Rule-Formulation and Binding Precedent in the Madhhab-Law Tradition Talal Al-Azem 2016-11-07 In Rule-Formulation and Binding Precedent in the Madhhab-Law Tradition, Talal Al-Azem argues for the existence of a madhhab-law tradition’ of jurisprudence underpinning the four post-classical Sunni schools of law. This tradition celebrated polyvalence by preserving the multiplicity of conflicting opinions within each school, while simultaneously providing a process of rule formulation (tarjīḥ) by which one opinion is chosen as the binding precedent (taqlīd). The predominant forum of both activities, he shows, was the legal commentary. Through a careful reading of Ibn Qutlūbughā's (d. 879/1474) al-Taṣḥīḥ wa-al-tarjīḥ, Al-Azem presents a new periodisation of the Ḥanafī madhhab, analyses the theory of rule formulation, and demonstrates how this madhhab-law tradition facilitated both continuity and legal change while serving as the basis of a pluralistic Mamluk judicial system.

Juristic Concept of the Validity of Statutory Law Andrzej Grabowski 2013-06-24 This book presents the theory of the validity of legal norms, aimed at the practice of law, in particular the jurisdiction of the constitutional courts. The postpositivist concept of the validity of statutory law, grounded on a critical analysis of the basic theories of legal validity elaborated up to now, is introduced. In the first part of the book a contemporary German nonpositivist conception of law developed by Ralf Dreier and Robert Alexy is analysed in order to answer the question whether the juristic concept of legal validity should include moral standards or criteria. In the second part, a postpositivist concept of legal validity and an innovative model of validity discourse, based on the juristic presumption of the validity of legal norms, are proposed. The book is a work on analytical legal theory, written from a postpositivist, detached point of view.

Private Households and Public Politics in 3rd-5th Century Jewish Palestine Alexei Sivertsev 2002 Alexei Sivertsev examines the nature of the Jewish aristocratic households and their public functions during the later Roman and Byzantine periods (third to fifth centuries C.E.). The author first discusses the nature of the Jewish patriarchate during the third century C.E. He argues that the family of patriarchs (nesi'im) is best understood as a local city-based aristocratic clan. It emerged, along with other contemporary clans, as a result of the gradual conversion of the national aristocracy of the once independent Judean state into the municipal aristocracy of the Roman province of Palaestina in the course of the first to second centuries C.E.In the second part of this book Alexei Sivertsev addresses the specific public functions performed by Jewish aristocratic clans, such as judicial, religious, administrative and legislative. He also demonstrates the continuity that existed in this respect between the Second Commonwealth aristocratic clans and those of the rabbinic period. Finally, the third part of this study deals with the process leading to the integration of the local native aristocracies of the Roman Near East into the centralized administrative system created by the Emperors, starting with Constantine the Great. This process is analyzed specifically regarding the example of the Jewish ruling elite. The main question in this section is the degree to which the local administrative apparatus of the newly created Byzantine bureaucracy developed out of the traditional and clan-based public institutions which had existed locally throughout the Roman period.

Principles of Law M.E. Bayles 2012-12-06 During the last half of the twentieth century, legal philosophy (or legal theory or jurisprudence) has grown significantly. It is no longer the do main of a few isolated scholars in law and philosophy. Hundreds of scho lars from diverse fields attend international meetings on the subject. In some universities, large lecture courses of five hundred students or more study it. The primary aim of the Law and Philosophy Library is to present some of the best original work on legal philosophy from both the Anglo American and European traditions. Not only does it help make some of the best work available to an international audience, but it also en courages increased awareness of, and interaction between, the two major traditions. The primary focus is on full-length scholarly monographs, although some eidted volumes of original papers are also included. The Library editors are assisted by an Editorial Advisory Board of inter nationally renowned scholars.

Handbook on the Rule of Law Christopher May 2018-08-31 The discussion of the norm of the rule of law has broken out of the confines of jurisprudence and is of growing interest to many non-legal researchers. A range of issues are explored in this volume that will help non-specialists with an interest in the rule of law develop a nuanced understanding of its character and political implications. It is explicitly aimed at those who know the rule of law is important and while having little legal background, would like to know more about the norm.

