M4 (76mm) Sherman Medium Tank 1943-65

Steven J. Zaloga 2013-08-20

The M4 Sherman tank was the mainstay of the Western allies between 1942 and 1945. Fast and modern it was a big success and was transported as far afield as Russia and North Africa. The American Chief of Staff claimed in November 1943 it was 'hailed widely as the best tank on the battlefield today...'. However, by the Normandy invasion of June 1944 this was not the case: the new German heavy tanks such as the Panther and Tiger were completely outclassing the Sherman. This title covers the M4 version armed with the 76 mm gun, examining developments such as the HVSS suspension, using much new archive material.

*The Russo-Japanese War
1904-1905* Geoffrey Jukes
2002-08-19 The Russo-

Japanese war saw the first defeat of a major European imperialist power by an Asian country. When Japanese and Russian expansionist interests collided over Manchuria and Korea, the Tsar assumed Japan would never dare to fight. However, after years of planning, Japan launched a surprise attack on the Russian Port Arthur, on the Liaoyang Peninsula in 1904 and the war that followed saw Japan win major battles against Russia. This book explains the background and outbreak of the war, then follows the course of the fighting at Yalu River, Sha-ho, and finally Mukden, the largest battle anywhere in the world before the First World War.

*Chieftain Main Battle Tank
1965-2003* Simon Dunstan
2012-09-20 The concept of the Main Battle Tank emerged from the Centurion Universal tank that was developed at the

end of World War II.

Development of its successor began as early as 1951. The Chieftain incorporated significant innovations including a reclining driver position and two-piece ammunition for greater survivability. The tank entered service in 1967 and was the heaviest armed and armoured MBT within the NATO alliance. The Chieftain saw combat during the Iran-Iraq War, with the Kuwaitis during the 1990 Iraqi invasion and with the British Army during the Gulf War of 1990-91 as special-purpose variants. This book explores the design, development and operation of one of the most influential vehicles used in modern warfare.

Scud Ballistic Missile and Launch Systems 1955-2005

Steven J. Zaloga 2013-03-20

The Scud missile was developed as the centerpiece of Soviet plans to fight nuclear war in the heart of Europe. However, it was never used in its intended role and has instead become a symbol of the

changing nature of warfare in the aftermath of the Cold War. Saddam Hussein's Iraqi armed forces were almost helpless in the face of the Coalition forces in the 1991 Gulf War; the only weapon that Iraq could use to injure the Coalition forces was its arsenal of Scud missiles.

This book explores the development and variants of the missile and its launch systems, its proliferation outside of the West, and its role in conflicts around the world.

Imperial Japanese Navy

Destroyers 1919-45 (1) Mark

Stille 2013-03-20 This volume

will detail the history, weapons and tactics of the Japanese destroyers built before the war.

This includes the famous Fubuki class (called "Special Type" by the Japanese, which were, when completed in the late 1920's, the most powerful class of destroyers in the world. This design forced all other major navies to follow suite and provided the basic design for the next many classes of Imperial Navy destroyers. This book will also

cover the three classes built before the Special Type which were based on a German World War I design as well as two classes built after the advent of the Special Type. All of these ships had a rich history as they fought from the first battles of the Pacific War up until the very end when several accompanied the superbattleship Yamato on her death sortie. The final part of the book will be an analysis of the destroyer designs covered in the book which will include an examination of their strengths and weaknesses. The success (or lack of success) of these designs will be discussed and they will be compared to comparable Allied destroyer designs.

The Cultural Cold War

Frances Stonor Saunders
2013-11-05 During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary

efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be

relevant today.

Unruly Waters Sunil Amrith 2018-12-11 From a MacArthur "Genius," a bold new perspective on the history of Asia, highlighting the long quest to tame its waters Asia's history has been shaped by her waters. In *Unruly Waters*, historian Sunil Amrith reimagines Asia's history through the stories of its rains, rivers, coasts, and seas -- and of the weather-watchers and engineers, mapmakers and farmers who have sought to control them. Looking out from India, he shows how dreams and fears of water shaped visions of political independence and economic development, provoked efforts to reshape nature through dams and pumps, and unleashed powerful tensions within and between nations. Today, Asian nations are racing

to construct hundreds of dams in the Himalayas, with dire environmental impacts; hundreds of millions crowd into coastal cities threatened by cyclones and storm surges. In an age of climate change, *Unruly Waters* is essential reading for anyone seeking to understand Asia's past and its future.

