Making Content Comprehensible for English Learners Jana Echevarría 2017 "This book introduces and explains the SIOP® (Sheltered Instruction Observation Protocol) Model, a comprehensive, coherent, research-validated model of sheltered instruction, no implemented in districts throughout all 50 states and in multiple countries and territories. The SIOP Model improves teaching effectiveness and results in academic gains for students."--From the back cover.

Accidental Injury Narayan Yoganandan 2014-11-17 This book provides a state-of-the-art look at the applied biomechanics of accidental injury and prevention. The editors, Drs. Narayan Yoganandan, Alan M. Nahum and John W. Melvin are recognized international leaders and researchers in injury biomechanics, prevention and trauma medicine. They have assembled renowned researchers as authors for 29 chapters to cover individual aspects of human injury assessment and prevention. This third edition is thoroughly revised and expanded with new chapters in different fields. Topics covered address automotive, aviation, military and other environments. Field data collection; injury coding/scaling; injury epidemiology; mechanisms of injury; human tolerance to injury; simulations using experimental, complex computational models (finite element modeling) and statistical processes; anthropomorphic test device design, development and validation for crashworthiness applications in topics cited above; and current regulations are covered. Risk functions and injury criteria for various body regions are included. Adult and pediatric populations are addressed. The exhaustive list of references in many areas along with the latest developments is valuable to all those involved or intend to pursue this important topic on human injury biomechanics and prevention. The expanded edition will interest a variety of scholars and professionals including physicians, biomedical researchers in many disciplines, basic scientists, attorneys and jurists involved in accidental injury cases and governmental bodies. It is hoped that this book will foster multidisciplinary collaborations by medical and engineering researchers and academicians and practicing physicians for injury assessment and prevention and stimulate more applied research, education and training in the field of accidental-injury causation and prevention.

The Science of Overabundance William J. McShea 2003-01-17 Easily the most common of America's large wildlife species, white-tailed deer are often referred to as "overabundant." But when does a species cross the threshold from common to overpopulated? This question has been the focus of debate in recent years among hunters, animal rights activists, and biologists. William McShea and his colleagues explore every aspect of the issue in *The Science of Overabundance*. Are there really too many deer? Do efforts to control deer populations really work? What broader lessons can we learn from efforts to understand deer population dynamics? Through twenty-three chapters, the editors and contributors dismiss widely held lore and provide solid information on this perplexing problem.

Invasive Species in Forests and Rangelands of the United States Therese M. Poland 2021-02-01 This open access book describes the serious threat of invasive species to native ecosystems. Invasive species have caused and will continue to cause enormous ecological and economic damage with ever increasing world trade. This multi-disciplinary book, written by over 100 national experts, presents the latest research on a wide range of natural science and social science fields that explore the ecology, impacts, and practical tools for management of invasive species. It covers species of all taxonomic groups from insects and pathogens, to plants, vertebrates, and aquatic organisms that impact a diversity of habitats in forests, rangelands and grasslands of the United States. It is well-illustrated, provides summaries of the most important invasive species and issues impacting all regions of the country, and includes a comprehensive primary reference list for each topic. This scientific synthesis provides the cultural, economic, scientific and social context for addressing environmental challenges posed by invasive species and will be a valuable resource for scholars,

policy makers, natural resource managers and practitioners.

Bats of the United States and Canada Michael J. Harvey 2011-12-01 Honorable Mention, Popular Science, 2012 PROSE Awards, Professional and Scholarly Publishing Division of the Association of American Publishers The only mammals capable of true flight, bats are among the world's most fascinating creatures. This accessible guide to the forty-seven species of bats found in the United States and Canada captures and explains the amazing diversity of these marvels of evolution. A wide variety of bat species live in the United States and Canada, ranging from the California leaf-nosed bat to the Florida bonneted bat, from the eastern small-footed bat to the northern long-eared bat. The authors provide an overview of bat classification, biology, feeding behavior, habitats, migration, and reproduction. They discuss the ever-increasing danger bats face from destruction of habitat, wind turbines, chemical toxicants, and devastating diseases like white-nose syndrome, which is killing millions of cave bats in North America. Illustrated species accounts include range maps and useful identification tips. Written by three of the world's leading bat experts and featuring J. Scott Altenbach's stunning photographs, this fact-filled and easy-to-use book is the most comprehensive and up-to-date account of bats in the U.S. and Canada.

