The End of the Cold War Michael J. Hogan 1992-06-26 This book, first published in 1992, examines the end of the Cold War and the implications for the history and future of the world order.

War and the Media Philip M. Taylor 1992 The Gulf War of 1991 was the highest profile media war in history. Never before had so many journalists attempted to cover a war from both sides of the conflict. This book traces the role of the media in the Gulf War and examines the attempts by both the coalition and Iraq to influence public opinion through propaganda and persuasion. Philp Taylor asks how much the public was being told and how much was held back. Analyzing the key news stories of the conflict he looks at the efforts of the American-led coalition to persuade television audiences and newspaper readers to take a "right view" of what was happening and of the Iraqi government's propaganda campaigns concerning civilian damage and the "Mother of all Battles."

The Origins of the Cold War in the Near East Bruce Robellet Kuniholm

2014-07-14 Bruce Kuniholm takes a regional perspective to focus on postwar diplomacy in Iran, Turkey, and Greece and efforts in these countries to maintain their independence from the Great Powers.

Drawing on a wide variety of secondary sources, government documents, private papers, unpublished memoirs, and extensive interviews with key figures, he shows how the traditional struggle for power along the Northern Tier was a major factor in the origins and development of the Cold War between the U.S. and the U.S.S.R. Originally published in 1980. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

A History of Broadcasting in the United States Erik Barnouw 1966-12-29

Tells how radio and television became an integral part of American life, of how a toy became an industry and a force in politics, business, education, religion, and international affairs.

The Imaginary War Guy Oakes 1994 "Duck and cover" are unforgettable words for a generation of Americans who listened throughout the Cold War to the unescapable propaganda of civil defense. Yet it would have been impossible to protect Americans from a real nuclear attack and, as Guy Oakes shows in The Imaginary War, national security officials knew it. Oakes contends that the real purpose of 1950s civil defense programs was not to protect Americans from the bomb, but to ingrain in them the moral resolve needed to face the hazards of the Cold War. Uncovering the links between national security, civil defense, and civic ethics, Oakes reveals three sides to the civil defense program: a system of emotional management designed to control fear; the fictional construction of a manageable world of nuclear attack; and the production of a Cold War ethic rooted in the mythology of the home, the ultimate sanctuary of American values. This fascinating analysis of the culture of civil defense is a strong indictment of the official mythmaking of the Cold War. It will be essential reading for all those interested in American history, politics, and cultural studies.

Taiwan's Informal Diplomacy and Propaganda Gary D. Rawnsley

2000-03-28 How do governments that do not enjoy formal diplomatic relations use propaganda? When a government is denied recognition by the international community, it must explore every avenue of publicity available to project its image and policies. For such actors, propaganda can become diplomacy out of necessity. The Republic of China on Taiwan is such a government, and its predicament is the subject of this book. It discusses the relationship between diplomacy and propaganda from an exciting new perspective, illustrated by a fascinating case-study.

The Cold War as Rhetoric Lynn B. Hinds 1991-09-30 Rhetoric, Lynn Boyd

Hinds and Theodore Windt argue, is central to shaping both political consciousness and political culture. In this important new contribution to Praeger's Series in Political Communication, they examine how the rhetoric of the early Cold War years was used to create and develop a national and international reality. The pervasive political view of events, motives, actions, and policy was largely created in the years between 1945 and 1950 and grew from a pre-existing set of rhetorical beliefs as well as from the political speeches and pronouncements of the time. Hinds and Windt focus their study on American rhetoric applied to Soviet-American relations, centering essentially on Europe. They offer a brief outline of the theoretical principles used in their analysis, and follow with a look at certain images of the USSR selected for use by American politicians. In subsequent chapters, the authors trace developments from the end of World War II to Winston Churchill's Iron Curtain speech, thoroughly explore the British leader's address and its effect in dividing the world into two warring camps, analyze the writing and presentation of the 1947 Truman Doctrine and its suggestion of two ways of life, and detail the Truman Loyalty Program and the 1947 House Committee on Un-American Activities hearings in Hollywood. The remaining chapters discuss George Marshall's address originating the European Recovery Act, George Kennan's Sources of Soviet Conduct, contemporary critics, and such proofs as the Korean War, which showed the rhetoric to be correct. This work will be an important reference tool for courses in political communication, American history, political science, and presidential studies, and a useful addition to library collections.

The Voice of America Holly Cowan Shulman 1990 Alarmed by the reach and power of Nazi propaganda, President Roosevelt in 1941 authorized the creation of the office that became the Overseas Branch of the Office of War Information - the Voice of America. In this history, Holly Cowan Shulman provides an account to date of how America's wartime propaganda policy evolved. Working from the original radio scripts, personal interviews with former members of OWI and their families, and from extensive archival research in both the United States and Great Britain, she analyzes the cultural myths and symbols reworked by the VOA into instruments of propaganda: a vision of America as the innocent giant whose mission was to save war-torn Europe.