Tanks of Hitler's Eastern Allies 1941-45 Steven J. Zaloga 2013-04-20 The titanic armor battles of the Russian Front are widely known, but the role of Germany's eastern allies is not as well known. Two of these countries, Romania and Hungary, manufactured their own tanks as well as purchasing tanks from Germany. These ranged from older, obsolete types such as the PzKpfw 35(t) all the way up to the latest and best German vehicles including the Tiger I and Hetzer. These tanks played a frequent role in the battles in southern Russia and Ukraine and were especially prominent

in the disaster at Stalingrad where the Red Army specifically chose the weaker Romanian and Hungarian salients for their critical envelopment operation. This New Vanguard will provide a broad survey of the various and colorful tanks used. Besides covering the largest of these Axis tank forces, this book will cover the many smaller and lesser known forces including the Italian contingent in Russia, the Finnish armored force, and the small but interesting armored forces of the Russian Vlasov (RONA), Croatian, Bulgarian and Slovakian armies. This subject is seeing increasing interest in the modeling world; for example Tamiya recently announced a PzKpfw 35 (t) (suitable for Romanian, Slovak armies) a Finnish StuG III, and a Finnish BT-42.

Inside the Great Tanks Hans Halberstadt 1998 This outstanding history is packed with modern color photography of World War II's best-known

tanks. Among the armored fighting vehicles covered are the legendary M4 Sherman, the most famous tank of WWII; the Churchill and Cromwell, which battled their way from Normandy to Hamburg; the Russian T-34, triumphant over the Germans from Stalingrad to the streets of Berlin; and the M60 Patton and Super Sherman, which saw fierce fighting in the Middle East. The collection even includes a rare German Hetzer, a tank-destroyer which took its toll on Allied armor in the last months of the War.

M3 Infantry Half-Track

1940-73 Steven J. Zaloga 2013-06-20 As armoured warfare tactics matured, mechanised infantry became a key ingredient in what is now called 'combined arms' doctrine. For the US Army of World War 2, the most important technical aspect of infantry mechanisation was the development of the M3 half-track personnel carrier. Steven Zaloga guides the reader through the early 1930s development of the half-track,

its first deployment in action in the Philippines in 1941 and its varied and vital role in international deployments since World War 2. This authoritative text also examines the operators of half-tracks and the troops that they carried.

Stryker Combat Vehicles

Gordon L. Rottman 2012-09-20

The eight-wheeled (8x8) Stryker combat light armored vehicle was adopted by the US Army in 2002 to provide a comparatively rapidly deployable contingency force with armor protection, tactical mobility, and heavy firepower, as well as advanced command, control communications, computer, intelligence, surveillance, and reconnaissance (C4ISR) capabilities. Covering the first new US Army release since the M1 Abrams MBT, this book details the conception, ongoing development and deployment of one of the most highly anticipated new AFVs in recent years, including its service in Iraq and the ensuing controversy surrounding the

Stryker's varying successes.

T-72 Main Battle Tank 1974-93

Steven J. Zaloga 2013-08-20

The Russian T-72 Ural tank is the most widely-deployed main battle tank of the current generation. Used by the armies of the former Warsaw pact and Soviet Union, it has also been exported in large numbers to many of the states in the Middle East. This book reveals the previously secret history behind the tank. Steven J Zaloga examines the conditions under which the T-72 was designed and produced.

Technical aspects of the weapon are also discussed, including its EDZ reactive armour which, when it first appeared in December 1984, gave NATO a nasty shock.