Expanding Underrepresented Minority Participation Institute of Medicine 2011-07-29 In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. *Expanding Underrepresented Minority Participation* explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. *Expanding Underrepresented Minority Participation* suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

Inside Graduate Admissions Julie R. Posselt 2016-01-11 How does graduate admissions work? Who does the system work for, and who falls through its cracks? More people than ever seek graduate degrees, but little has been written about who gets in and why. Drawing on firsthand observations of admission committees and interviews with faculty in 10 top-ranked doctoral programs in the humanities, social sciences, and natural sciences, education professor Julie Posselt pulls back the curtain on a process usually conducted in secret. "Politicians, judges, journalists, parents and prospective students subject the admissions policies of undergraduate colleges and professional schools to considerable scrutiny, with much public debate over appropriate criteria. But the question of who gets into Ph.D. programs has by comparison escaped much discussion. That may change with the publication of *Inside Graduate Admissions*...While the departments reviewed in the book remain secret, the general process used by elite departments would now appear to be more open as a result of Posselt's book." —Scott Jaschik, *Inside Higher Ed* "Revealing...Provide[s] clear, consistent insights into what admissions committees look for." —Beryl Lieff Benderly, *Science* *The Silver Canvas* Bates Lowry 2000-02-03 By the middle of the nineteenth century, the most common method of photography was the daguerreotype—Louis Jacques Mandé Daguerre's miraculous invention that captured in a camera visual images on a highly polished silver

surface through exposure to light. In this book are presented nearly eighty masterpieces—many never previously published—from the J. Paul Getty Museum's extensive daguerreotype collection.

Research-Based Learning: Case Studies from Maastricht

University Ellen Bastiaens 2017-03-20 This book describes lessons learned from the implementation of research based learning at Maastricht University. Well-known for its problem based learning (PBL) educational model, Maastricht University implemented research-based learning (RBL) as a new educational concept in addition to PBL, around 2009. The model has taken the shape of an excellence programme offering third-year bachelor students an opportunity to conduct academic research together with academic staff. The introduction of the research-based learning concept into the programmes of all Maastricht University's faculties has resulted in a range of RBL models that vary to fit the various disciplines and programmes offered by the faculties. The book first presents theoretical models and a description of the concepts of research-based learning and undergraduate research (UGR). Next, by means of case studies, it describes the formulas developed to suit the various programmes, the challenges encountered, the initial reservations on the part of the staff, the limitations caused by regulations and demands of the curricula, as well as the successes and results of the excellence programme. The disciplines described in the case studies include psychology and neuroscience, knowledge engineering, social and cultural sciences, law, and business and economics.

Privilege of Parenting Bruce Dolan (Psy.D.) 2011-12 A clinical psychologist with 19 years of experience working with kids from all walks of life—from deeply troubled children mired in LA's child welfare system to the privileged scions of the Beverly Hills elite—Dr. Dolin delivers a practical, compassionate guide for parents that will help children thrive through their most difficult passages. For it is when our children are at their worst—depressed, anxious, defiant, angry or fearful—that we are called upon to do our best. More than just a guide to mindful parenting, "Privilege of Parenting" provides a veritable toolkit for parents dealing with problem behaviors ranging from everyday sadness and fears to severe clinical issues. In every case, Dr. Dolin frames each behavior, discusses causes and contributing factors, and then distills the essence of what helps. He illustrates his advice with extraordinary—and moving—anecdotes of the children and families with whom he has worked. This is a book that is inspiring, instructive and a pleasure to read. Dr. Dolin's approach represents a kind of "yoga of parenting." Not surprisingly, yoga is among Dr. Dolin's various prescriptions. All parents love their children. "Privilege of Parenting" will help readers transform the abiding love they have for their children into compassionate, insightful and consistent parenting. Privilege of Parenting is a psychological guide that helps parents build—and repair—nourishing and empathic relationships with their children. "Privilege of Parenting" equips parents with deeper insights into the fears and blind-spots that hinder us as parents and gives guidelines, approaches and strategies for getting it right with our kids as well as tools for personal growth in the service of better parenting. "Privilege of Parenting" is not only a "how-to" but ultimately a "why to" book that likens parenting to yoga and helps the reader realize that in parenting as their best Self, they are inherently following an often overlooked path to potential happiness, wellness and spirit.

