Run, Hide, Repeat Pauline Dakin 2017-09-05 Winner of the 2018 Edna Staebler Award for Creative Non-Fiction Longlisted for British Columbia's National Award for Canadian Non-Fiction 2018 Shortlisted for the 2018 Evelyn Richardson Non-fiction Award Shortlisted for the 2018 Atlantic Book Awards - Margaret and John Savage First Book Award Shortlisted for the 2018 Frank Hegyi Award for Emerging Authors An unforgettable family tale of deception and betrayal, love and forgiveness Pauline Dakin spent her childhood on the run. Without warning, her mother twice uprooted her and her brother, moving thousands of miles away from family and friends. Disturbing events interrupt their outwardly normal life: break-ins, car thefts, even physical attacks on a family friend. Many years later, her mother finally revealed they'd been running from the Mafia and were receiving protection from a covert anti-organized crime task force. But the truth was even more bizarre. Gradually, Dakin's fears give way to suspicion. She puts her journalistic training to work and discovers that the Mafia threat was actually an elaborate web of lies. As she revisits her past, Dakin uncovers the human capacity for betrayal and deception, and the power of love to forgive. Run, Hide, Repeat is a memoir of a childhood steeped in unexplained fear and menace. Gripping and suspenseful, it moves from Dakin's uneasy acceptance of her family's dire situation to bewildered anger. As compelling and twisted as a thriller, Run Hide Repeat is an unforgettable portrait of a family under threat, and the resilience of family bonds.

Island of the Lost Joan Druett 2019-08-06 “Riveting.” —The New York Times Book Review Hundreds of miles from civilization, two ships wreck on opposite ends of the same deserted island in this true story of human nature at its best—and at its worst. It is 1864, and Captain Thomas Musgrave’s schooner, the Grafton, has just wrecked on Auckland Island, a forbidding piece of land 285 miles south of New Zealand. Battered by year-round freezing rain and constant winds, it is one of the most inhospitable places on earth. To be shipwrecked there means almost certain death. Incredibly, at the same time on the opposite end of the island, another ship runs aground during a storm. Separated by only twenty miles and the island’s treacherous, impassable cliffs, the crews of the Grafton and the Invercauld face the same fate. And yet where the Invercauld’s crew turns inward on itself, fighting, starving, and even turning to cannibalism, Musgrave’s crew bands together to build a cabin and a forge—and eventually, to find a way to escape. Using the survivors’ journals and historical records, award-winning maritime historian Joan Druett brings to life this extraordinary untold story about leadership and the fine line between order and chaos.

No Accident Neil Arason 2014-04-29 It is possible to eliminate death and serious injury from Canada’s roads. In other jurisdictions, the European Union, centres in the United States, and at least one automotive company aim to achieve comparable results as early as 2020. In Canada, though, citizens must turn their thinking on its head and make road safety a national priority. Since the motor vehicle first went into mass production, the driver has taken most of the blame for its failures. In a world where each person’s safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel, failure on a massive scale has been the result. When we neglect the central role of the motor vehicle as a dangerous consumer product, the result is one of the largest human-made means for physically assaulting human beings. It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by-product of human carnage is relegated to history. No Accident examines problems related to road safety and makes recommendations for the way forward. Topics include types of drivers; human-related driving errors related to fatigue, speed, alcohol, and distraction and roads; pedestrians, cyclists, and public transit; road engineering; motor vehicle regulation; auto safety design; and collision-avoidance technologies such as radar and camera-based sensors on vehicles that prevent crashes. This multi-disciplinary study demystifies the world of road safety and provides a road map for the next twenty years.