Long Walk to Freedom

Nelson Mandela 2008-03-11
"Essential reading for anyone who wants to understand history - and then go out and change it." -President Barack Obama
Nelson Mandela was one of the great moral and political leaders of his time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. After his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela was at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving the nation toward multiracial

government and majority rule. He is still revered everywhere as a vital force in the fight for human rights and racial equality. *Long Walk to Freedom* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela told the extraordinary story of his life -- an epic of struggle, setback, renewed hope, and ultimate triumph. The book that inspired the major motion picture *Mandela: Long Walk to Freedom*.

Leopard 1 Main Battle Tank 1965-95 Michael Jerchel
2012-11-20 Development of the Leopard 1 can be traced back to November 1956, when the operational requirement for a new battle tank was formulated by the Federal German Armed Forces (Bundeswehr). Originally a Franco-German project, the tank under design was named the 'Standard-Panzer'. The French later dropped out, however, and on 1 October 1963 the 'Standard'

Leopard 1 Main Battle Tank 1965-95 New Vanguard

tank was officially named 'Leopard', an appropriate choice considering Germany's wartime pedigree with the formidable Tiger and Panther. This book traces the development and service record of the Leopard 1, detailing its control systems, modifications and variants.

Conspicuous Destruction

Human Rights Watch
(Organization) 1992

Addressing two sets of concerns, this report covers both the abuses relating to the seventeen years of war between the Mozambique Armed Forces and the rebel Mozambique National Resistance, as well as the reforms instigated by the ruling Mozambique Liberation Front under President Joachim Chissano. Africa Watch evaluates the progress made by the Liberation Front government toward a democratic system of government that respects civil and political rights. The 1990 Constitution and related legislation are the centerpiece of this transition, and represent

the most wholehearted attempt to build an institutional and legal framework to guarantee respect for human rights so far attempted in the history of Mozambique. Major concerns remain, however, relating to the ability of the government to implement the promised changes.

Leopard 2 Main Battle Tank

1979-98 Michael Jerchel

2012-11-20 In 1963 West Germany and the United States signed an agreement to develop the best tank in the world the MBT/KPz-70. Though by 1970 this project was stopped, West Germany used the components created for the MBT/KPz-70 to develop a new main battle tank the Leopard 2. Since 1979, when the first Leopard 2 rolled off the production line, the Leopard 2 has undergone various modifications, and has been exported to various European countries. Enhanced by Osprey's signature colour plates and cutaway artwork,

this book examines the development of the Leopard 2 from the first batch to its evolution into the improved Leopard 2 A5, detailing its features and variants.

INTEGRATION OF SCIENCE AS A MECHANISM OF EFFECTIVE DEVELOPMENT

2023-11-28 Proceedings of the XI International Scientific and Practical Conference

Imperial Japanese Navy Destroyers 1919-45 (2) Mark Stille 2013-09-20 During the Pacific War the most successful component of the Imperial Japanese Fleet was its destroyer force. These ships were larger and, in most cases, better-equipped than their Allied counterparts. Armed with a powerful, long-ranged torpedo, these ships proved formidable opponents. Initially, they were instrumental in an unbroken string of Japanese victories, but it was not until the Guadalcanal campaign that these ships fully demonstrated their power. In a series of daring night actions, they devastated Allied task forces with their deadly torpedoes.

This volume details the history, weapons and tactics of the Japanese destroyers built just before and throughout the war, including the famous Kagero and Yugumo classes, the experimental destroyer Shimakaze that boasted a top speed of almost 40 knots and 15 torpedo tubes, and the Matsu class that represented the Japanese equivalent to an Allied destroyer escort. These ships were designed to be built quickly and cheaply, but proved to be very tough in combat.

T-34/76 Medium Tank

1941-45 Steven J. Zaloga 2013-08-20 The T-34 was the most influential tank design of World War 2. When first introduced into combat in the summer of 1941, it represented a revolutionary leap forward in tank design. Its firepower, armour protection and mobility were superior to that of any other medium tank of the period. This superiority did not last long. While the T-34 underwent a series of incremental improvements during 1943, it was being

Leopard 1 Main Battle Tank 1965 95 New Vanguard

surpassed by new German tank designs, most notably the Panther. This title traces the life of the original T-34 through all its difficulties to eventual success.