High-impact Educational Practices George D. Kuh 2008 This publication—the latest report from AAC&U's Liberal Education and America's Promise (LEAP) initiative—defines a set of educational practices that research has demonstrated have a significant impact on student success. Author George Kuh presents data from the National Survey of Student Engagement about these practices and explains why they benefit all students, but also seem to benefit underserved students even more than their more advantaged peers. The report also presents data that show definitively that underserved students are the least likely students, on average, to have access to these practices.

Riparian Areas National Research Council 2002-10-10 The Clean Water Act (CWA) requires that wetlands be protected from degradation because of their important ecological functions including maintenance of high water quality and provision of fish and wildlife habitat. However, this protection generally does not encompass riparian areas—the lands bordering rivers and lakes—even though they often provide the same functions as wetlands. Growing recognition of the similarities in wetland and riparian area functioning and the differences in their legal protection led the NRC in 1999 to undertake a study of riparian areas, which has culminated in *Riparian Areas: Functioning and Strategies for Management*. The report is intended to heighten awareness of riparian

areas commensurate with their ecological and societal values. The primary conclusion is that, because riparian areas perform a disproportionate number of biological and physical functions on a unit area basis, restoration of riparian functions along America's waterbodies should be a national goal.

Generation Z Goes to College Corey Seemiller 2015-12-28 Say Hello to Your Incoming Class—They're Not Millennials Anymore Generation Z is rapidly replacing Millennials on college campuses. Those born from 1995 through 2010 have different motivations, learning styles, characteristics, skill sets, and social concerns than previous generations. Unlike Millennials, Generation Z students grew up in a recession and are under no illusions about their prospects for employment after college. While skeptical about the cost and value of higher education, they are also entrepreneurial, innovative, and independent learners concerned with effecting social change. Understanding Generation Z's mindset and goals is paramount to supporting, developing, and educating them through higher education. *Generation Z Goes to College* showcases findings from an in-depth study of over 1,100 Generation Z college students from 15 vastly different U.S. higher education institutions as well as additional studies from youth, market, and education research related to this generation. Authors Corey Seemiller and Meghan Grace provide interpretations, implications, and recommendations for program, process, and curriculum changes that will maximize the educational impact on Generation Z students. *Generation Z Goes to College* is the first book on how this up-and-coming generation will change higher education.

Researching Writing Joyce Kinkead 2015-07-21 *Researching Writing* is an accessible, informative textbook that teaches undergraduates how to conduct ethical, authentic research in writing studies. The book introduces students to the research approaches used most often and offers a course framework for professors creating or teaching research courses themselves. Author Joyce Kinkead lays out the research process, including finding and defining questions, planning, and starting the research. Expository content introduces the language and methods of writing research, and specific methods are demonstrated in published examples, illustrating student work using student work and showing that it is possible for students to join the scholarly conversation in writing studies. Other features include student activities, instructor resources, student resources, and links to external content on journal websites, digital publications, YouTube, and similar work. The first-ever textbook for research methods in writing studies for undergraduates, *Researching Writing* takes a hands-on approach that excites and engages students in the depth and complexities of research and will influence the creation of courses in new writing majors as the field continues to grow.

A Concise Introduction to Logic Patrick J. Hurley 2007-10 Tens of thousands of students have learned to be more discerning at constructing and evaluating arguments with the help of Patrick J. Hurley. Hurley's lucid, friendly, yet thorough presentation has made *A CONCISE INTRODUCTION TO LOGIC* the most widely used logic text in North America. In addition, the book's accompanying technological resources, such as CengageNOW and Learning Logic, include interactive exercises as well as video and audio clips to reinforce what you read in the book and hear in class. In short, you'll have all the assistance you need to become a more logical thinker and communicator.