Containment and the Cold War: American Foreign Policy Since 1945

Thomas G. Paterson 1973

The Devil We Knew H. W. Brands 1994-10-20 In the late 1950s, Washington was driven by its fear of communist subversion: it saw the hand of Kremlin behind developments at home and across the globe. The FBI was obsessed with the threat posed by American communist party--yet party membership had sunk so low, writes H.W. Brands, that it could have fit "inside a high-school gymnasium," and it was so heavily infiltrated that J. Edgar Hoover actually contemplated using his informers as a voting bloc to take over the party. Abroad, the preoccupation with communism drove the White House to help overthrow democratically elected governments in Guatemala and Iran, and replace them with dictatorships. But by then the Cold War had long since blinded Americans to the ironies of their battle against communism. In The Devil We Knew, Brands provides a witty, perceptive history of the American experience of the Cold War, from Truman's creation of the CIA to Ronald Reagan's creation of SDI. Brands has written a number of highly regarded works on America in the twentieth century; here he puts his experience to work in a volume of impeccable scholarship and exceptional verve. He turns a critical eye to the strategic conceptions (and misconceptions) that led a once-isolationist nation to pursue the war against communism to the most remote places on Earth. By the time Eisenhower left office, the United States was fighting communism by backing dictators from Iran to South Vietnam, from Latin America to the Middle East--while engaging in covert operations the world over. Brands offers no apologies for communist behavior, but he deftly illustrates the strained thinking that led Washington to commit gravely disproportionate resources (including tens of thousands of lives in Korea and Vietnam) to questionable causes. He keenly analyzes the changing policies of each administration, from Nixon's juggling (SALT talks with Moscow, new relations with Ccmmunist China, and bombing North Vietnam) to Carter's confusion to Reagan's laserrattling. Equally important is his incisive, often amusing look at how the anti-Soviet

struggle was exploited by politicians, industrialists, and government agencies. He weaves in deft sketches of figures like Barry Goldwater and Henry Jackson (who won a Senate seat with the promise, "Many plants will be converting from peace time to all-out defense production"). We see John F. Kennedy deliver an eloquent speech in 1957 defending the rising forces of nationalism in Algeria and Vietnam; we also see him in the White House a few years later, ordering a massive increase in America's troop commitment to Saigon. The book ranges through the economics and psychology of the Cold War, demonstrating how the confrontation created its own constituencies in private industry and public life. In the end, Americans claimed victory in the Cold War, but Brands's account gives us reason to tone down the celebrations. "Most perversely," he writes, "the call to arms against communism caused American leaders to subvert the principles that constituted their country's best argument against communism." This far-reaching history makes clear that the Cold War was simultaneously far more, and far less, than we ever imagined at the time.

The Projection of Britain Philip M. Taylor 1981-09-17 This book traces the origins and early development of what are today loosely termed Britain's Overseas Information Services. It examines how, at the end of the First World War, the British government came to forfeit the considerable lead it had established in propaganda since 1914, and the reasons why it had gradually to re-enter the field during the inter-war years as a direct response to totalitarianism. It surveys the pioneering work of the Foreign Office News Department and its important press office, the commercial propaganda conducted by the Empire Marketing Board and the Travel Association, the foundation and rapid peacetime growth of the British Council to conduct 'cultural diplomacy', and the beginning of the BBC's World Service with the inauguration of foreign-language broadcasts in 1938.

Radio Diplomacy and Propaganda Gary D. Cold-War Propaganda in the 1950s Gary D. Rawnsley 2016-07-27 This volume concerns the origins, organisation and method of British, American and Soviet propaganda during the 1950s. Drawing upon a range of archival material which has only been accessible to researchers in the last few years, the authors discuss propaganda's international and domestic dimensions, and chart the development of a shared Cold War culture. They demonstrate how the structures of propaganda which were organised at this time endured, giving shape and meaning to the remaining years of the Cold War.

An ideal textbook for all international courses covering media and communication studies. Considers the history of propaganda and how it has become increasingly pervasive due to access to ever-complex and versatile media. Written in an accessible style and format, this book has proven its appeal to the general reader as the public becomes more and more cynical of the manipulations of the political sphere.

Sovereignty Games R. Adler-Nissen 2008-11-24 This book offers an in-depth examination of the strategic use of State sovereignty in contemporary European and international affairs and the consequences of this for authority relations in Europe and beyond.