T-80 Standard Tank Steven J. Zaloga 2011-10-20 The history of the little-known yet controversial T-80 and its subsequent variants. The Soviet T-80 Standard Tank was the last tank fielded before the Soviet collapse, and the most controversial. Despite having the most sophisticated fire controls and multi-layer armor ever fielded on a Soviet tank, its turbine power plant (rather than a conventional diesel)

remained a source of considerable trouble throughout its career. Steven J Zaloga charts the little-known history of the T-80, covering the initial construction, through the development to the subsequent variants, the T-84 and Russia's enigmatic "Black Eagle Tank." Accompanying detailed cut-away artwork illustrates the unusual design features that made the T-80 so controversial.

A Military History of South Africa Timothy J. Stapleton 2010-04-09 This work offers the first one-volume comprehensive military history of modern South Africa. A Military History of South Africa: From the Dutch-Khoi Wars to the End of Apartheid represents the first

comprehensive military history of South Africa from the beginning of European colonization in the Cape during the 1650s to the current postapartheid republic. With particular emphasis on the last 200 years, this balanced analysis stresses the historical importance of warfare and military structures in the shaping of modern South African society. Important themes include military adaptation during the process of colonial conquest and African resistance, the growth of South Africa as a regional military power from the early 20th century, and South African involvement in conflicts of the decolonization era. Organized chronologically, each chapter reviews the major conflicts, policies, and military issues of a specific period in South African history. Coverage includes the wars of colonial conquest (1830-69), the diamond wars (1869-81), the gold wars (1886-1910), World Wars I and II (1910-45), and the apartheid wars (1948-94).

British Motor Gun Boat

1939-45 Angus Konstam

2013-03-20 Motor Gun Boats were the “Spitfires of the Seas” of the Royal Navy. Bristling with small-calibre guns and machine guns, they served in a variety of roles during the War. In the early war period they battled against German E-boats in the English Channel, then went on the offensive, searching the enemy shore for targets of opportunity. At other times, they ran support for Motor Torpedo Boats and were used to deliver commandos on various raids. Naval Warfare expert, Angus Konstam, tells the story of these small, but destructive boats, beginning with their design and development and carrying through to their operational use in both the European and Mediterranean theatres of World War II.

BMP Infantry Fighting

Vehicle 1967-94 Steven J.

Zaloga 2013-06-20 The Russian

BMP infantry fighting vehicle

(IFV) was one of the most

significant innovations in

infantry tactics in the latter

half of the 20th century. Built

in response to the threat of nuclear warfare, it was the world's first IFV, providing the infantry squad with unprecedented firepower, mobility and protection. With over 55,000 manufactured since 1966, the BMP is also numerically one of the most important armoured vehicles ever built. This richly illustrated book examines the development and design of the BMP, detailing its armaments, performance in combat and variants.

British Battleships 1914-18

(1) Angus Konstam 2013-05-20

The launch of HMS Dreadnought in 1906 changed the face of naval warfare. The first half-dozen dreadnoughts were all improvements of the basic Dreadnought design, all carrying ten 12-inch guns. It was only in 1911, with the launch of HMS Neptune that the layout of this powerful armament was altered as a result of practical experience. Two more versions of the Neptune entered service later that same year. These nine improved dreadnoughts formed

the core of the British High Seas Fleet. They would soon, however, be outclassed by a new breed of "super dreadnoughts", the subject of the second volume in this two-part story. While these new battleships carried larger 13.5-inch guns, they proved less successful as all-round battleships than their more lightly-armed predecessors. One last 12-inch gun dreadnought entered service in 1914, when a seven turret battleship being built for the Turks was commandeered by the Royal Navy, and re-named HMS Agincourt. This New Vanguard title, the first of two covering these famous warships will uncover the full story of the British battleships of World War I. The book will look at their revolutionary design, the 12-inch guns that provided them with their firepower, and the way these guns were fired in anger.

T-34-85 Medium Tank 1944-94
Steven J. Zaloga 2013-08-20

The T-34-85 tank is one of those rare weapons that have remained in service for more

than half a century. First introduced in 1944, it has seen combat in nearly every corner of the globe. Steven Zaloga and Jim Kinnear look at this long-serving tank at length.

