Hybrids of Modernity Penelope Harvey 2013-02-01 Hybrids of Modernity considers the relationship between three western modernist institutions: anthropology, the nation state and the universal exhibition. It looks at the ways in which these institutions are linked, in how they are engaged in the objectification of culture, and in how they have themselves become objects of cultural theory, the targets of critics who claim that despite their continuing visibility these are all institutions with questionable viability in the late 20th century. Through analysis of the Universal Exhibition held in seville in 1992, the themes of culture, nationality and technology are explored. Particular attention is paid to how "culture" is produced and put to work by the national and corporate participants, and to the relationship between the emergence of culture as commodity and the way in which the concept is employed in contemporary cultural theory.

Englishness and Empire 1939-1965 Wendy Webster 2007-10-11 Did loss of imperial power and the end of empire have any significant impact on British culture and identity after 1945? Within a burgeoning literature on national identity and what it means to be British this is a question that has received surprisingly little attention. Englishness and Empire makes an important and original contribution to recent debates about the domestic consequences of the end of empire. Wendy Webster explores popular narratives of nation in the mainstream media archive - newspapers, newsreels, radio, film, and television. The contours of the study generally follow stories told through prolific filmic and television imagery: the Second World War, the Coronation and Everest, colonial wars of the 1950s, and Winston Churchill's funeral. The book analyses three main narratives that conflicted and collided in the period - a Commonwealth that promised to maintain Britishness as a global identity; siege narratives of colonial wars and immigration that showed a 'little England' threatened by empire and its legacies; and a story of national greatness, celebrating the martial masculinity of British officers and leaders, through which imperial identity leaked into narratives of the Second World War developed after 1945. The book also explores the significance of America to post-imperial Britain. Englishness and Empire considers how far, and in what contexts and unexpected places, imperial identity and loss of imperial power resonated in popular narratives of nataion. As the first monograph to investigate the significance of empire and its legacies in shaping national identity after 1945, this is an important study for all scholars interested in questions of national identity and their intersections with gender, race, empire, immigration, and decolonization.

Aman 1995-08-29 This is the extraordinary first-person account of a young woman's coming of age in Somalia and her struggles against the obligations and strictures of family and society. By the time she is nine, Aman has undergone a ritual circumcision ceremony; at eleven, her innocent romance with a white boy leads to a murder; at thirteen she is given away in an arranged marriage to a stranger. Aman eventually runs away to Mogadishu, where her beauty and rebellious spirit leads her to the decadent demimonde of white colonialists. Hers is a world in which women are both chattel and freewheeling entrepreneurs, subject to the caprices of male relatives, yet keenly aware of the loopholes that lead to freedom. Aman is an astonishing history, opening a window onto traditional Somali life and the universal quest for female self-awareness.

Kenwood: The Ultimate Guide To Kitchen Tech Diana O'Carroll 2022-11-11 Established in the 1940s to produce and sell domestic labour-saving devices, Kenwood has survived and evolved to become a British icon. It is high time someone recorded (almost) everything they ever made, and put a date to it, so that future generations can make sense of what was happening in U.K. kitchens, in business, in industrial design and in manufacturing. The first item off the production line, the Turnover Toaster, was made by Roger Laurence and Kenneth Wood in 1947, and over a hundred separate domestic objects would follow over the next thirty years. Inside this book, you will find full-colour photographs, descriptions and original retail prices of these mixers, accessories and appliances, right up to the model A901 Chef, first launched in 1976. Among many others, this book covers the A100 Turnover Toaster, A200 Mixer, A700 Chef, A600 Activair, A701/A Chef, A724 Mk I and II Coffee Mills, A740 Juice Extractor, A500 Roto-Blend, A955 Kenmix Blender, A1212 Dishwasher, A520 Blender, A888 MatchMaker Rollers and A180 Sodastream. If you are a collector, historian, hobbyist, enthusiast, or just like looking at pictures of old domestic objects and lovely design, this book is for you. Inside: how they competed with the likes of Sunbeam, KitchenAid and Moulinex; from their origins in Woking to their current site in Havant; the expectations of women in the home from the 1950s, through the 1960s and into the 1970s; the restrictions upon food preparation and baking from the effects of rationing; the relative cost of these appliances to average earnings at the time; sexist advertisements; beautiful vintage kitchenware and kitchenalia; and much, much more!

