domestic Violence,

Expert Testimony, Eye Witness Identifications, Gun Control, Homeland Security, International Criminal Court, Legalization of Marijuana, Mental Health and Insanity, Police Brutality, Prison Violence, Racial Profiling, School Violence, Sex Offender Laws, Stalking Laws, Supermax Prisons, Three Strikes, Treating Juveniles as Adults, War on Drugs, and more.
Police Administration Gary W. Cordner
2016-03-02 This national best-selling text examines police administration from multiple perspectives: a systems perspective (emphasizing the interrelatedness among units and organizations); a traditional, structural perspective (administrative principles, management functions, and the importance of written guidelines); a human behavioral perspective (the human element in organizations); and a strategic management perspective (communications and information systems, performance evaluation, strategies and tactics, and prevailing and promising

approaches to increasing effectiveness of police agencies). Coverage of management functions and organizational principles is streamlined while providing a stronger emphasis on diversity principles and on developing police agencies as learning organizations. A concluding chapter covers contemporary issues, including community engagement, collaboration, globalization, racial profiling, mass media, cybercrime, terrorism and homeland security. Case studies based on real-life events invite students to practice managing the conflicting circumstances, and Modern policing blog posts offer news and developments in the policing world.

Framing Excessive Violence Daniel Ziegler 2015-10-13 This book explores the dynamics of excessive violence, using a broad range of interdisciplinary case studies. It highlights that excessive violence depends on various contingencies and is not always the outcome of rational decision making. The contributors also

analyse the discursive framing of acts of excessive violence.

Policing Tim Newburn 2012-06-22 Bringing together a range of leading social scientists and criminologists, this volume explores a number of key themes raised by the work of Robert Reiner. Arguably the leading policing scholar of his generation, Reiner's work over some 40 years has ranged broadly in this field, taking in the study of police history, culture, organisation, elites and relationships with the media. Always carefully situated within an analysis of the changing socio-political circumstances of policing and crime control, Robert Reiner's scholarship has been path-breaking in its impact. The 13 original essays in this volume are testament to Reiner's influence. Although reflecting the primarily British bent within his work, the essays also draw on contributors from Australia, Europe, South Africa and the United States to explore some of the leading debates of the moment. These include, but are not limited

to, the impact of neo-liberalism on crime control and the challenges for modern social democracy; police culture, equality and political economy; new media and the future of policing; youth, policing and democracy, and the challenges and possibilities posed by globalisation in the fields of policing and security.

Cop in the Hood Peter Moskos 2009-08-03 When Harvard-trained sociologist Peter Moskos left the classroom to become a cop in Baltimore's Eastern District, he was thrust deep into police culture and the ways of the street--the nerve-rattling patrols, the thriving drug corners, and a world of poverty and violence that outsiders never see. In Cop in the Hood, Moskos reveals the truths he learned on the midnight shift. Through Moskos's eyes, we see police academy graduates unprepared for the realities of the street, success measured by number of arrests, and the ultimate failure of the war on drugs. In addition to telling an explosive insider's story of what it is really like to be a police officer, he

makes a passionate argument for drug legalization as the only realistic way to end drug violence--and let cops once again protect and serve. In a new afterword, Moskos describes the many benefits of foot patrol--or, as he calls it, "policing green."

Seven Shots Jennifer C. Hunt 2010-09-15 On July 31, 1997, a six-man Emergency Service team from the NYPD raided a terrorist cell in Brooklyn and narrowly prevented a suicide bombing of the New York subway that would have cost hundreds, possibly thousands of lives. **Seven Shots** tells the dramatic story of that raid, the painstaking police work involved, and its paradoxical aftermath, which drew the officers into a conflict with other rank-and-file police and publicity-hungry top brass. Jennifer C. Hunt draws on her personal knowledge of the NYPD and a network of police contacts extending from cop to four-star chief, to trace the experience of three officers on the Emergency Service entry team and the two bomb squad detectives who

dismantled the live device. She follows their lives for five years, from that near-fatal day in 1997, through their encounters inside the brutal world of departmental politics, and on to 9/11, when they once again put their lives at risk in the fight against terrorism, racing inside the burning towers and sorting through the ash, debris, and body parts. Throughout this fast paced narrative, Hunt maintains a strikingly fine-grained, street-level view, allowing us to understand the cops on their own terms—and often in their own words. The result is a compelling insider's picture of the human beings who work in two elite units in the NYPD and the moral and physical danger and courage involved. As gripping as an Ed McBain novel—and just as steeped in New York cop culture and personalities—Seven Shots takes readers on an unforgettable journey behind the shield and into the hearts of New York City police.