Although long obsolete in Europe, it has proven a reliable and potent weapon in many Third World conflicts, and is still in service with more than a dozen armies around the world.

T-64 Battle Tank Steven J. Zaloga 2015-10-20 The T-64 tank was the most revolutionary design of the whole Cold War, designed to provide the firepower and armour protection of a heavy tank in a medium-weight design. It pioneered a host of new technologies including laminate armour, stereoscopic tank rangefinders, opposed-piston engines, smooth-bore tank guns with discarding sabot ammunition, and gun-fired guided projectiles. These impressive features meant that the Russians were loath to part with the secrets of the design, and the T-64 was the only Soviet tank type of the Cold War that was never exported.

Written by an armour expert, this detailed technical history sheds light on the secrets behind the Cold War's most controversial tank, revealing how its highly advanced technologies proved to be both a blessing and a curse.

Modern Israeli Tanks and Infantry Carriers 1985-2004

Marsh Gelbart 2012-05-20

Over the last two decades, the Israel Defence Force (IDF) has introduced a variety of new AFVs. Old models such as the M48 and M60 have been improved beyond recognition, in the form of the Magach 7. The performance of Israel's indigenous Merkava tank has been similarly enhanced with new variants and the new Merkava 4 MBT has recently entered service. Israeli infantry have also received machines such as the Achzarit assault carrier, the Puma combat engineer vehicle and the Nagmachon and Nakpadon (tank-based carriers intended for low intensity conflicts). This book examines the design, modification and combat history of these formidable

fighting machines.

M103 Heavy Tank 1950-74

Kenneth W Estes 2013-03-20

The T43 design represented the pinnacle of U.S. Army tank engineering of the late 1940s. The heavy tank proved fairly popular with its crews, who above all respected the powerful armament it carried. The outbreak of war in Korea brought a rush order in December 1950 which led to a complete production run of 300 vehicles. After 1951, the Marine Corps alone retained confidence in the heavy tank program, investing its scarce funds in the improvements necessary to bring about its fielding after a hurried production run in midst of the 'tank crisis' of the year 1950-51. The eventual retirement of the M103 in 1972, over 20 years after manufacture and after 14 years of operational service, demonstrated the soundness of its engineering. It may have been the unwanted 'ugly duckling' of the Army, which refrained from naming the M103 alone of all its postwar

tanks. For the Marine Corps, it served the purpose defined for it in 1949 until the automotive and weapons technology of the United States could produce viable alternatives.

M1A2 Abrams Main Battle

Tank 1993-2018 Steven J. Zaloga 2019-03-21 Since the Gulf War, the Abrams tank has undergone a transformation, while fighting in conflicts across the world. Its M1A1 and M1A2 variants have seen great improvements made to this iconic tank, including in fire-control, armour protection, and thermal imaging technology. Involvement in the conflicts in Iraq and Afghanistan necessitated a number of upgrades and modifications as the United States fought two of its longest wars. Recent years have seen new variants of the series such as the ABV Assault Breacher Vehicle and M104 Wolverine Heavy Assault Bridge. Over the past few decades, the M1A1 Abrams has also been extensively exported and is license produced in Egypt. The long-awaited follow-up to NVG 2 M1 Abrams Main Battle Tank 1982-92 (1993), this fully illustrated study examines the Abrams tanks' last quarter-century of service with both the United States and its various foreign operators with a focus on its

combat history.

M7 Priest 105mm Howitzer Motor Carriage Steven J.

Zaloga 2013-07-20 Based upon the ubiquitous Grant/Sherman tank, the M7 Priest is the iconic Allied self-propelled howitzer. It was the most widely manufactured vehicle of its type in World War II and was utilized by the US, British, Canadian and Free French forces. Its combat debut was with Montgomery's Eighth Army at El Alamein and it fought subsequently in every major campaign through Sicily, Italy, Normandy and the final battles in Germany. In addition to covering all variants of the Priest, this book also looks at the major derivatives, including the British/Canadian Sexton and the US M12 155mm GMC.
