Privacy, Big Data, and the Public Good Julia Lane 2014-06-09 Massive amounts of data on human beings can now be analyzed. Pragmatic purposes abound, including selling goods and services, winning political campaigns, and identifying possible terrorists. Yet 'big data' can also be harnessed to serve the public good: scientists can use big data to do research that improves the lives of human beings, improves government services, and reduces taxpayer costs. In order to achieve this goal, researchers must have access to this data - raising important privacy questions. What are the ethical and legal requirements? What are the rules of engagement? What are the best ways to provide access while also protecting confidentiality? Are there reasonable mechanisms to compensate

citizens for privacy loss? The goal of this book is to answer some of these questions. The book's authors paint an intellectual landscape that includes legal, economic, and statistical frameworks. The authors also identify new practical approaches that simultaneously maximize the utility of data access while minimizing information risk.

Your Inner Fish Neil Shubin 2009-01-06 The paleontologist and professor of anatomy who co-discovered Tiktaalik, the "fish with hands," tells a "compelling scientific adventure story that will change forever how you understand what it means to be human" (Oliver Sacks). By examining fossils and DNA, he shows us that our hands actually resemble fish fins, our heads are organized like long-extinct jawless fish, and major parts of our genomes look and function

like those of worms and bacteria. Your Inner Fish makes us look at ourselves and our world in an illuminating new light. This is science writing at its finest—enlightening, accessible and told with irresistible enthusiasm.

A History of Experimental Film and Video A.L. Rees 2019-07-25 Avant-garde film is almost indefinable. It is in a constant state of change and redefinition. In his highly-acclaimed history of experimental film, A.L. Rees tracks the movement of the film avant-garde between the cinema and modern art (with its postmodern coda). But he also reconstitutes the film avant-garde as an independent form of art practice with its own internal logic and aesthetic discourse. In this revised and updated edition, Rees introduces experimental film and video to new readers interested in the wider cinema, as well as offering a guide to enthusiasts of avant-garde film and new media arts. Ranging from Cézanne and Dada, via Cocteau, Brakhage and Le Grice, to the new wave of British film and

video artists from the 1990s to the present day, this expansive study situates avant-garde film between the cinema and the gallery, with many links to sonic as well as visual arts. The new edition includes a review of current scholarship in avant-garde film history and includes updated reading and viewing lists. It also features a new introduction and concluding chapter, which assess the rise of video projection in the gallery since the millennium, and describe new work by the latest generation of experimental filmmakers. The new edition is richly illustrated with images of the art works discussed.

The Curatorial Avant-garde Adam Jolles 2013 Explores the emergence of an amateur class of curators in France between the world wars. Focuses on the Surrealist writers and artists who developed an alternative curatorial practice

to that pursued by the community of professionally trained curators and exclusive art dealers.

Martian Time-Slip Philip K. Dick 2007 Mars is a desolate world. Largely forgotten by Earth, the planet remains helpless in the stranglehold of Arnie Kott, who as boss of the plumber's union has a monopoly over the vital water supply. Arnie Kott is obsessed by the past; the native Bleekmen, poverty-stricken wanderers, can see into the future; while to Manfred, an autistic boy, time apparently stops. When one of the colonists, Norbert Steiner, commits suicide, the repercussions are startling and bizarre.

The Dream Colony Walter Hopps 2017-06-06 Art Forum's Best of the Year List A panoramic look at art in America in the second half of the twentieth century, through the eyes of the visionary curator who helped shape it. An innovative, iconoclastic curator of contemporary art, Walter Hopps founded his first gallery in L.A. at the age of twenty-one. At twenty-four, he

opened the Ferus Gallery with then-unknown artist Edward Kienholz, where he turned the spotlight on a new generation of West Coast artists. Ferus was also the first gallery ever to show Andy Warhol's Campbell's Soup Cans and was shut down by the L.A. vice squad for a show of Wallace Berman's edgy art. At the Pasadena Art Museum in the sixties, Hopps mounted the first museum retrospectives of Marcel Duchamp and Joseph Cornell and the first museum exhibition of Pop Art--before it was even known as Pop Art. In 1967, when Hopps became the director of Washington's Corcoran Gallery of Art at age thirty-four, the New York Times hailed him as "the most gifted museum man on the West Coast (and, in the field of contemporary art, possibly in the nation)." He was also arguably the most unpredictable, an eccentric genius who was chronically late. (His staff at the Corcoran had a button made that said WALTER HOPPS WILL BE HERE IN TWENTY MINUTES.) Erratic in his work habits, he was never erratic