The Impact of Technology on the Criminal Justice System Emily Pica 2024-02-26 This

comprehensive volume explores the impact of emerging technologies designed to fight crime and terrorism. It first reviews the latest advances in detecting deception, interrogation, and crime scene investigation, before then transitioning to the role of technology in collecting and evaluating evidence from lay witnesses, police body cameras, and super-recognizers. Finally it explores the role of technology in the courtroom with a particular focus social media, citizen crime sleuths, virtual court, and child witnesses. It shines light on emerging issues, such as whether new norms have been created in the emergence of new technologies and how human behaviour has shifted in response. Based on a global range of contributions, this volume provides an overview of the technological explosion in the field of law enforcement and discusses its successes and failures in fighting crime. It is valuable reading for advanced students in forensic or legal psychology and for practitioners, researchers,

and scholars in law, criminal justice, and criminology.

Police and State Crime in the Americas

Daniel Gascón 2024-02-24 This book advances a much-needed “postcolonial” framework in analyzing the police. It seeks to deepen our understanding of the police role in maintaining Western global domination throughout the American region despite the violent end of colonial rule. Building on Chevigny's (1995) classic study, this book seeks to draw renewed attention to the role of police in perpetrating state violence and serving as the tip of the spear of state power. It seeks to understand the construction of marginality and the multiple and intersecting structures of colonial domination, before shining a light directly on the crimes of the state, in an attempt to hold criminal state organizations to account. It draws on interdisciplinary perspectives and methodologies that center marginalized and colonized

experiences and allows for the development of countercolonial knowledge. It speaks to academics and students in criminology, sociology, political science, and law, as well as to ethnic and area studies programs, such as Chicano/Latino and Latin American Studies, and to police administrators and policymakers. *Police Conflict Management, Volume II* Mario S. Staller 2023-12-28 This book, as part of a two volume set, provides a broad overview of the current state of research on conflict management in law enforcement contexts globally, with a focus on training and education. They cover a wide range of interactions between police and the public. This volume (II) focusses on training and education and the learning settings that play a prominent role in providing police officers with the knowledge structures, competencies, attitudes, and values that they need to professionally tackle contemporary challenges. Volume I focusses on the contemporary challenges and opportunities in

policing and ethical considerations. These books bring together leading research that is determining the state of the art in communication, de-escalation, use of force, and other contemporary issues in policing, with practical Key Takeaways in each chapter. They broaden the field by focussing on research which goes beyond the US, including in Scandinavia, Switzerland, the Netherlands, Germany, the Republic of South Africa and Russia.

Producing Bias-Free Policing Lorie A. Fridell 2016-08-03 This Brief provides specific recommendations for police professionals to reduce the influence of implicit bias on police practice, which will improve both effectiveness (in a shift towards evidence-based, rather than bias-based) practices and police legitimacy. The author is donating her proceeds from this book to the National Law Enforcement Officers Memorial Fund (nleomf.org).

Deadly Force Encounters Loren W. Christensen 1997-07-01 In a cop's world it's kill or be killed,

but the truth of the matter is that a shooting's aftermath is often the most dangerous time for the cop. This unique life- and career-saving manual contains every shred of critical information the police officer needs to survive the media, investigations and more.

Revisiting Who is Guarding the Guardians?