Robin and Lucienne Day Lesley Jackson 2001-03 Hailed as the British counterparts to Charles and Ray Eames, Robin and Lucienne Day electrified the British design scene in the 1950s with their startling furniture and textile designs. Indeed, their influence over the next five decades has been so profound that their early products were recently reintroduced by Conran's Habitat. Lucienne Day pioneered the

introduction of modern abstract pattern design in the textile industry. Her fabrics, which oscillate between bold geometric figures and more subtle abstract patterns, were produced by companies as diverse as Heal's and Liberty of London. Robin Day's influential furniture designs pioneered the use of materials such as plywood, steel, and plastic. His stacking polypropylene chair (right) is one of the best-selling chairs in the world. Robin and Lucienne Day, the first-ever full-length monograph on their designs, features never-before-seen archival material along with over 250 color images of the full range of their work, including furniture, ceramics, textiles, wallpaper, interiors, appliances, exhibit designs, and graphics. Spanning a half-century's creative output, no designer will fail to be awed by the genius seen in this book.

Design and Cultural Politics in Postwar Britain Patrick Maguire 1997-01-01 Nine essays and a collection of documents intended as a working tool for students of the post-war period and in particular of design within the period. They discuss the textiles, pottery, and furniture industries in terms of the shifts in meaning and location during the transition from highly controlled wartime production to the more market-based structure that would become characteristic after the immediate reconstruction. Among the specific topics are the place of the exhibition in the history of design; patriotism, politics, and production; adapting utility furniture to peace-time production; and aesthetic idealism and economic reality. Heart-Shovel Jossda YIP 2018-02-11 Heart-Shovel is a ghost story haunted by love, a love story haunted by ghosts and a literary mystery propelled by the unsaid secrets of a murder of century in Hong Kong under English colony in 1976.You wont know whether its fear, love, or outright beauty making your heart beat like a drum. You wont know, and you wont believe Chinese Feng Shui is powerful enough to curse your love one in generations under the disrespected grave setting. You'll just have to keep reading. Impressive debut is a spellbinding bend of historical fiction and ghost story, made all the more believable- and harrowing- by its realistic depiction of the tenuous balance between fulfillment and sacrifice within a life. Rare force of a tale of murder in the 1800 in Virginia. A kind of tale on the mingled evils of gluttony, and brutality. Jossda has triumphed in her honesty, and the truth of her testimony by her father's dairy. The ability to distill concrete objects into languages of the greatest intensity and to sear this case in half of the decade with Zona's helping hand.

Design in Context Penny Sparke 1991 This critical account of the history and function of design sets design styles, from the eighteenth century to present day, in the context of the times that produced them and assesses what good design was at any given time and why it worked.

Bringing Modernity Home Judy Attfield 2007-06-15 Bringing Modernity Home offers a retrospective view of the development of popular taste and the beginnings of a new phase in the rise of the consumer society in the post Second World War period. It traces the change to consumer-led design after a time of grim austerity and recovery from the war while the state and production considerations held sway when consumers "couldn't afford taste". The case studies of so-called frivolous items like the cocktail cabinet, the coffee table and the rise of DIY in the working-class homes of the "new towns" gives a flavor of the

excitement and thrill they afforded designers, makers and consumers after the harsh deprivations of the war.

Cold War Modern David Crowley 2008 Modern life after 1945 seemed to promise both utopia and catastrophe. Both could, it seemed, be achieved at the 'push of a button'. Published to accompany a major V & A exhibition, 'Cold War Modern: Design 1945-1970', this book explores how the politics of the Cold War shaped architecture and design. Reassessing 'classic' designs and introducing many little-known objects. **Sixties Design** Philippe Garner 2003 A richly illustrated survey of the design themes and styles of the 1960s. Designing Modern Britain Cheryl Buckley 2007-10-01 British culture is marked by indelible icons—red double-decker buses, large oak wardrobes, and the compact sleekness of the Mini. But British industrial and product design have long lived in the shadows of architecture and fashion. Cheryl Buckley here delves into the history of British design culture, and in doing so uniquely tracks the evolution of the British national identity. Designing Modern Britain demonstrates how interior design, ceramics, textiles, and furniture craft of the twentieth century contain numerous hallmark examples of British design. The book explores topics connected to the British design aesthetic, including the spread of international modernism, the eco-conscious designs of the 1980s and 1990s, and the influence of celebrity product designers and their labels. Buckley also investigates popular nostalgia in recent times, considering how museum and gallery exhibitions have been instrumental in reimagining Britain’s past and how the heritage industry has fueled a growing trend among designers of employing images of British culture in their work. A thoughtful look at the aesthetic heritage of a nation that has left its footprint around the globe, Designing Modern Britain will be a valuable text for students and professionals in design.