in his commitment to art. Hopps died in 2005, after decades at the Menil Collection of art in Houston for which he was the founding director. A few years before that, he began work on this book. With an introduction by legendary Pop artist Ed Ruscha, *The Dream Colony* is a vivid, personal, surprising, irreverent, and enlightening account of his life and of some of the greatest artistic minds of the twentieth century.

Exhibiting cinema in contemporary art Erika Balsom 2014-03-15 Whether it involves remaking an old Hollywood movie, projecting a quiet 16mm film, or constructing a bombastic multi-screen environment, cinema now takes place not just in the movie theatre and the home, but also in the art gallery and the museum. The author of this engaging study takes stock of this

development, offering an in-depth inquiry into its genesis, its defining features, and the ramifications it has for art and cinema alike. Through the lens of contemporary art history, she examines cinema studies great disciplinary obsession namely, what cinema was, is, and will become in a digital future.

The Life We're Looking For Andy Crouch

2022-04-19 A deeply reflective primer on creating meaningful connections, rebuilding abundant communities, and living in a way that engages our full humanity in an age of unprecedented anxiety and loneliness—from the author of *The Tech-Wise Family* “Andy Crouch shows the path to reclaiming a life that restores the heart of what it means to thrive.”—Arthur C. Brooks, #1 New York Times bestselling author of *From Strength to Strength* Our greatest need is to be recognized—to be seen, loved, and embedded in rich relationships with those around us. But for the last century, we’ve displaced that need with the ease of technology. We’ve dreamed of mastery without relationship

(what the premodern world called magic) and abundance without dependence (what Jesus called Mammon). Yet even before a pandemic disrupted that quest, we felt threatened and strangely out of place: lonely, anxious, bored amid endless options, oddly disconnected amid infinite connections. In *The Life We’re Looking For*, bestselling author Andy Crouch shows how we have been seduced by a false vision of human flourishing—and how each of us can fight back. From the social innovations of the early Christian movement to the efforts of entrepreneurs working to create more humane technology, Crouch shows how we can restore true community and put people first in a world dominated by money, power, and devices. There is a way out of our impersonal world, into a world where knowing and being known are the heartbeat of our days, our households, and our economies. Where our vulnerabilities are seen not as something to be escaped but as the key to our becoming who we were made to be together.

Where technology serves us rather than masters us—and helps us become more human, not less. But Is It Art? Cynthia Freeland 2002-02-07 In today's art world many strange, even shocking, things qualify as art. In this book, Cynthia Freeland explains why innovation and controversy are valued in the arts, weaving together philosophy and art theory with many fascinating examples. She discusses blood, beauty, culture, money, museums, sex, and politics, clarifying contemporary and historical accounts of the nature, function, and interpretation of the arts. Freeland also propels us into the future by surveying cutting-edge web sites, along with the latest research on the brain's role in perceiving art. This clear, provocative book engages with the big debates surrounding our responses to art and is an invaluable introduction to anyone interested in thinking about art. Mindwise Nicholas Epley 2015-01-06 Winner of the 2015 Book Prize for the Promotion of Social

and Personality Science (Society for Personality and Social Psychology) Why are we sometimes blind to the minds of others, treating them like objects or animals instead? Why do we talk to our cars, or the stars, as if there is a mind that can hear us? Why do we so routinely believe that others think, feel, and want what we do when, in fact, they do not? And why do we think we understand our spouses, family, and friends so much better than we actually do? In this illuminating book, leading social psychologist Nicholas Epley introduces us to what scientists have learned about our ability to understand the most complicated puzzle on the planet—other people—and the surprising mistakes we so routinely make. *Mindwise* will not turn others into open books, but it will give you the wisdom to revolutionize how you think about them—and yourself.