United States Commission on Civil Rights 2000 *Use of Force Investigations* Kevin R. Davis 2012 Jottings is a collection of poems written over a period of twenty years. Most of the poems in this collection are contextual. Written in different genres of poetry, while some of the poems

appear as general statements but having a bearing on nature. Others are responses of the poet to social/economic/political issues and those related to women. The poems reflect the mood and views of the poet. While poems like "A Symbol of Beauty," "Horizon," "Loss" appear simple, they have an underlying meaning, the philosophy of life. In poems like "Disgusting" and "To a Brave Son," the poet points an accusing finger at the powers that be for the sorry state of affairs. "Love" brings out the true meaning of the word while describing the different stages in the life of a person. The life of a girl child forms the theme of "Who Am I." The hapless condition of young women and children, especially girls, are brought to fore in "To Ponnus and Malalas" and "Sadist Minds." "Down Memory Lane" goes back in time. There are also satirical poems that take potshots at and ridicule the superstitious and the believers like "Light That Darkens," "In Fool's Paradise," "Onam," and "In Your Name." Again, while "Bapu" is on Mahatma Gandhi and

his ideals, it ridicules all those who earned fame in his name. While "Motherland's Boys" talks of the deterioration of India-Pakistan relations, "How Many More Children Will You Kill" chides Israelis and Palestinians for deaths of innocent children. "An Unknown Past" looks at an old person struggling in vain to open the locked doors of her memory. There are also poems that talk of a personal loss and some that snub individuals that make haughty statements. All the illustrations in the book are by cartoonist and animator Mr. Swathi Jaikumar.

Police Use of Force Joseph B. Kuhns 2010-04-09

A team of expert contributors provides an in-depth exploration of police use of force, firearms, and less-than-lethal weapons from a dozen countries across five continents. *Police Use of Force: A Global Perspective* is a fascinating, international exploration of police use of force, firearms, and less-than-lethal weapons in nations around the world. The book is comprised of three sections: the first focuses

on the use of force generally, the second explores firearms and deadly force, and the final section considers less-than-lethal weapons, including pepper spray, TASERs, and other emerging technologies currently on the horizon. The essays gathered here will provide readers with an understanding of the vast differences in how police use force in various countries, as well as why police use force differently under different forms of government. Topics covered include use-of-force definitions, training procedures, policy issues, abuse of police authority, use of force during interrogations, and the use of firearms by armed and unarmed police forces. Finally, there is an essay focusing on how shooting and killing a suspect impacts an officer in the months and years that follow.

Explosive Conflict Randall Collins 2022-02-16
This sequel to Randall Collins' world-influential micro-sociology of violence introduces the question of time-dynamics: what determines how long conflict lasts and how much damage it does.

Inequality and hostility are not enough to explain when and where violence breaks out. Time-dynamics are the time-bubbles when people are most nationalistic; the hours after a protest starts when violence is most likely to happen. Ranging from the three months of nationalism and hysteria after 9/11 to the assault on the Capitol in 2021, Randall Collins shows what makes some protests more violent than others and why some revolutions are swift and non-violent tipping-points while others devolve into lengthy civil wars. Winning or losing are emotional processes, continuing in the era of computerized war, while high-tech spawns terrorist tactics of hiding in the civilian population and using cheap features of the Internet as substitutes for military organization. Nevertheless, Explosive Conflict offers some optimistic discoveries on clues to mass rampages and heading off police atrocities, with practical lessons from time-dynamics of violence.

The Ethics of Policing Ben Jones 2021-07-20 Top scholars provide a critical analysis of the current ethical challenges facing police officers, police departments, and the criminal justice system From George Floyd to Breonna Taylor, the brutal deaths of Black citizens at the hands of law enforcement have brought race and policing to the forefront of national debate in the United States. In *The Ethics of Policing*, Ben Jones and Eduardo Mendieta bring together an interdisciplinary group of scholars across the social sciences and humanities to reevaluate the role of the police and the ethical principles that guide their work. With contributors such as Tracey Meares, Michael Walzer, and Franklin Zimring, this volume covers timely topics including race and policing, the use of aggressive tactics and deadly force, police abolitionism, and the use of new technologies like drones, body cameras, and predictive analytics, providing different perspectives on the