Beyond Foundations Thomas J. Grites 2016-08-30 Sharpen advising expertise by exploring critical issues affecting the field *Beyond Foundations*, a core resource for experienced academic advisors, gives practitioners insight into important issues affecting academic advising. In addition to gaining understanding of foundational concepts and pressing concerns, master advisors engage with case studies to clarify their roles as educators of students, as thought leaders in institutions, and as advocates for the profession. Pillar documents—the NACADA Core Values, NACADA Concept of Academic Advising, and CAS Standards—serve as sources of both information and inspiration for those seeking to improve advising. New strategies inform advisors helping a diverse student population delineate meaningful educational goals. Each chapter prompts productive discussions with fellow advisors interested in cultivating advising excellence. To promote advisor influence in higher education, experienced contributors explain new trends—including the impact of external forces and legal issues on postsecondary institutions—and the evolution of advising as a profession and a field of inquiry. Expert insight and practical focus contribute to the development of experienced advisors. Use existing resources in new

ways to master advising roles and encourage student success Apply theory to advance advising practice Create and optimize professional development opportunities Establish recognition for the contributions of academic advisors to the institution and higher education Face challenges created by the changing higher education landscape Advisors must meet the expectations of students, parents, faculty members, administrators, and outside agencies, all while navigating an increasingly complex range of issues presented by a student population unlike any that has come before. Beyond Foundations provides the insight and clarity advisors need to help students achieve their educational goals and to advance the field.

College Learning for the New Global Century Association of American Colleges and Universities 2007 "College Learning for the New Global Century, published through the LEAP (Liberal Education and America's Promise) initiative, spells out the essential aims, learning outcomes, and guiding principles for a 21st century college education. It reports on the promises American society needs to make - and keep - to all who seek a college education and to the society that will depend on graduates' future leadership and capabilities." -- Foreword (p. vii).

New Developments in Pathways Towards Diversity and Inclusion in STEM: A United States Perspective Alexander Gates 2022-10-17

The Louis Stokes Alliances for Minority Participation (LSAMP) program of the US National Science Foundation has been a primary force for raising the success and graduation of minority students in STEM for 30 years. Increasing the number of underrepresented students earning baccalaureate degrees, and entering graduate school in STEM is the goal of LSAMP. This goal has been nearly achieved through the formation of alliances of degree granting institutions of higher learning, varying from community colleges to major research institutions. Currently there are 59 alliances including more than 400 institutions. LSAMP is responsible for more than 650,000 bachelor's degrees earned by minority students in STEM. The papers for this Research Topic should focus on the use of LSAMP activities, programs and collaborations to develop pathways to success and graduation of STEM majors from minority groups that underrepresented in STEM. These pathways can include any segment from pre-college through graduate school. Areas of special interest include mentoring, research experiences, transitions between levels and novel approaches for retention. The studies should be research based and rigorous. They can be pure research studies, curriculum and design or literature reviews but they must be at a cutting edge level and be subject to detailed review and assessment.

Critical Approaches to the Study of Higher Education Ana M.

Martínez-Alemán 2015-06 An essential guide to incorporating critical research into higher education scholarship. Winner of the Outstanding Publication Award of the Post-secondary Education Division of the American Educational Research Association Critical theory has much to teach us about higher education. By linking critical models, methods, and research tools with an advocacy-driven vision of the central challenges facing postsecondary researchers and staff, Critical Approaches to the Study of Higher Education makes a significant—and long overdue—contribution to the development of the field. The contributors argue that, far from being overly abstract, critical tools and methods are central to contemporary scholarship and can have practical policy implications when brought to the study of higher education. They argue that critical research design and critical theories help scholars see beyond the normative models and frameworks that have long limited our understanding of students, faculty, institutions, the organization and governance of higher education, and the policies that shape the postsecondary arena. A rigorous and invaluable guide for researchers seeking innovative approaches to higher education and the morass of traditionally functionalist, rational, and neoliberal thinking that mars the field, this book is also essential for instructors who wish to incorporate the lessons of critical scholarship into their course development, curriculum, and pedagogy.

Understanding and Treating Fear of Pain Gordon J. G. Asmundson 2004 People who suffer from chronic pain are typically found to be more anxious and fearful of pain than those who do not. Recent evidence has shown that the fear itself serves as a mechanism through which chronic pain is maintained over time. Even once the muscle or tissue damage is healed, a fear of further pain can lead to avoidance behaviour, which over time, leads to deconditioning (e.g. decreased mobility, weight gain). This in turn leads to further pain experiences, negative expectancies, and strengthened avoidance. It is the reciprocal relationship between fear

and avoidance that is thought to be responsible for maintaining pain behaviour and disability. With fear of pain known to cause significant suffering and functional disability, there is a need for a greater understanding of this condition. This is the first book to explore this topic. It starts by introducing the current theoretical positions regarding pain-related fear and anxiety along with relevant empirical findings. It then provides comprehensive coverage of assessment issues and treatment strategies. Finally, the book suggests further areas for investigation. Pain-related fear and anxiety are now receiving considerable attention, and efficient and effective treatments are fast becoming available. This book will help guide and extend our understanding of a condition that has been shown to be associated with substantial suffering and disability.