As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you?the?chance to learn firsthand what it's like to be a?quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic

Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal

prosecutors and attorneys, and forensic science educators.

Mr. Penumbra's 24-Hour Bookstore Robin Sloan
2012-10-02 The Great Recession has shuffled Clay Jannon out of his life as a web-design drone, and serendipity, sheer curiosity and the ability to climb a ladder like a monkey have landed him a new gig working the night shift at Mr. Penumbra's 24-Hour Bookstore. But Clay begins to realize that this store is even more curious than its name suggests. There are only a few customers, but they come in repeatedly and never seem to actually buy anything. Instead they "check out" impossibly obscure volumes from strange corners of the store, all according to some elaborate, long-standing arrangement with the gnomic Mr. Penumbra. The store must be a front for something larger, Clay concludes, and soon he has embarked on a complex analysis of the customers' behaviour and roped his friends into helping him figure out just what's going on. But once they take their findings to

Mr. Penumbra, they discover the secrets extend far beyond the walls of the bookstore. Evoking both the fairy-tale charm of Haruki Murakami and the enthusiastic novel-of-ideas wizardry of Neal Stephenson or Umberto Eco, Mr.

Penumbra's 24-Hour Bookstore is exactly what it sounds like—an establishment you have to enter and will never want to leave.

The Emperor of All Maladies Siddhartha

Mukherjee 2011-08-09 Selected as One of the Best Books of the 21st Century by The New York Times Winner of the Pulitzer Prize, adapted as a documentary from Ken Burns on PBS, this New York Times bestseller is "an extraordinary achievement" (The New Yorker)—a magnificent, profoundly humane "biography" of cancer. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist's precision, a historian's perspective, and a biographer's passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three

decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

Switch Chip Heath 2011 'A fantastic book.'
WIRED 'Witty and instructive.'
WALL STREET JOURNAL 'Invaluable for anyone wanting to make long-lasting change a reality.'
BBC FOCUS 'A must-read.'
FORBES

We all know that change is hard. It's unsettling, it's time-consuming, and all too often we give up at the first sign of a setback. But why do we insist on seeing the obstacles rather than the goal? This is the question that bestselling authors Chip and Dan Heath tackle in their compelling and insightful book. They argue that we need to understand how our minds function in order to unlock shortcuts to switch up our behaviours. Illustrating their ideas with scientific studies and remarkable real-life turnarounds - from the secrets of successful marriage counselling to the pile of gloves that transformed one company's

finances - the brothers Heath prove that deceptively simple methods can yield truly extraordinary results. In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change.

Make Charles Platt 2015

Drive Daniel H. Pink 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct

our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

The Continental Philosophy of Film Reader

Joseph Westfall 2020 "The first collection of its kind, *The Continental Philosophy of Film Reader* is the essential anthology of writings by continental philosophers on cinema, representing the last century of film-making and thinking about film, as well as all of the major schools of Continental thought: phenomenology and existentialism, Marxism and critical theory, semiotics and hermeneutics, psychoanalysis, and

postmodernism. Included here are not only the classic texts in continental philosophy of film, from Benjamin's 'The Work of Art in the Age of Mechanical Reproduction' to extracts of Deleuze's *Cinema* and Barthes's *Mythologies*, but also the earliest works of Continental philosophy of film, from thinkers such as Georg Lukács, and little-read gems by philosophical giants such as Sartre and Beauvoir. The book demonstrates both the philosophical significance of these thinkers' ideas about film, as well their influence on filmmakers in Europe and across the globe. In addition, however, this wide-ranging collection also teaches us how important film is to the last century of European philosophical thought. Almost every major continental European thinker of the twentieth and twenty-first centuries has had something to say—sometimes, quite a lot to say—about cinema: as an art form, as a social or political phenomenon, as a linguistic device and conveyor of information, as a projection of our fears and

desires, as a site for oppression and resistance, or as a model on the basis of which some of us, at least, learn how to live. Purpose built for classroom use, with pedagogical features introducing and contextualizing the extracts, this reader is an indispensable tool for students and researchers in philosophy of film, film studies and the history of cinema."--