past, present, and future of policing, with particular attention to discriminatory practices that have historically targeted Black and Brown communities. This volume offers cutting-edge insight into the ethical challenges facing the police and the institutions that oversee them. As high-profile cases of police brutality spark protests around the country, The Ethics of Policing raises questions about the proper role of law enforcement in a democratic society. The Routledge International Handbook of Criminology and Human Rights Leanne Weber 2016-08-25 The Routledge International Handbook of Criminology and Human Rights brings together a diverse body of work from around the globe and across a wide range of criminological topics and perspectives, united by its critical application of human rights law and principles. This collection explores the interdisciplinary reach of criminology and is the first of its kind to link criminology and human rights. This text is divided into six sections, each

with an introduction and an overview provided by one of the editors. The opening section makes an assessment of the current standing of human rights within the discipline. Each of the remaining sections corresponds to a substantive area of harm prevention and social control which together make up the main core of contemporary criminology, namely: criminal law in practice; transitional justice, peacemaking and community safety; policing in all its guises; traditional and emerging approaches to criminal justice; and penalty, both within and beyond the prison. This Handbook forms an authoritative foundation on which future teaching and research about human rights and criminology can be built. This multi-disciplinary text is an essential companion for criminologists, sociologists, legal scholars and political scientists.

Jack Katz David Polizzi 2020-06-24 This book is a timely re-introduction to the work and life of one of criminology's more respected theorists, Jack Katz, to the next generation of thinkers in

this field. For nearly 40 years, his work has offered an alternative philosophical perspective to study crime and criminal behavior that is not defined by quantitative method or approach.

Crafting Transnational Policing Andrew Goldsmith 2007-11-16 The book examines the phenomenon of crafting transnational policing. By this term is meant the different forms of engagement in policing reform by international donors, national governments, foreign police and law enforcement agencies in the domestic policing agencies and programs of recipient countries. It includes, inter alia, peace-keeping in post-conflict situations, reconstruction and capacity-building as part of nation- or state-building exercises, and the provision of technical assistance in relation to certain aspects of law enforcement. In each instance, there is a cross-border provision of resources with a view to shaping the kind of policing provided in recipient nations. Why do some countries engage in these activities? Why has policing

become a preferred form of foreign policy engagement in some countries? What forms of policing development are provided? How are they delivered? And how are they received? How should these kinds of assistance and/or interventions be conducted in future? In this regard, is there a non-negotiable 'core' of good policing that needs to be developed and nurtured as an integral part of all defensible transnational policing engagements? These are some of the questions raised by the contributions to this book. The book arises primarily from papers presented at a workshop held in Onati, Spain in July 2004 on the emergence of a global constabulary ethic. The book has also been supplemented by two solicited chapters.

Building Cultures of Peace Randall Amster 2020-07-13 From violence and abuse within family units, to communities and regions torn apart by inter-group conflict and wars among nations, the human condition is rife with turmoil.

The consequences of this seemingly perpetual strife weigh heavily on humanity, often creating feelings of powerlessness and hopelessness that only serve to breed more conflict and violence. In the face of these monumental challenges, initiatives for peace struggle to take root. Seeking effective ways to encourage these efforts, the United Nations adopted three declarations on the eve of the 21st century, including the "Declaration on a Culture of Peace" that broadly defines what the vision looks like and the actions necessary to build cultures of peace. Taking up this central challenge of our time, this volume of collected essays presents multiple perspectives on the critical issues of peace and conflict resolution that pervade the globe, addressing the UN's charge to develop "values, attitudes, modes of behavior and ways of life conducive to the promotion of peace among individuals, groups, and nations." Bringing together scholars and practitioners from fields including education, sociology,

criminology, political science, and peace studies, this work constructively engages the task of creating peace and fostering hope in a conflict-ridden world.