Satiric Advice on Women and Marriage Warren S. Smith 2010-02-24

Advice on sex and marriage in the literature of antiquity and the middle ages typically stressed the negative: from stereotypes of nagging wives and cheating husbands to nightmarish visions of women empowered through marriage. Satiric Advice on Women and Marriage brings together the leading scholars of this fascinating body of literature. Their essays examine a variety of ancient and early medieval writers' cautionary and often eccentric marital satire beginning with Plautus in the third century B.C.E. through Chaucer (the only non-Latin author studied). The volume demonstrates the continuity in the Latin tradition which taps into the fear of marriage and intimacy shared by ancient ascetics (Lucretius), satirists (Juvenal), comic novelists (Apuleius), and by subsequent Christian writers starting with Tertullian and Jerome, who freely used these ancient sources for their own purposes, including propaganda for recruiting a celibate clergy and the promotion of detachment and asceticism as Christian ideals. Warren S. Smith is Professor of Classical Languages at the University of New Mexico.

Trends in Teaching Experimentation in the Life Sciences Nancy J.

Pelaez 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence-based strategies for teaching biological experimentation to thereby improve existing and develop new curricula. It unveils the flawed assumptions made at the classroom, department, and institutional level about what students are learning and what help they might need to develop competence in biological experimentation. Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist. It includes explicit evidence-based guidelines for educators regarding the teaching, learning, and assessment of biological research competencies. The book also provides practical teacher guides and exemplars of assignments and assessments. It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain. This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence-based decision-making around public policy. It will be beneficial to life science instructors, biology education researchers and science administrators who aim to improve teaching in life science departments. Chapters 6, 12, 14 and 22 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Athlete Activism Rory Magrath 2021-11-24 This book examines the phenomenon of athlete activism across all levels of sport, from elite and international sport, to collegiate and semi-pro, and asks what this tells us about the relationship between sport and wider society. With contributions from scholars around the world, the book presents a series of fascinating case studies, including the activism of world-famous athletes such as Serena Williams, Megan Rapinoe and Raheem Sterling. Covering a broad range of sports, from the National Football League (NFL) and Australian Rules, to fencing and the Olympic Games, the book sheds important light on some of the most important themes in the study of sport, including gender, power, racism, intersectionality and the rise

of digital media. It also considers the financial impact on athletes when they take a stand and the psychological impact of activism and how that might relate to sports performance. It has never been the case that 'sport and politics don't mix', and now, more than ever, the opposite is true. This is essential reading for anybody with an interest in the politics or sociology of sport, the politics of protest, social movements or media studies.

Mindfulness J. Mark G. Williams 2013-10-18 Mindfulness-based approaches to medicine, psychology, neuroscience, healthcare, education, business leadership, and other major societal institutions have become increasingly common. New paradigms are emerging from a confluence of two powerful and potentially synergistic epistemologies: one arising from the wisdom traditions of Asia and the other arising from post-enlightenment empirical science. This book presents the work of internationally renowned experts in the fields of Buddhist scholarship and scientific research, as well as looking at the implementation of mindfulness in healthcare and education settings. Contributors consider the use of mindfulness throughout history and look at the actual meaning of mindfulness whilst identifying the most salient areas for potential synergy and for potential disjunction. *Mindfulness: Diverse Perspectives on its Meanings, Origins and Applications* provides a place where wisdom teachings, philosophy, history, science and personal meditation practice meet. It was originally published as a special issue of *Contemporary Buddhism*.

Strategies for Supporting Inclusion and Diversity in the Academy

Gail Crimmins 2020-06-29 This book explores tried and tested strategies that support student and faculty engagement and inclusion in the academy. These strategies are anchored by a brief exploration of the history and effect/s of exclusion and deprive in higher education. However, while many publications exploring academic inequality focus on the causes and impacts of structural, psychological and cultural exclusion based on racism, sexism, classism and ableism, they rarely engage in interventions to expose and combat such de/privilege. Capturing examples of inclusive practices that are as diverse as student and faculty populations, these strategies can be easily translated and employed by organisations, collectives and individuals to recognise and combat social and academic exclusion within higher education environments.