Promises of States under International Law Christian Eckart 2012-01-10 Textbooks on international law, dicta of the International Court of Justice and the International Law Commission's 'Guiding Principles applicable to unilateral declarations of states capable of creating legal obligations' of 2006, all reflect the fact that in international law a state's unilateral declaration can create a legally binding obligation. Unilateral declarations are common, as a look at the weekly headlines of any major newspaper will reveal. Many of the declarations made at the highest level are, of course, vaguely expressed and carry no tangible legal commitment. But others deliver a very clear message: for instance the US's April 2010 declaration on its future use of nuclear weapons or Kosovo's declaration of independence and pledge to follow the Ahtisaari Plan, are two recent and prominent examples of unilateral declarations at the international level. The same sources, however, also reveal that while state promises are accepted as a means for states to create full blown legal commitments, the law governing such declarations is far from clear. This monograph fills a gap in international legal scholarship by raising and answering the question of the precise legal value of such pledges in the realm of public international law. After a brief introduction state promises in international law are defined and contrasted with other unilateral acts of states, and the history of promises in state practice and court decisions is delineated, together with scholarly opinion. The book then provides a detailed picture of the international legal framework governing promises of states, and ends with a brief assessment of the *raison d'être* for promises as a binding mechanism in international law, along with their advantages and disadvantages in comparison with the classical mechanism for assuming international obligations - the international treaty. This is currently the only book to present a comprehensive overview of the legal effect of promises by states in international law.

East Asian Regionalism from a Legal Perspective Tamio Nakamura 2009-06-08 Plenty has been written about the political and economical aspects of regionalism, but the legal perspective has been neglected. East Asian Regionalism From a Legal Perspective is unique in synthesizing legal, economic and political analyses. In the first part, the book investigates the current features of regionalism from a comparative perspective, looking at economic and currency cooperation and comparing Asian regionalism with Europe and Latin America. In the second part, the contributors go on to look at the present legal features

of regionalism, covering institutional frameworks, trade diversity and regional integration. The third part of the book is truly unique in proposing an essential groundwork for the institutionalisation of an East Asian Community. It conceives a draft East Asian Charter, an essential document that distils what East Asian nations have achieved, and also includes integral principles and fundamental rules for future cooperation among countries and peoples in the region. This book will be of interest to graduates and academics interested in regionalism, international relations, international law and Asian studies.

Commentaries on European Contract Laws Nils Jansen 2018-07-12 The book provides rule-by-rule commentaries on European contract law (general contract law, consumer contract law, the law of sale and related services), dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades, and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts (from the CISG to the Draft Common European Sales Law) are critically examined and compared with each other. As far as the *acquis commun* (ie the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have, however, been complemented with some chapters, sections, and individual provisions drawn from other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition, the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background; and it thus investigates whether, and to what extent, these texts can be taken to be genuinely European in nature, ie to constitute a manifestation of a common core of European contract law. Where this is not the case, the question is asked whether, and for what reasons, they should be seen as points of departure for the further development of European contract law.

Provisionally Applied Treaties: Their Binding Force and Legal Nature Anneliese Quast Mertsch 2012-10-19 In Provisionally Applied Treaties: Their Binding Force and Legal Nature, Anneliese Quast Mertsch examines the binding force and legal nature of treaties during the period of their provisional application, a subject whose significance in practice is not reflected in the relatively limited attention it receives in academic writing. She analyses academic opinion and international practice (including especially the manifestations of the intentions of the parties) on the subject. Whilst commonly considered as being in a class of their own, the book instead suggests that provisionally applied treaties are agreements whose binding force and legal nature can vary and should be determined on a case-by-case basis, as is done with other agreements in international law.

Law in the Crisis of Empire, 379-455 AD Tony Honoré 1998 This new book by an eminent legal scholar and author can be described in a number of ways: a work of reference; an essay in the study of style; a contribution to the prosopography of the late Roman quaestorship; and a reflection on the fall of the western (and on the survival of the eastern) Roman empire. Using an innovative method of analysis--already successfully employed in his acclaimed *Emperors and Lawyers* (OUP 1994)--the author examines the laws of a crucial phase of the later Roman empire (379-455 AD), a period during which the west collapsed while the east persisted. He allots the laws to their likely drafters and shows why the eastern Theodosian Code (429-438 AD), intended to restore the legal and administrative unity of the Roman empire, came too late to save the west. The book includes a Palingenesia--as stored on an accompanying floppy disk--allowing scholars to read the primary texts chronologically and judge the soundness of the arguments advanced.