Criminologists on Terrorism and Homeland Security Brian Forst 2011-02-07 This volume presents 19 original essays addressing what is widely regarded as the most serious problem confronting America today and for years to come - terrorism - from the unique perspective of criminology. The chapters collected here address such issues as the prevention of terrorism, the applicability of community policing and routine activities models of crime to the problem of terrorism, how to balance liberty and security, and how to think about and manage the fear of terrorism, as well as the coordination of federal and local efforts to prevent and counter terrorism. *Criminologists on Terrorism and Homeland Security* will be of interest to anyone concerned about violence prevention in general and terrorism in

particular, policing, prosecution, adjudication, sentencing and restorative justice.

Policing and Law Enforcement: Oxford Bibliographies Online Research Guide James J. Willis 2010-05

This ebook is a selective guide designed to help scholars and students of criminology find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In criminology, as in other disciplines,

researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is a static version of an article from Oxford Bibliographies Online: Criminology, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study and practice of criminology. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit www.aboutobo.com.

Encyclopedia of Police Science Jack Raymond Greene 2006-10-23 In 1996, Garland published the second edition of the Encyclopedia of Police Science, edited by the late William G. Bailey. The work covered all the major sectors of policing in the US. Since then much research has been done on policing issues, and there have been significant changes in techniques and in

the American police system. Technological advances have refined and generated methods of investigation. Political events, such as the terrorist attacks of September 11, 2001 in the United States, have created new policing needs while affecting public opinion about law enforcement. These developments appear in the third, expanded edition of the Encyclopedia of Police Science. 380 entries examine the theoretical and practical aspects of law enforcement, discussing past and present practices. The added coverage makes the Encyclopedia more comprehensive with a greater focus on today's policing issues. Also added are themes such as accountability, the culture of police, and the legal framework that affects police decision. New topics discuss recent issues, such as Internet and crime, international terrorism, airport safety, or racial profiling. Entries are contributed by scholars as well as experts working in police departments, crime labs, and various fields of policing.

Shots Fired Joseph K. Loughlin 2017-10-24 Get a deeper understanding of police shootings through interviews with officers involved in real-life cases Today's media is filled with discussions about officer-involved shootings. Too often missing from that discussion are the police officers' voices and the reality of what happens in actual shooting incidents. Through actual interviews with involved officers, this book addresses common myths and misunderstandings about these shootings. Shots Fired is a journey "behind the shield" and the experiences of the real human beings behind the badge. It explores true events through the participants' own eyes and takes readers inside the minds of officers during the actual event. The officers detail the roller coaster of emotions and severe trauma experienced during and after a shooting event. Along with the intimate, in-depth explorations of the incidents themselves, the book touches the aftermath of police-

involved shootings—the debriefings, internal and external investigations, and psychological evaluations. It challenges many commonly held assumptions created by the media such as the meaning of “unarmed” and why the police can’t just “shoot him in the leg,” creating an understanding that reaches beyond slogans such as “hands up, don’t shoot.” The book is valuable reading for anyone who wants a deeper understanding of police shootings—officers and police departments, reporters and politicians, and the public who rely on the police to keep them safe.

The Encyclopedia of Police Science Jack R. Greene 2007 First published in 1996, this work covers all the major sectors of policing in the United States. Political events such as the terrorist attacks of September 11, 2001, have created new policing needs while affecting public opinion about law enforcement. This third edition of the "Encyclopedia" examines the theoretical and practical aspects of law

enforcement, discussing past and present practices.

Counseling Cops Ellen Kirschman 2015-09-24 Grounded in clinical research, extensive experience, and deep familiarity with police culture, this book offers highly practical guidance for psychotherapists and counselors. The authors vividly depict the pressures and challenges of police work and explain the impact that line-of-duty issues can have on officers and their loved ones. Numerous concrete examples and tips show how to build rapport with cops, use a range of effective intervention strategies, and avoid common missteps and misconceptions. Approaches to working with frequently encountered clinical problems--such as substance abuse, depression, trauma, and marital conflict--are discussed in detail. A new preface in the paperback and e-book editions highlights the book's relevance in the context of current events and concerns about police-community relations. See also Kirschman's

related self-help guide I Love a Cop, Third Edition: What Police Families Need to Know, an ideal recommendation for clients and their family members.