Promoting Positive Outcomes Arthur J. Reynolds 1999 In recent years, issues affecting children and youth have received increased attention at the national and local levels, with numerous reports detailing challenges and offering solutions. Targeted toward policymakers, practitioners, scholars, and those seeking understanding of ideas for social and educational reform, this book focuses on promising solutions to problems facing today's children and youth in urban and other settings, with special consideration to education and child development programs, policies, and practices. Each chapter, written by a variety of experts in social, educational, and health sciences, summarizes and integrates research in a particular area and discusses implications of the research for program and policy development. The introductory chapter highlights major themes, and the remaining chapters describe conditions and interventions that enhance prospects of children and youth, focusing on home, school, and community contexts. The chapters are: (1) "Introduction and Overview" (Arthur J. Reynolds, Herbert J. Walberg, and Roger P. Weissberg); (2) "Developmental Theory as a Basis for Policy" (Olivia N. Saracho); (3) "Early Childhood Development" (Douglas R. Powell); (4) "Building Relationships for Learning" (Dorothy Rich); (5) "School-Family Partnerships" (Evanthia N. Patrikakou, Roger P. Weissberg, and Michelle I. Rubenstein); (6) "Using Motivational Theory to Guide School Reform" (Carol Midgley and Martin L. Maehr); (7) "Promoting Safe Educational and Community Environments" (David W. Johnson and Roger T. Johnson); (8) "Preventing Drug Abuse" (Gilbert J. Botvin and Kenneth W. Griffin); (9) "Promoting Excellence in American Adolescents" (Toni Falbo and Robert W. Glover); (10) "Promoting Literacy and the Concept of Possibility" (Vivian L. Gadsden, Wanda Brooks, and Jacqueline K. Jackson); (11) "Preparing Youth for the Work Force" (Stephen F. Hamilton); (12) "Psychological and Educational Resilience" (Margaret C. Wang, Geneva D. Haertel, and Herbert J. Walberg). Each chapter contains references. (KB)

Traumatic Brain Injury Jennie Ponsford 1995 All practitioners working with traumatically brain-injured (TBI) individuals and their families will find this book an invaluable resource. Based on scientific evidence and extensive clinical experience, it provides comprehensive and practical guidelines for the assessment and management of a wide range of problems associated with TBI. The book begins with a discussion of mechanisms and sequelae of TBI, outlining the recommended approach to rehabilitation, termed the REAL Approach. This signifies Rehabilitation for Everyday Adaptive Living, the essence of which is effective teamwork, focusing on the real world, involvement of the injured person and family, and taking a long-term view of the rehabilitation process. Reflecting the expertise of the authors in the domains of clinical neuropsychology, occupational therapy, and speech pathology, a broad spectrum of issues is covered, including assessment and management of coma and post-traumatic amnesia, ongoing cognitive problems, communication and interpersonal difficulties, and behaviour change. Issues involved in returning to the community are addressed, including return to independent living, work, study, leisure interests, and driving. The nature and methods of assisting with a range of adjustment difficulties are explored, as well as the impact of TBI on families. The final chapter discusses the special needs of children who sustain TBI. The Trials of Evidence-based Education Stephen Gorard 2017-06-26 The Trials of Evidence-based Education explores the promise, limitations and achievements of evidence-based policy and practice, as the attention of funders moves from a sole focus on attainment outcomes to political concern about character-building and wider educational impacts. Providing a detailed look at the pros, cons and areas for improvement in evidence-based policy and practice, this book includes consideration of the following: What is involved in a robust evaluation for education. The issues in conducting trials and how to assess the trustworthiness of research findings. New methods for the design, conduct, analysis and use of evidence from trials and examining their implications. What policy-makers, head teachers and practitioners can learn from the evidence to inform practice. In this well-structured and thoughtful text, the results and implications of over 20 studies conducted by the authors are combined with a much larger number of studies from their systematic reviews, and the implications are spelled out for the research community, policy-makers, schools wanting to run their own evaluations, and for practitioners using evidence.
