A History of Historical Writing Harry Elmer Barnes 1937

The World of Flying Saucers Lyle Boyd 2021-11-02 Annotated with Mr.Menzel's Biography Both as scientists and as devotees of science fiction, we have long been interested in space travel. When reports of unidentified flying objects began to increase in the years between 1947 and 1952, one of us (D.H.M.) collected and studied the limited information available about the sightings. He soon concluded (with a slight feeling of disappointment!) that the flying saucers were not vehicles from other worlds but were only mundane objects and events of various kinds, some of them commonplace, some familiar chiefly to meteorologists, physicists, and astronomers. At a conference with Air Force officials in Washington in April 1952, he presented his idea that planetary mirages, sundogs, reflections, and other astronomical, atmospheric, and optical phenomena probably accounted for a large percentage of the mysterious UFOs. This suggestion met with strong skepticism from some of the conferees who at that time were sympathetic to the interplanetary hypothesis and were, of course, better acquainted with military than with physical science. Other conferees, however, wished to consider and test the theories offered. Proof obviously required a knowledge of all the facts of a given sighting, facts that often were not available to the public. The Air Force therefore granted access to the file of UFO cases. At the same time, since many of the cases were then classified as secret, the Air Force imposed the condition that security regulations must be strictly observed. D.H.M. was then preparing a book to present his explanations of flying saucers. Acceptance of the Air Force offer, with the accompanying restriction, would have prevented his publishing analyses based on material in the files. It would also have hindered any future public discussion of the UFO problem. For these reasons he felt compelled to decline the opportunity.

In the spring of 1959 as we began planning the present book, we again requested permission to study the Air Force records of UFO sightings. This time the officials generously opened their files to us without restriction. Thus we have been able to include detailed studies of particular incidents, to give the explanations found for most of them by Air Force investigators, to explain the causes of some hitherto unsolved cases, and to suggest highly probable solutions for several classic "Unknowns." To discuss each one of the thousands of unidentified flying objects reported during the last fifteen years is obviously impossible. We have therefore chosen to describe the common types of sighting and to analyze some of the representative and most interesting cases in each category. In general we have avoided using the names of the persons involved; but when the names are well known to the flying-saucer public and have previously appeared in print, we have felt no obligation to disguise them. Many persons have contributed to the material in this book. Members of the United States Air Force have generously helped us to collect the basic facts, and have shown amazing patience in answering hundreds of small questions of detail. In particular, we wish to thank Col. Philip G. Evans, Col. Edward H. Wynn, Lt. Col. William T. Coleman, Lt. Col. Robert J. Friend, Lt. Col. Lawrence J. Tacker, Major Carl R. Hart, and Sgt. David Moody.

The Case for the UFO: Unidentified Flying Objects M. Jessup
 2014-05-07 This is the first ever reprint of the book that brought the entire legend of the Philadelphia Experiment into the public sphere, and created controversy for decades: "The Case For the UFO!" Why has this book been suppressed for so many years? It is a well-reasoned review of the UFO record by an eminent astromomer, mathematician, and archaeologist: Dr. M.K. Jessup. His conclusions are breathtaking and incredible, but inescapable. Description from the original dust jacket: Flying saucers are not new! For thousands of years, men have seen mysterious objects in the skies. Now, a prominent scientists proves that unidentified flying objects originate here, on Earth. If you have ever wondered about the things today's scientists do not, will not, or cannot explain, this book is for you. Such questions might be: What is the hidden meaning of the comet's tail? What caused the "Devil's Footprints" of Devonshire? Why are we wrong to think of space flight only in terms of rocket power? How was a soldier "teleported" from the Phillippine Islands to Mexico City within one hour? What force lifted 1200-ton stones in ancient Peru? How is acceleration achieved by UFOs? What caused the disappearance of the crews of the SS Sea Bird and the Marie Celeste? Was the "secret" of space flight known 50,000 years ago? What is the strange truth hidden in the ancient ruins of Baalbek? And finally, and most importantly: Are the UFOs friend, or foe? This is the original edition of "The Case For the UFO," which does NOT include the scrawled "annotations" of the infamous Carlos Allende (who may or may not have tormented Jessup into committing suicide). You will find this version much easier to read than the Varo Edition, and probably much more meaningful.

The Geography Behind History William Gordon East 1965 In this book, Professor East discusses the vital relationship between history and geographical conditions. Drawing examples from ancient times up to the present, he demonstrates that a study of history must include consideration of the physical conditions under which an event occurs, and that "the particular characteristics of this setting serve not only to localise but also to influence part at least of the action." Topographical position, climate, distribution of water and minerals, the placement of routes and towns, and ease or difficulty of movement between districts and countries are among the factors which the historian must take into account. Book jacket.

The study of man Michael Polanyi 2014-06-27 2014 Reprint of 1959 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. Michael Polanyi (1891-1976) was an eminent theorist across the fields of philosophy, physical chemistry and economics. Elected to the Royal Society and the American Academy of Arts and Sciences, his contributions to research in the social sciences, and his theories on positivism and knowledge, are of critical academic importance. The three lectures included in this comprehensive volume, first published in 1959, argue for Polanyi's principle of 'tacit knowing' as a fundamental component of knowledge. They were intended to

accompany Polanyi's earlier work, "Personal Knowledge," and as a tribute to the philosophical and educational work of Lord A. D. Lindsay.
